## 1. HIGHLIGHTS

- The Company and MinRes continued to advance the Marillana Project in accordance with the agreed Indicative Development Proposal for the project.
- Results from the pilot plant metallurgical testwork at Marillana have confirmed that the modified process flow sheet can produce an enhanced yield of +45% whilst maintaining product quality of at least 60.5% Fe. There has been excellent consistency across three pilot plant test runs.
- Sinter testwork carried out on samples of product from the pilot plant demonstrated that Marillana Fines can substitute for other Australian fines products in a typical Chinese coastal steel mill blends whilst maintaining good physical and metallurgical properties and sinter performance.

## 2. PROJECT ACTIVITIES

### Exploration Activities

#### Marillana

Brockman Iron Pty Ltd ("Brockman Iron") and Polaris Metals Pty Ltd ("Polaris"), a wholly owned subsidiary of Mineral Resources Limited ("MinRes"), entered into a farm-in and joint venture agreement ("FJV Agreement") pursuant to which subject to the terms and conditions therein, Polaris may farm-in by satisfying the farm-in obligations and earn a 50% interest in the Marillana Project. For details of the transaction please refer to the Company's announcement dated 26 July 2018.

On the 22 April 2021, Brockman Iron and Polaris signed an Amended and Restated FJV Agreement and Deed of Amendment and Restatement (collectively the "Agreement"). Both Brockman Iron and Polaris concluded that the Farm-in Obligations under the Agreement had been satisfied and the parties formed the Joint Venture on that date. As such, Polaris now holds a 50% interest in the Marillana Project ("the Farm-in interest").

MinRes has submitted indicative Development Proposals, which include the following:

1. Development of the Marillana and Ophthalmia Projects.
2. Following the establishment of the Joint Venture, MinRes (or its Related Party) agrees to provide the Joint Venturers with funding by way of a project loan sufficient to allow the Joint Venturers to fund the forecast project capital costs for each development.
3. A build own and operate arrangement between the Joint Venturers and MinRes for certain non-processing infrastructure at Marillana.
4. A build own and operate arrangement for the crushing plant at Ophthalmia.
5. A logistics system to transport the ore from the mines to the port stockyard at Port Hedland.

6. Construction of a berth in Port Hedland (subject to the approval from the State Government of Western Australia).
7. An estimated for the project capital and operating costs, including the logistics services cost for transporting the ore from mine to ship.

#### *Initial Development Works*

The metallurgical test work programme was completed during the period and continued to support finalisation of the flow sheet and process design.

Results from three pilot plant test runs were positive and consistently demonstrated that the modified process flow sheet could provide enhanced yields of over 45% whilst maintaining product quality above 61.5% Fe. Pilot plant samples were representative of the first three years of ore supply and also the life of mine feed.

Preliminary sinter testwork on product samples has also shown that Marillana Fines can substitute for other Australian fines products in a typical Chinese coastal steel mill blend whilst maintaining good physical and metallurgical properties and sinter performance.

A passive seismic survey to assist in mapping the basement and improve accuracy of ground water modelling is scheduled for completion later in 2023, following which the groundwater model will be updated.

Modelling of the results from the close spaced RC drilling, designed to inform the optimum drill spacing for future Mineral Resource infill drilling continued during the period.

Environmental surveys and development of management plans continued during the period to update and refresh the baseline data and support development of the project. This work has included flora and fauna surveys, stygofauna surveys, waste rock and soils analysis and noise and greenhouse gas modelling. Water and greenhouse gas management plans have been prepared and continued monitoring of ecological communities, weeds and

regional hydrological baseline data was also carried out.

### **Infrastructure**

In November 2021 MinRes announced that they had entered into an agreement with Hancock Prospecting Pty Limited ("Hancock") and Roy Hill Holdings Pty Limited ("Roy Hill") in which MinRes and Hancock will jointly investigate the development of a new iron ore export facility at the port of Port Hedland's Stanley Point Berth 3 ("SP3") in South West Creek. Roy Hill will provide services to both MinRes and Hancock for development and operation of their projects, including rail haulage.

On 1 February 2022, the Government of Western Australia announced that it had granted a port capacity allocation to the MinRes – Hancock JV, at Stanley Point Berth 3 in South West Creek. MinRes has advised that based on this allocation the Marillana Project has available port capacity to meet the joint operation production requirements. The new iron ore export facility at SP3 remains subject to various approvals and agreements to develop and operate, along with a positive final investment decision by MinRes and Hancock. The MinRes – Hancock JV continues to advance the consents, approvals and engineering studies required to support the final investment decision.

Under the FJV Agreement, MinRes is to provide the infrastructure solution to transport the ore from the Marillana and Ophthalmia projects to a port stockyard at Port Hedland and loading on to ships for export. The MinRes-Hancock Joint Venture Agreement will facilitate this solution for the Marillana project.

MinRes is additionally advancing studies and pre-development work for a haul road to transport ore from Marillana to a rail loading facility on the Roy Hill railway.

### **Ophthalmia**

On 26 November 2021, Polaris earned a 50% interest in the Ophthalmia Iron Ore Project. In the period from November 2021 to March 2022, Polaris commenced a programme of works including mine planning studies, transport corridor studies, environmental surveys and approvals planning. Polaris and Brockman have subsequently agreed to reduce the programme of works at the Ophthalmia Iron Ore Project whilst MinRes finalises arrangements for the new iron export facility at SP3 and to allow the parties to prioritise development of the Marillana Project. Heritage surveys, designed to facilitate future work programmes, are planned for Q4 2023.

### **Regional development**

Drill access tracks and pads were prepared at Punda Springs in readiness for a short RC drilling programme in Q4 2023.

### **Mining Production and Development Activities**

No mining production and development activities, including expenditure has been undertaken or recognised for the quarter.

## **3. CORPORATE REVIEW**

The consolidated cash position of the Group as at 30 September 2023 was HK\$12.0 million.

### **Payments to related parties of the entity and their associates**

The payment as disclosed in section 6.1 of the Appendix 5B relates to:

Payment of HK\$1.2 million for executive directors' salary and non-executive directors' fees.
