## Significant improvement in business operation and profitability in the third quarter of 2017

 with continuous increase in sales volume, turnover and average selling price:- The sales volume, average selling price and turnover of LCD TVs in the first three quarters and the third quarter increased year-on-year
- With the continuous enhancement of its product mix in PRC market, the Group's sales performance was well above the average industry level
- The growth momentum in the overseas markets remained strong with competitive advantages
- The overall gross profit margin dropped mainly due to:1) The proportion of the overseas business and the PRC's online business with lower gross profit margin ratio and expense ratio have increased; 2) The panel price began to fall significantly from the third quarter, the influence on the cost will subsequently be reflected on the gross profit margin in one to three months
- Despite the year-on-year decrease of the gross profit margin, the Group's profitability improved significantly through the continuous implementation of the strategy of "Downsizing, Cost Reduction, Efficiency Enhancement" which led to effective cost control and the downward trend of expense ratio

- According to CMM's report, the sales volume of LCD TV offline market in the first three quarters of 2017 decreased by $19.7 \%$ year-on-year. The Group's LCD TV sales volume dropped $10.1 \%$ year-on-year to 6.05 million sets, yet its sales performance was better than the average level in the industry
- Due to the optimisation of product mix and the rise of average selling price of LCD TVs, turnover of the LCD TVs of the Group rose by $2.3 \%$ year-on-year in Renminbi (RMB). As a result of the $2.7 \%$ depreciation in the average exchange rate of RMB against Hong Kong dollars (HKD) compared to the same period of last year, the turnover which was converted into HKD remained flat
- According to CMM's report, the average selling price of LCD TV in the offline market increased $14.0 \%$ year-on-year. The average selling price of LCD TVs of the Group (excluding ODM business) rose 19.3\% year-on-year in RMB
- Gross profit margin decreased mainly due to: 1) the proportion of online business with lower gross profit margin and expense ratio has increased; 2) the panel price began to fall significantly from the third quarter, the influence on the cost will be reflected in the fourth quarter
