## TV Business in the PRC Market

- According to CMM's report, sales volume and revenue of TV industry dropped by $12.5 \%$ and $6.0 \%$ year-on-year, respectively in the first quarter of 2017. Impacted by this situation, the Group's LCD TV sales volume decreased by 7.7\% year-on-year to 2.22 million sets.
- According to CMM's report, the average selling price of TV industry increased by $7.4 \%$ year-on-year. The average selling price of the Group's LCD TVs (excluding ODM business) would have increased by $14.8 \%$ if it was calculated in Renminbi. Due to the $5.4 \%$ depreciation in the average exchange rate of Renminbi against Hong Kong dollars compared with the same period of last year, the average selling price of the Group's LCD TVs (excluding ODM business) soared by $9.4 \%$ year-on-year after it was converted and calculated in Hong Kong dollars, and rose by $5.8 \%$ quarter-on-quarter.
- With product mix improvement and the rise in the average selling price of LCD TVs, the Group's turnover of LCD TVs was only down by $2.8 \%$ year-on-year to HK\$4.82 billion.
- The panel prices have continued to hover at a high level, which has put pressure on overall gross profit margin. Nevertheless, the Group has proactively optimised its product mix, the gross profit margin of LCD TVs (excluding ODM business) slightly increased by 0.6 percentage point.
