In addition, the unaudited consolidated financial statements include applicable disclosures required by the Rules Governing the Listing of Securities on the GEM and by the Hong Kong Companies Ordinance. The principal accounting policies used in the quarterly financial statements are consistent with those adopted in the financial statements for the year ended 31 March 2012 and these unaudited quarterly financial statements should be read in conjunction with such financial statements.

HKICPA has issued a number of new and revised HKFRSs. For those which are effective for accounting periods beginning on 1 April 2012, the adoption has no material effect on the reported results and the financial position of the Group for the current or prior accounting periods. The effect of changes in presentation for the prior year by line items presented in the unaudited consolidated statement of comprehensive income is as follows:

No provision for Hong Kong Profits Tax has been made in the consolidated financial statements as there were no estimated assessable profits for three-month periods ended 30 June 2012 and 2011.

In accordance with the relevant tax laws in the PRC, the subsidiaries of the Company in the PRC are subject to an enterprise income tax rate of 25% (2011: 25%) on its taxable income. Number of shares		
Weighted average number of shares for the purpose of basis earnings per share	<u>2,713,798</u>	<u>2,713,798</u>

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

The Group is principally engaged in manufacturing, sale and distribution of tobacco agricultural machinery, related products and provision of related services, provision of digital television service and distribution of healthcare products in the PRC.

The Group recorded a profit for the period of HK\$153,269,000 and a profit attributable to the owners of the Company of HK\$153,780,000 for the three-month period ended 30 June 2012. The Group's turnover and gross profit went up by 93% and 90% to HK\$460,901,000 and HK\$138,935,000 respectively compared to the corresponding period of last year. Such increases were principally due to continuous business growth of the Group's core operations, namely, tobacco agricultural operation.

On 29 May 2012, the Group has completed the disposal of its certain prepaid land lease payments and property and equipment with an aggregate net carrying amount of HK\$103,431,000 and the sale proceeds is settled by the convertible bonds issued by the Company to Cyberland China Limited amounting to HK\$170,599,000. A disposal gain of HK\$67,168,000 was recorded.

Tobacco agricultural operation

The Group's tobacco agricultural operation performed well during the period. Turnover from the tobacco agricultural operation grew by 94% to HK\$459,554,000 (2011: HK\$237,249,000). Such increase was principally due to the increased sale volume of the Group's core product — flue-curing machinery products "KH" series.

On 10 May 2012, the Group entered into a share transfer agreement with an independent third party to dispose of the remaining 20% interest in Xian Shenghua for a consideration of RMB6,000,000 (Equivalent to HK\$7,407,000). The transaction was completed on 16 May 2012 and a disposal loss of HK\$1,504,000 was recorded.

On 28 February 2011, the Group entered into a memorandum of understanding with an independent third party for a possible acquisition of 70% interests in a company which was principally engaged in the tobacco related agricultural operation in the PRC. The memorandum of understanding was expired on 28 August 2011 and the Group and the seller were mutually agreed in oral to further extend the negotiation. At the date of the report, the discussion is still on-going and no formal agreement has been entered by both parties.

Digital television operation

Performance from the Group's digital television business in the PRC was improving due to the rising advertising income as a result of the partial unlocked scientific channel in Hunan Province. Turnover from the digital television operation increased by 66% to HK\$1,262,000 (2011: HK\$760,000).

Healthcare products operation

In contrast, the Group's healthcare products operation faced considerable pressure from competition and rising operating costs. During the period, turnover from this operation was HK\$85,000 (2011: HK\$786,000). As the competitive pressure is not expected to ease and the operating costs will remain high in the coming years, the operation will still be challenging. The Group is now considering various measures to improve its performance and financial position or alternatively, may dispose of the operation if opportunity arises.

Finance costs

The finance costs decreased by 34% to HK\$9,150,000 (2011: HK\$13,795,000) mainly due to the decreased loan size.
