Company Focus and Vision

Deep Yellow Limited (DYL)** is an Australian-based uranium focused company with extensive operations in the southern African nation of **Namibia and Australia.

***DYL** is targeting becoming a **uranium producer** in Namibia in **2013-14** as it strives to continue to successfully grow its uranium resource base through delineation of previously identified mineralisation, discovery and/or M&A opportunities.*

Market Cap per Resource Lb U₃O₈

DYL Market Cap per Resource Lb U₃O₈

Omahola Project

The **Omahola Project** is the subject of a **Pre-Feasibility Study (PFS)** being conducted by **SNC Lavalin** – Johannesburg

Project uranium resources consist of two deposits:

- ✿ **INCA** deposit – unique uranium and magnetite mineralisation
- ✿ **Tubas Red Sand (TRS)** deposit – wind-blown red sands with uranium mineralisation
- ✿ Total initial uranium resources in accordance with JORC Code
 - 29.8 M tonnes at 287 ppm eU₃O₈ for 8,583 tonnes (**18.9 Mlbs**) eU₃O₈
 - Expanded resource estimate anticipated in **September Quarter**

Omahola Project – INCA Deposit

INCA deposit

- ✿ Unique uranium and magnetite mineralisation
- ✿ Initial JORC Resource estimate 16.0 M tonnes at 400 ppm eU₃O₈ containing **14.0 M lbs eU₃O₈** at 200 ppm U₃O₈ cut-off grade
- ✿ Shallow mineralisation from **~20 metres depth**
- ✿ **Magnetite** may potentially be separated during processing and sold as **by-product** to other uranium producers with acid leach circuits

Omahola Project – TRS Deposit

Tubas Red Sand (TRS) deposit

- ✿ Wind-blown red sands with uranium mineralisation
- ✿ Initial JORC Resource 13.8 M tonnes at 160 ppm eU₃O₈ containing **4.9 M lbs eU₃O₈** at 100 ppm U₃O₈ cut-off grade
- ✿ **From surface to ~13 metres depth**
 - Available as **free-digging sand** amenable to low cost mining techniques
- ✿ **Amenable to beneficiation**
 - Preliminary tests indicate **90% of uranium can be captured in 22% of mass, increasing grade to over 500 ppm U₃O₈**
- ✿ Drilling suggests mineralised red sands occur adjacent to and may potentially flank the mineralised Tubas-Oryx palaeochannel system which stretches some 30 kilometres across RUN's EPL3496

Pre-Feasibility Study (PFS)

- ✿ Study launched in **March 2010**
- ✿ **SNC Lavalin** lead engineering consultant and Study Manager
- ✿ Metallurgical testwork by **Mintek** – Johannesburg
- ✿ Draft **PFS** anticipated in **December Quarter 2010**

Forward Looking Targets for Project Development

- ❁ PFS March-December 2010
- ❁ Definitive Feasibility Study (DFS); targeting 2011*
- ❁ Environmental approvals and licensing; targeting 2011-2012*
- ❁ Project development and construction; targeting 2012-2013*
- ❁ **Start of mining and ore processing; targeting 2013-2014***

* -Contingent on successful completion of prior steps

Tubas Alaskite Prospect

- Discovery of **high-grade** alaskite hosted uranium mineralisation announced 29 April 2010
- ALAR13 intersected 89 metres at 400 ppm cU_3O_8

Shiyela Magnetite Prospect

- Results of evaluation of magnetite cores sample yields high-grade iron magnetite concentrate with low impurities

Nova JV Tenements

- 1,323 km² additional prospective ground adjoining RUN's EPLs
- RUN earning 65% by spending A\$3.5 million across 3 years
- Contain same host rocks as Langer Heinrich, Rossing, Rossing South and Etango

New Projects – Locations

New Projects – Tubas Alaskite

Regional aeromagnetic image with Tubas Alaskite Prospect relative to known uranium mineralisation

New Projects – Shiyela Magnetite

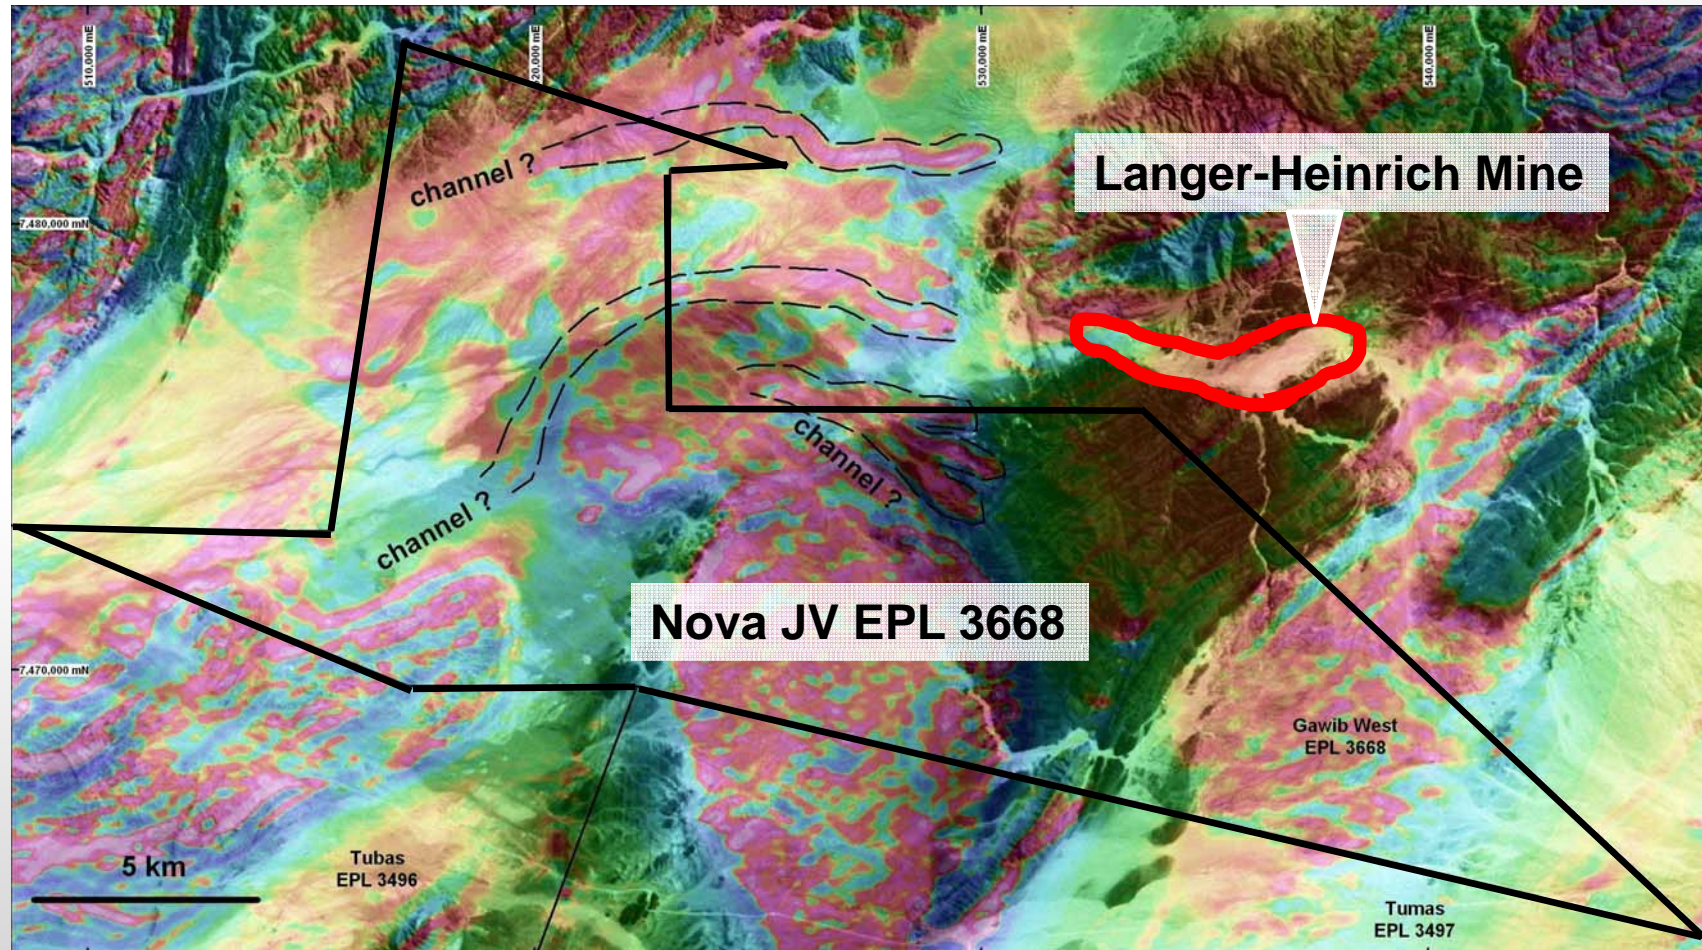

Total Magnetic Intensity (TMI) Image from RUN aeromagnetic survey - showing regional extent of interpreted 'high magnetic terrain' (red) within EPL 3496

New Projects – Shiyela

Total Magnetic Intensity (TMI) Image over 1st Vertical Derivative aeromagnetic image with highest magnetic intensity in red

New Projects – Nova EPL 3668

The Next 12 Months

- ✿ Continue to expand uranium resource base
- ✿ Complete PFS on Omahola; embark on DFS
- ✿ PFS or Scoping Study on Tubas high-grade resource subset
- ✿ Advance drilling on emerging new projects
 - Tubas Alaskite and Shiyela Magnetite
- ✿ Continue reconnaissance drilling on Nova EPLs and untested areas on RUN's EPLs
- ✿ Consideration of strategic asset sales to boost cash reserve
- ✿ Major focus on marketing and investor relations
- ✿ Eyes wide open for M&A opportunities

JORC Compliance Statements

INCA and Tubas Red Sand deposits

*The information in this report that relates to the **Mineral Resource for the INCA and Tubas Red Sand deposits** is based on information compiled by **Mr Mike Hall**, who is a Member of The Australasian Institute of Mining and Metallurgy. Mr Hall is Consulting Geologist Resources with **The MSA Group** and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Mineral Resources and Reserves'. Mr Hall consents to the inclusion in this report of the matters based on his information in the form and context in which it appears. Information in this report has also been verified by **Mr Mike Venter**, who is a member of the South African Council for Natural and Scientific Professions (SACNASP), a "Recognised Overseas Professional Organization" ('ROPO'). Mr Venter is Regional Consulting Geologist, with **The MSA Group** and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Mineral Resources and Reserves'. Mr Venter has visited the project sites to review drilling, sampling and other aspects of the work relevant to this report and consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.*

*The information in this report relating to **Exploration Results for the INCA and Tubas Red Sand deposits** is based on information compiled by **Dr Leon Pretorius** who is a Fellow of the Australasian Institute of Mining and Metallurgy. Dr Pretorius is a full-time employee of Deep Yellow Limited and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserve'. Dr Pretorius consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.*

Where eU308 and/or cU308 is reported it relates to values attained from radiometrically logging boreholes with Auslog equipment using an A675 slimline gamma ray tool. All probes are calibrated either at the Pelindaba Calibration facility in South Africa or at the Adelaide Calibration facility in South Australia.

JORC Compliance Statements

Aussinanis and Tumas deposits

*The information in this report that relates **Mineral Resource** estimation for **Aussinanis and Tumas** is based on work completed by **Mr Jonathon Abbott** who is a full time employee of **Hellman and Schofield Pty Ltd** and a Member of the Australasian Institute of Mining and Metallurgy. Mr Abbott has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' and as a Qualified Person as defined in the AIM Rules. Mr Abbott consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.*

*The information in this report that relates to **Gamma Logging Results and their conversion to Equivalent Uranium Grades** for **Tumas** is based on information compiled by **Dr Doug Barrett** a Consulting Geophysicist and Member of the Australian Institute of Geoscientists. Dr Barrett has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Barrett consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.*

*The information in this report that relates to **data quality, including the accuracy and reliability of gamma logging results, bulk densities, cut off grades and comments on the resource estimates** for **Aussinanis** is based on information compiled by **Dr Leon Pretorius** a Fellow of The Australasian Institute of Mining and Metallurgy. Dr Pretorius is a full-time employee of Deep Yellow Limited and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Pretorius consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.*

JORC Compliance Statements

Tubas deposit

*The information in this report that relates **Mineral Resource** estimation for **Tubas** is based on work completed by **Mr Willem H. Kotzé Pr. Sci. Nat MSAIMM**. Mr Kotzé who is a full time employee of **Hellman and Schofield Pty Ltd** and a Member of the Australasian Institute of Mining and Metallurgy. Mr Kotzé has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' and as a Qualified Person as defined in the AIM Rules. Mr Kotzé consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.*

*The information in this report that relates to **Exploration Results, Mineral Resources or Ore Reserves** for **Tubas** is based on information compiled by **Dr Leon Pretorius** a Fellow of The Australasian Institute of Mining and Metallurgy. Dr Pretorius is a full-time employee of Deep Yellow Limited and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Pretorius consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.*

Where eU3O8 and/or cU3O8 is reported it relates to values attained from radiometrically logging boreholes with Auslog equipment using an A675 slimline gamma ray tool. All probes are calibrated either at the Pelindaba Calibration facility in South Africa or at the Adelaide Calibration facility in South Australia.

JORC Compliance Statements

Mount Isa Projects

*The information in this report that relates to **Mineral Resource** estimation for the **Mount Isa Projects** is based on work compiled by **Mr Neil Inwood**, a Member of the Australasian Institute of Mining and Metallurgy. Mr Inwood is employed by Coffey Mining Pty Ltd and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Inwood consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.*

*The information in this report that relates to **Exploration Results, Mineral Resources or Ore Reserves** for the **Mount Isa Projects** is based on information compiled by **Dr Leon Pretorius** a Fellow of The Australasian Institute of Mining and Metallurgy. Dr Pretorius is a full-time employee of Deep Yellow Limited and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Pretorius consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.*
