Independent Auditors' Report

To the Board of Directors of Inventec Appliances Corporation and Subsidiaries:

We have audited the accompanying consolidated balance sheets of Inventec Appliances Corporation and subsidiaries as of June 30, 2005, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the six months then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with "Rules Governing Auditing and Certification of Financial Statements by Certified Public Accountants" and auditing standards generally accepted in the Republic of China. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Inventec Appliances Corporation and subsidiaries as of June 30, 2005, and the results of their operations and their cash flows for the six months then ended in conformity with generally accepted accounting principles in the Republic of China.

Inventec Appliances Corporation prepared and presented semi-annual consolidated financial statements for the first time as of June 30, 2005. In accordance with the regulation issued by the Financial Supervisory Commission, a company which prepares semi-annual consolidated financial statements as of June 30, 2005. may present single-period semi-annual consolidated financial statements. Thus, the comparative financial statements and disclosures required under the Guidelines Governing the Preparation of Financial Reports by Securities Issuers do not apply to these consolidated financial statements.

Taipei, Taiwan, R.O.C August 8, 2005

The accompanying financial statements are intended only to present the financial position, results of operation and cash flows in accordance with the accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures, and practices to audit such financial statements are those generally accepted and applied in the Republic of China.

(New Taiwan Dollars in Thousands, Unless Otherwise Stated)

(1) Organization and Business

The entity of the consolidated financial statements:

- (i) Inventec Appliances Corporation (the "Company") was organized on April 25, 2000 and incorporated on May 12, 2000. On November 22, 2002, the Company acquired Inventec Online Corp. of which Inventec Corporation is the primary shareholder. The Company engages primarily in the manufacture and sale of wire and wireless communication and digital accessory products.
- (ii) Inventec Appliances (Cayman) Holding Corp, a wholly-owned subsidiary of the Company, was incorporated in 2000 as a holding company to engage in various investments. As of June 30, 2005, total issued capital was US\$76,694 thousand. Through Inventec Appliances (Cayman) Holding Corp., the Company indirectly invested in Inventec Appliances (BVI) Corp., Inventec Appliances (USA) Distribution Corp.(IDC), Inventec Appliances (USA) Packing Corp.(IPC), Inventec Appliances (Shanghai) Co., Ltd., Inventec Appliances (Pudong) Co., Ltd., Inventec Appliances (Nanjing) Co., Ltd., Inventec Appliances (Jiangning) Co., Ltd., and Inventec Appliances (Shanghai) International Marketing Corp. The Company's ownership in the above investments is 100%
- (iii) The consolidated financial statements include the Company and the above mentioned subsidiaries and all material intercompany transactions have been eliminated in the consolidated financial statements.

As of June 30, 2005, the number of employees was 12,083 (excluding employed by contracts).

(2) Summary of Significant Accounting Policies

The financial statements of the Company have been prepared in the local currency and in Chinese. These financial statements have been translated into English. The translated information is consistent with the Chinese language financial statements from which it is derived.

The Company's financial statements were prepared in accordance with "Guidelines Governing the Preparation of Financial Reports by Securities Issuers" and generally accepted accounting principles of the Republic of China. Summary of significant accounting policies and their measurement basis are as follows:

(a) Foreign Currency Translation

Foreign currency transactions are recorded at the exchange rates prevailing at the transaction dates. At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are translated using the exchange rates prevailing on that date. The resulting exchange gains or losses from settlement or translations of monetary assets and liabilities are reflected in the accompanying statements of income.

(b) Assets Impairment

Effective January 1, 2005, the Company adopted Statement of Financial Accounting Standards No.35 (SFAS 35) "Accounting for Asset Impairment". According to SFAS 35, the Company assesses at each balance sheet date whether there is any indication that an asset (individual asset or cash-generating unit other than goodwill) may have been impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. The Company recognizes impairment loss for an asset whose carrying value is higher than the recoverable amount.

The Company reserves an impairment loss recognized in prior periods for assets other than goodwill if there is indication that the impairment loss recognized no longer exists or has decreased. The carrying value after the reversal should not exceed the recoverable amount or the depreciated or amortized balance of the assets assuming no impairment loss was recognized in prior periods.

The Company assesses the cash-generating unit to which goodwill is allocated on an annual basis and recognizes an impairment loss on the excess of carrying value over the recoverable amount.

(c) Allowance for Doubtful Accounts

Allowance for doubtful accounts is based on the results of the Company's evaluation of the collectibility of outstanding receivable balances.

(d) Inventories and Allowance for Inventory Market Decline and Obsolescence

Inventories are stated at the lower of cost or fair value on a perpetual inventory basis. Cost is determined using the weighted-average method. Fair value is determined by replacement cost or by net realizable value. A provision for inventory devaluation is recorded when the market values of inventories are less than their cost basis. Allowance for inventory obsolescence is provided for inventory items remain unsold over 6 months, net of estimated useful or salvage values.

(e) Long-Term Equity Investments

Long-term equity investments where ownership by the Company is lower than 20% or where no significant influence exists are carried at cost. For listed investee companies, an allowance for market decline is provided for when market prices are lower than cost. For non-listed investee companies, loss on investment is immediately recognized should impairment in investments be deemed other than temporary.

Long-term equity investments where the Company can exercise significant influence are accounted for under the equity method. Exchange differences from translation of foreign-denominated financial statements at year-end are reflected as translation adjustments under stockholders' equity. If the fiscal year of the investee company is different from that of the Company, equity earnings of an investee company are recognized according to equivalent ownership at year-end closing.

Unrealized profits/losses on the inter-company transactions are eliminated and deferred. Gains and losses resulted from transactions of depreciable assets are recognized ratably over their economic lives, while those from other assets are recognized immediately.

(f) Property, Plant, Equipment and Depreciation

Property, plant, and equipment are stated at cost. Major additions, improvements, and replacements are capitalized. Depreciation is applied with the straight-line method using cost less estimated salvage value and the estimated service lives of depreciable assets.

Economic lives of major property and equipment are the following:

Building	10~50	years
Machinery	1~12	years
Transportation equipment	1~ 5	years
Furniture and office facilities	1~10	years
Mold and tools	1	year
Power equipment	1~15	years
Other equipment	1~17	years
Renovation	1~10	years
Leased assets	3~ 5	years

Gains and losses on disposal of properties are reflected under non-operating income or expense.

The property, plant and equipment of the subsidiaries in the U.S.A. are stated at cost. Depreciation is applied by the straight-line method with economic lives. Assets still in use after full depreciation may continue to be depreciated over estimated remaining useful lives.

The property plant and equipment of the subsidiaries in mainland China are stated at cost. Depreciation is applied by the straight-line method with useful lives stipulated by the Government. Assets still in use after full depreciation may continue to be depreciated over estimated remaining useful lives.

(g) Intangible Assets

Land usage rights are stated at cost and amortized using the straight-line method over the contract period of 50 years.

(h) Deferred Expenses

Telephone line charges are amortized equally over 5 years. Molds and tools and software costs are amortized equally over 12 months.

(i) Warranty Reserve

An allowance is provided for products with warranty based on historical warranty service cost, and on its nature. The related liability is classified as current or non-current liabilities.

(j) Royalty

The expense is paid for products with royalty based on historical royalty charge and on its nature; the related liability is classified as non – current liabilities.

(k) Pension Plan

The Company has a pension plan covering all regular employees, and pension payment is commensurate with years of service. The Company contributes annually to the pension fund and deposits in a government designated account. The pension fund is not reflected in the Company's financial statements. The Company adopted SFAS No.18 and secured actuarial report on pension liabilities with June 30 as the measurement date. Provision for pension expense commenced on April 25, 2000, and unrecognized net transitional obligations are amortized equally over 15 years.

Certain of the Company's foreign subsidiaries have defined contribution retirement plans. These plans are funded in accordance with the regulations of their respective countries. Contributions to these plans are expensed as incurred.

(l) Commitments and Contingencies

If loss from a commitment or contingency is deemed highly likely and the amount can be reasonably estimated, then such loss is immediately recognized. Otherwise, only the nature of such loss is disclosed in notes to the financial statements.

(m) Non-Trading Financial Derivatives

According to the SFAS, hedging foreign exchange forward contracts are recorded at spot rates of the contract date and adjusted by the year-end exchange rate, with exchange gains and losses included in current earnings. Premium or discount, difference between the contract and the spot rates, is recognized ratably over the term of forward contracts. Forward contract receivables netting related payables are reflected as an asset or a liability.

(n) Revenue Recognition

Revenue is recognized when title to the product and risk and benefits of ownership are transferred to the customer; otherwise recognition is deferred until conditions are met.

(o) Classification of Capital and Operating Expenditures

Expenditures that benefit the Company in future years are capitalized, while immaterial expenditures or those with no future benefits are treated as current expense or loss.

(p) Income Tax

The Company adopted the SFAS No. 22, "Accounting for Income Taxes" to make inter- and intra-period income tax allocation. Tax effects of deductible temporary differences, unused investment tax credits, and operating loss carryforwards are treated as deferred tax assets, whereas those of taxable temporary differences are accounted for as deferred tax liabilities. A valuation allowance is provided for deferred tax assets by assessing whether it is more likely than not such assets will realize. Adjustments to prior years' earnings are reported under stockholders' equity rather than included in current earnings. Income tax expense or benefits resulting from unearned gain or loss or changes in capital surplus are reported under respective accounts in net. Adjustments to prior years' income taxes are reflected as current income taxes.

The 10% surtax on undistributed earnings is reported as current expense on the date of the annual stockholder's meeting declaring distribution of earnings.

Income tax of the Consolidated Company is based on tax laws of various countries. Income tax return is filed on an individual company basis. Consolidated income tax expense is the sum of income tax expenses of the consolidated companies.

(q) Earnings per Share (EPS)

EPS is calculated using the weighted-average shares outstanding during the year. In the event of capital increase through capitalization of retained earnings or capital surplus, EPS is retroactively adjusted by the capitalization ratio, regardless of the outstanding period in which the incremental shares are issued.

(3) Reasons for and Effects of Accounting Changes:

The Company adopted Statement of Financial Accounting Standards No.35 "Accounting for Asset Impairment" in 2005. The Company determined that no asset had an indication of impairment.

	Before Tax \$ 1,713,159 280,000 310,000 \$ 6.12	

(l) Financial Instruments

(i) Fair Value of Financial Instruments

	June 30, 2005			
Financial Assets	H	Book Value	Fair Value	
Book value equal to fair value	\$	19,894,010	19,894,010	
Long-term investments		144,002	125,047	
Total financial assets	\$	20,038,012	20,019,057	
Financial Liabilities				
Book value equal to fair value	\$	23,736,644	23,736,644	

Method and assumptions used by the Company and subsidiaries to evaluate the fair value of financial instruments are as follows:

- 1. The fair values of short-term financial instruments are determined by their face value on the balance sheet. Since such instruments will mature within the short term, the face value is a reasonable basis in establishing the fair value. The method is applicable to cash, notes and accounts receivable, other current assets, short-term borrowings, notes and accounts payable, and other current liabilities.
- 2. The book values of long-term investments accounted for under the cost or the equity method are based on audited or self-prepared financial statements of investee companies. Since there are no market quotes or reference reports for non-listed companies, fair value of these investments are determined by their net equity worth or cost.
- 3. With respect to financial instruments such as refundable deposits that are indispensable guarantee for the ongoing operations of the Company, it is impossible to estimate the time necessary to accomplish exchange of assets. Consequently, the fair market values of such financial instruments cannot be established. The book value is used as the fair market value.
- 4. Fair values of non-trading foreign-currency-denominated financial derivatives are determined by the amount the Company will pay or receive, assuming contract termination on the balance sheet date. In general, it includes unrealized gains and losses on currently unsettled contracts. There are pricing reports issued by financial institutions for most of the non-trading financial derivatives held by the Company.
- 5. The fair values of long-term debt is determined by the present value of future cash flows. Since the values derived by using floating interest rate in discounting are close to the book values, the book values are their fair market values.

(ii) Financial Instruments with Off-Balance-Sheet Credit Risk: None.

(iii) Information on Concentrations of Credit Risk:

Concentrations of credit risk exist when changes in economic, industry or geographic factors similarly affect groups of counter-parties whose aggregate credit exposure is material in relation to the Company's total credit exposure. As of June 30, 2005, the Company's contracts with credit risk concentration were as follows:

Accounts Receivable-By Region	<u>Jı</u>	June 30, 2005	
Domestic	\$	369,175	
Asia		1,353,167	
Europe		2,942,653	
Americas		6,858,281	
Total	\$	11,523,276
