ASX RELEASE

6 March 2015

CANTRIXIL DATA TO BE PRESENTED AT TWO MAJOR CONFERENCES

Novogen today announces that Professor Gil Mor MD PhD from Yale Medical School will be presenting pre-clinical data on the lead candidate product, Cantrixil, at two upcoming conferences.

The first is an oral presentation at the 62nd Society of Reproductive Investigation conference, March 25-28, Hilton San Francisco, CA. Professor Mor's presentation will focus on the pre-clinical efficacy studies that justified the Company's decision to progress Cantrixil into the clinic for the treatment of abdominal carcinomatosis.

The second is a late-breaking poster at the annual American Association for Cancer Research (AACR) conference, April 18-22, Pennsylvania Convention Center, Philadelphia, PA. The presentation will review mechanistic aspects of Cantrixil efficacy in ovarian cancer stem cells, and also detail in vivo data generated on Cantrixil in Yale's recurrent ovarian cancer carcinomatosis model that has informed the design of the Company's first-in-man clinical trial.

About Novogen Limited

Novogen is a public, drug-development company whose shares trade on both the Australian Securities Exchange ('NRT') and NASDAQ ('NVGN'). The Novogen Group includes a New Haven CT – based joint venture company, CanTx Inc., with Yale University.

Novogen has two main drug technology platforms: super-benzopyrans (SBPs) and anti-tropomyosins (ATMs). SBP compounds have been created to kill the full range of cells within a tumor, but particularly the cancer stem cells. The ATM compounds target the microfilament component of the cancer cell and when used in conjunction with standard anti-microtubular drugs, result in comprehensive and fatal destruction of the cancer cell's cytoskeleton. Ovarian cancer, colorectal cancer, malignant ascites, prostate cancer, neural cancers (glioblastoma, neuroblastoma in children) and melanoma are the key clinical indications being pursued, with the ultimate objective of employing both technologies as a unified approach to first-line therapy.

Forward Looking Statement

This press release contains "forward-looking statements" within the meaning of section 27A of the Securities Act of 1933 and section 21E of the Securities Exchange Act of 1934. The Company has tried to identify such forward-looking statements by use of such words as "expects," "appear," "intends," "hopes," "anticipates," "believes," "could," "should," "would," "may," "target," "evidences" and "estimates," and other similar expressions, but these words are not the exclusive means of identifying such statements. Such statements include, but are not limited to any statements relating to the Company's drug development program, including, but not limited to the initiation, progress and outcomes of clinical trials of the Company's drug development program, including, but not limited to, CANTRIXIL, and any other statements that are not historical facts. Such statements involve risks and uncertainties, including, but not limited to, those risks and uncertainties relating to the difficulties or delays in financing, development, testing, regulatory approval, production and marketing of the Company's drug components, including, but not limited to CANTRIXIL, the ability of the Company to procure additional future sources of financing, unexpected adverse side effects or inadequate therapeutic efficacy of the Company's drug compounds, including, but not limited to, CANTRIXIL, that could slow or prevent products coming to market, the uncertainty of patent protection for the Company's intellectual property or trade secrets, including, but not limited to, the intellectual property relating to CANTRIXIL, and other risks detailed from time to time in the filings the Company makes with Securities and Exchange Commission including its annual reports on Form 20-F and its reports on Form 6-K. Such statements are based on management's current expectations, but actual results may differ materially due to various factors including those risks and uncertainties mentioned or referred to in this press release. Accordingly, you should not rely on those forward-looking statements as a prediction of actual future results.
