

MINCOR RESOURCES NL

Half-Year 2008/09
(31 December 2008)

FINANCIAL RESULTS

Highlights of the Half Year to December 2008

- First ever net loss following sharp drop in nickel price
- Loss comes despite **record production** and the Company's **best cost performance** in more than two years
- Net loss of **\$22.7 million** – Result impacted by provisional pricing adjustments (\$9.3m), asset impairment charges (\$17.3m), and exploration write-offs (\$6.7 million)
- Solid Operating Earnings of **\$28.6 million** (revenue less cash costs before provisional pricing adjustments) demonstrates the fundamental strength of Mincor's operations
- Strong balance sheet: working capital at **\$72 million**, no debt
- Board declares **2 cps fully franked interim dividend**
- Outlook for second half **much stronger** following implementation of Operational Management Plan
- **Growth options maintained** – Strong exploration program underway

Interim Dividend per Share (CPS)	2.0	6.0	6.0	2.0

*The nickel price received by Mincor for any month of production is the average LME spot price during the third month following the month of delivery. Therefore the nickel price in the December 2008 half-year accounts for the production months of October, November and December 2008 must be estimated. The Company's policy is to base this estimate upon the 3 month forward nickel price at the end of the month of delivery. Revenue for October, November and December in this report has been estimated in this way, and is subject to an adjustment (up or down) when the final nickel price is known. Similarly, revenues for the current half year period have been adjusted to take account of the final nickel prices established for April, May and June 2008. As a result Mincor has recognised a negative sales revenue adjustment of \$9.3 million attributable to those production months. This negative adjustment is incorporated in the above figures.

Return on Equity (annualised)	N/A	32%	60%	27%	35%

Note: Shareholder's Equity has been adjusted (by \$22.80 million) to remove the impact of cashflow hedges. Under the current AIFRS rules hedges must be fair valued with mark to market adjustments made against equity. As this fair value adjustment fluctuates with nickel and currency prices and has no impact on the Company's profit for the period, it has been removed from the above table. In addition, earnings for the half year have been annualised when calculating Return on Equity.
