Business Prospects

Business Prospects

- has, in a timely manner, put in place numerous precautionary measures and procured essential protective supplies to ensure the health and safety of all its employees in different regions; and it has proactively taken steps in ensuring the stable operations and compliant discharge of all projects, and preventing the secondary transmission of the virus through wastes such as waste water;
- coordinates with different parties and takes swift actions. It actively applies for permission to resume constructions of its construction projects, stores up sufficient operational materials and protective gears for its operating projects, and implements various flexible working arrangements according to the nature and duties of each job position, using its best endeavors to mitigate the adverse impact of the COVID-19 outbreak on the Group; and
- will continue closely monitoring the development of COVID-19 situation and ensure the safety of employees and stable operations of projects; it will also adjust its measures and plans for epidemic prevention and control, project operations and business development accordingly, as and when appropriate; in addition, it will make timely disclosure on any important matters. The Group will also actively carry out capacity building and training programs during the epidemic to be fully prepared for business development after the epidemic.

Business Prospects

– Industry Trends

- The environmental protection enterprises have entered into a crucial stage – a stage that they must strive to provide high-quality ecological services and products to meet the growing demand for a better living environment, and a stage that they must have the capabilities and resources to solve major ecological and environmental problems. In addition, the environmental protection enterprises have entered into a transition period with increasing pressures from receding capital flows and stricter supervision. In view thereof, the environmental protection enterprises must ride through the challenges, keep moving forward, explore directions and seize opportunities, so as to stand out in a crowd and embark a new round of development.
- Due to the economic pressure, policy changes and other factors, the water industry will experience fierce competition. On the other hand, business areas, such as industrial WWT for industrial parks, sludge treatment and disposal, water plant and pipeline integration, and the “mixed-ownership reform” of local state-owned water enterprises, are expected to continue unleashing the industry’s potential for growth.

Group 1: questions relating to financial statements

第一组：关于财务报表的问题

1. Page 231 of the annual report of the Company for FY2019 (“FY2019 Annual Report”) provides that “contract assets as at 31 December 2019 and 2018 totalling HK\$15,533,645,000 and HK\$13,151,983,000, respectively, bear interest at rates ranging from 4.90% to 7.83% and 4.90% to 7.83%, respectively, per annum.” Are these interest sums of cash that go in or out of the Group (as defined below)?

本公司二零一九财年的年度报告（“二零一九年度报告”）第 231 页记载，“于二零一九年及二零一八年十二月三十一日，合约资产分别为 15,533,645,000 港元及 13,151,983,000 港元，分别按年利率介乎 4.90%至 7.83%及 4.90%至 7.83%计息。”请问这些利率是否被计入本集团（定义见下文）进出的现金当中？

Mr. Luo Junling (“Mr. Luo”), the Executive Director and Chief Financial Officer of the Company, replied as below:

本公司执行董事兼首席财务官罗俊岭先生（“罗先生”）回复如下：

The services provided by the Company and its subsidiaries (collectively, the “Group”) for concession projects comprise construction services and operation services. In other words, the Group provides services to construct waste water treatment plants and services to operate waste water treatment plants concurrently. As such, the Group recognises the construction revenue arising from the construction of waste water treatment plants and the operation

revenue arising from the operation of waste water treatment plants. Both construction revenue and operation revenue are collected during the entire operation period. The construction takes place during the construction period, but the construction revenue is collected during the operation period. As such, the capital expenditure of the construction services shall bear interests. Such interests flow into the Group upon the collection of waste water treatment service fees and as a result, the said interests are recorded in the cash inflow and outflow of the Group.

本公司及其附属公司（统称“本集团”）就特许经营项目所提供的服务包括建造服务及运营服务。换言之，本集团既提供建造污水处理厂的服务也提供运营污水处理厂的服务。与此对应，本集团的收入包括建造污水处理厂的建造收入和运营污水处理厂的运营收入，建造收入和运营收入都是在整个运营期内回收。建造服务发生在建设期，而建造收入回收却在整个运营期，因此建造服务的资本开支需计息。这些利息是随着污水处理服务费的收取流入到本集团，因此已被计入本集团进出的现金中。

**2. How much is the gross margin of revenue from construction and how to decide it?
建造收入的毛利率是多少，如何确定建造收入毛利率？**

Mr. Luo replied as below:
罗先生回复如下：

The gross profit margin of revenue for the Group's construction services was between 21% to 24%. The said margin is based on a cost-plus concept, which is evaluated by an independent valuer and agreed by the Company's auditor. The independent valuer looks for comparable projects based on factors such as capacity, region, waste water discharge standard to determine the cost-plus ratio for each project.

本集团的建造毛利率介于21%至24%的水平。毛利率是成本加成的概念，是经独立评估师评估所得，并获本公司审计师认可。独立评估师主要基于规模、区域、出水水质等因素寻找行业中的可比项目，并最终确定每个项目的成本加成率。

3. The Group's net operating cash flow was negative for FY2019 (primarily due to net increase in contract assets). Could the Board share the details of contract assets in the cash flow statement? When does the Board foresee the operating cash flow turns positive?

本集团在二零一九财年的经营现金流净额是负数（主要由于合同资产的净增加），董事会可否分享更多有关现金流量表中合约资产的细节？董事会预计何时经营现金流将会转正？

Mr. Luo replied as below:
罗先生回复如下：

The Group's net cash flow from operating activities was negative in FY2019 primarily due to the net increase in the contract assets. The increase in contract assets was due to the cash outflow for the project construction expenditure (i.e. capital expenditure) generated from those concession projects invested and constructed by the Group with a guaranteed return (i.e. projects with a guaranteed water volume). According to IFRIC 12 under the International Financial Reporting Standards, such cash outflow is recognised as cash flow from operating activities, instead of cash flow from investing activities. As such, following the expansion of the Group's business scale and the gradual increase in the number of concession projects invested and constructed by the Group, the Group's net cash flow from operating activities was negative.

本集团二零一九财年经营活动所产生的现金流净额为负数的主要原因在于合约资产的净增加。合约资产增加是因本集团投资建设有保证收益的特许经营项目（即有保底水

量的项目)而产生的工程建设支出现金流(即资本性开支)。根据国际财务报告准则国际财务报告财务诠释委员会诠释第12号规定(“**IFRIC 12**”),这部分现金流被归集为经营活动现金流,而不是投资活动现金流。因此,随着本集团业务规模的不断扩大,投资建设的特许经营项目逐渐增多,导致经营活动所产生的现金流净额为负数。

Based on the calculations done by the Company’s management (the “**Management**”), the Group’s net cash flow from operating activities (“**Adjusted Cash Flow From Operating Activities**”) in each year would have been positive if the cash outflow for capital expenditure of the concession projects was recognised as cash flow from investing activities, pursuant to the requirements of the normal general accounting standards. In FY2019, the net Adjusted Cash Flow From Operating Activities was approximately HKD1 billion.

根据本公司管理层(“**管理层**”)的测算,若基于一般会计准则要求,将建设特许经营项目的资本性开支现金流调整为投资活动现金流,则本公司每年经营活动产生的现金流(“**调整后经营活动现金流**”)净额均为正数。在二零一九财年中,据此调整后经营现金流净额大约为10亿港元。

In view thereof, the negative net cash flow from the operating activities of the Group as stated in the cash flow statement was due to the adoption of the relevant accounting standards. However, the Adjusted Cash Flow From Operating Activities of the Group was positive and recorded steady growth every year. Following the gradual completion of construction and commencement of operation for various projects which are under construction, the operating cash inflow of the Group is expected to increase further, ensuring a sustainable development of the Group.

如上所述,现金流量表中所载的本集团经营活动净现金流为负数主要由于采用会计准则所致,但是本集团调整后经营活动现金流净额为正数,且每年保持稳定增长。随着在建项目陆续完工投运,会给本集团带来更多的经营活动现金流入,将保证本集团的可持续发展。

Based on IFRIC 12, if the Group’s cash flow from operating activities stated in the cash flow statement turns positive, it would indicate that the Group’s development growth rate shall reduce to zero, which will affect the Group’s long-term profitability. As such, the Board and the Management are seeking a balance between scale growth and stable cash flow to maximise the Shareholders’ returns.

根据IFRIC 12的规定,若要使本集团的经营活动现金流转正,则意味着本集团的业务发展增速要降为零,而这将影响到本集团的长期收益。因此,董事会和管理层会在本集团的规模增长及现金流稳定之间寻求平衡,以实现股东价值的最大化。

4. The Group’s cash flow for FY2019 was positive largely due to new bank loans (cash flow from financing activities). Is this a sustainable model for the Group?

本集团在二零一九财年的现金流为正数,但主要原因在于新增银行贷款(即融资活动的现金流)。这是本集团的可持续发展模式吗?

Mr. Luo replied as below:
罗俊岭先生回复如下:

As mentioned above, the Group’s net Adjusted Cash Flow From the Operating Activities was positive. Most of the financings obtained by the Group were used for the construction of the concession projects. The negative operating cash flow of the Group recorded pursuant to IFRIC 12 was due to the build-operate-transfer (“**BOT**”) and transfer-operate-transfer (“**TOT**”) models adopted in most of the concession projects secured by the Group. These two models are commonly used by the concession projects in the environmental water market of China. Regardless of which model to be adopted (either BOT or TOT), most projects of the

Group have the following characteristics:

如上所述，本集团的调整后经营活动现金流净额为正数。本集团大部分融资所得款项用于特许经营项目的建造。本集团根据IFRIC 12要求记录的经营活动现金流为负数的主要原因在于本集团获得的特许经营项目大多采用建设-运营-移交（“BOT”）或转让-运营-移交（“TOT”）模式，这两种模式也是中国环保水务市场上特许经营项目采用的主要模式。无论该等项目采用BOT或TOT模式，本集团大部分项目具有以下特点：

- (i) The initial stage of a concession project is the construction period (which is usually one to two years). During this stage, the Group needs to make a large amount of payment for the project construction (for a BOT project) or acquisition (for a TOT project).
特许经营项目的初期为项目建造阶段（通常为一至两年）。在此阶段，本集团需要支付大量的建设工程款项（对BOT项目而言）或项目收购款项（对TOT项目而言）。
- (ii) After the completion of construction and commencement of operation, the project will enter the operation stage (which is usually 20 to 30 years). During this stage, the Group collects service fees (primarily the waste water treatment service fees) periodically from its customer (i.e. the local government).
项目建成投运后进入运营阶段（通常为20至30年）。在此阶段，本集团向客户（即地方政府）收取服务费用（主要为污水处理服务费）。
- (iii) Through collection of payment from the customer, the Group recovers the project construction cost (for a BOT project) or acquisition cost (for a TOT project), as well as recovers the project operating cost and earns reasonable profit.
通过向客户收费，本集团收回项目建造成本（对BOT项目而言）或收购成本（对TOT项目而言），并同时收回项目的运营成本及赚取合理利润。
- (iv) Due to such business models, cash outflows are recorded during the initial construction period of the projects while cash inflows are only recorded during the operation stage. Therefore, there is a mismatch of cash inflow and cash outflow during various stages of the projects.
由于该等商业模式，各项目初始建造阶段主要为现金流出，直到建成投运后才开始产生现金流入，因此在项目所处的不同阶段存在现金流出和流入不匹配的情况。

In the past few years, the Group's financial statements showed negative operating cash flow, which was mainly due to the Company's expansion of business. The central government and various levels of local governments in China have, in recent years, rolled out a series of new measures and favorable policies on ecological conservation and environmental protection management, which have been continuously bringing new vibes to the development of environmental protection industry. The Group has seized the opportunities and actively expanded its business. It secured various BOT and TOT projects in the past few years. As such, this marked the Group's long-term business development after it completed the reverse takeover on 12 December 2014 (the “Reverse Takeover”), as evidenced by the following:
过去几年本集团在财务报表中记录的运营活动现金流为负数，这主要由于本集团处于业务扩张阶段。中国中央及各级地方政府在过去几年对生态文明建设和环境保护提出了一系列新举措及有利政策，为环保行业的发展不断注入新活力。本集团紧抓机遇、积极拓展业务，在过去几年取得众多BOT及TOT项目，使得本集团自二零一四年十二月十二日完成反向收购（“反向收购”）以来在业务上获得了长足发展，主要体现在

以下方面：

[The treatment capacity and the relevant financial figures refer to that of China Everbright Water Investments Limited (which was the environmental water business segment of China Everbright International Limited (“Everbright International”)) before the Reverse Takeover. The years below shall refer to the relevant calendar years.]*

- (i) The designed treatment capacity of the projects increased from 1,800,000 m³/day* (prior to the Reverse Takeover) to 6,200,000 m³/day (as at end of 2019), representing an increase of 2.44 times and a compound annual growth rate of approximately 28%.
项目设计处理规模从反向收购前的180万立方米/日*增加至二零一九年末的620万立方米/日，增长2.44倍，年复合增长率约为28%。
- (ii) The revenue of the Group increased from HKD1.051 billion* in 2014 to HKD5.551 billion in 2019, representing an increase of 4.28 times and a compound annual growth rate of approximately 39%.
本集团收入从二零一四年的10.51亿港元*提高至二零一九年的55.51亿港元，增长4.28倍，年复合增长率约为39%。
- (iii) The profit attributable to the equity holders of the Company increased from HKD293 million* in 2014 to HKD833 million in 2019, representing an increase of 1.85 times and a compound annual growth rate of 23%.
本公司股东应占盈利从二零一四年的2.93亿港元*提高至二零一九年的8.33亿港元，增长1.85倍，年复合增长率约为23%。
- (iv) The total assets of the Group increased from HKD10.112 billion* as at end of 2014 to HKD22.683 billion as at end of 2019, representing an increase of 1.24 times and a compound annual growth rate of approximately 18%.
本集团的总资产从二零一四年末的101.12亿港元*增加至二零一九年末的226.83亿港元，增长1.24倍，年复合增长率约为18%。
- (v) The net assets of the Group increased from HKD6.551 billion* as at end of 2014 to HKD9.549 billion as at end of 2019, representing an increase of 46% and a compound annual growth rate of approximately 8%.
本集团的净资产从二零一四年末的65.51亿港元*提高至二零一九年末的95.49亿港元，增长46%，年复合增长率约为8%。

As mentioned above, the Group’s net Adjusted Cash Flow From Operating Activities in the past few years were all positive, with a steady growth every year. Following the gradual completion of construction and commencement of operation for various projects which are under construction, the operating cash inflows are expected to increase further, ensuring a sustainable development of the Group.

如上所述，本集团的调整后经营活动现金流净额过去几年均为正数，且每年保持稳定增长。随着本集团在建项目陆续完工投运，会带来更多的经营现金流入，将保证本集团的可持续发展。

The Company expected that ecological conservation would remain the direction of the national development of China. The environmental water industry during the “14th Five-Year” period still has enormous growing space. Currently, the Group’s gearing ratio is still lower than the industry average and it will continue pursuing stable growth. In order to

balance stable business growth and healthy financial position, the Group has set a mid-term goal for its gearing ratio of not exceeding 65% (the gearing ratio of the Group was 57.9% as at the end of 2019).

本公司预计生态文明建设将仍是中国的国家发展方针，环保水务行业在“十四五”期间仍将有较大的增长空间。本集团目前的负债水平低于行业平均水平，本集团会继续追求平稳发展。为了平衡业务增长和财务健康状况，本集团定下中期负债率目标为不超过65%（二零一九年底为57.9%）。

5. Please consider providing quarterly business updates to replace the cessation of quarterly reporting so that Shareholders can get timely updates instead of waiting for half-year and full-year results.

由于本公司已停发季度业绩，请考虑提供季度业务更新。这样股东可以及时了解业务更新而不需要等到中期或全年业绩公告时。

Mr. Luo replied as below:
罗先生回复如下：

Following the amendments to the listing rules by the SGX-ST which no longer require publication of quarterly financial results (except for certain specified circumstances), to ensure the consistency of information disclosure practices in Singapore and Hong Kong markets and reduce the compliance costs, the Company decided to release its financial results on a half-yearly basis. The Company will also make timely disclosure by way of announcements or press releases whenever there is a material development of the Group's business to maintain effective communication with its vast Shareholders.

在新交所修改上市规则不再要求发布季度业绩公告（除特定情形外）后，为使本公司在新加坡和香港两地资本市场的信息披露实践保持一致并降低合规成本，本公司决定每半年发布业绩公告。为确保本公司与广大股东的有效沟通，当本集团业务有任何重大进展时也将及时以新闻稿或公告形式披露。

Group 2: questions relating to share price and dividend

第二组：关于股价和股息的问题

6. The current share price of the Company is quite “distressed” - it shows little sign of recovery although the indices have recovered more than half of the loss from the pre-COVID-19 level. In the opinion of the Board, what are the causes of the slow recovery of the Company's share price? What is the fair market value that the Company's shares should be traded at?

目前本公司的股价非常“受压”——尽管各类指数相比疫情爆发前已经恢复了一半，但本公司股价几乎无恢复迹象。请问董事会认为本公司股价恢复缓慢的原因是什么？本公司股票的公允市场价值是多少？

Mr. An Xuesong (“Mr. An”), the Executive Director and Chief Executive Officer of the Company, replied as below:

本公司的执行董事兼总裁安雪松先生（“安先生”）回复如下：

The share price of the Company continued slumping, despite of its steady business development and good financial performance in the past few years. The Management also noted that the share prices of the peer companies in the industry are not ideal either. This could be due to the concerns which the investors had over the general performance of the capital market and the industry.

本公司这几年业务发展稳健、业绩增长可观，但是股价持续低迷。管理层留意到同行业公司的股价也不理想。本公司股价下跌的主要原因可能是资本市场和本行业的总体

表现让投资者有所担忧。

The Management will continue focusing on business development of the Group. Hopefully the share price of the Company would increase with the improvement of the Company's business and financial performance. In addition, the Company will also continue paying out dividends to create long-term sustainable returns for the Shareholders.

董事会和管理层将继续聚焦于本集团的业务发展，希望本公司股价随着业务发展和业绩表现提升而有所改善。另外，本公司也会坚持派发股息，为股东创造长期可持续的价值。

7. Despite relatively good performance of the Company in the past year, the share price of the Company continues to drop over the past few years to a rather dismal level in recent days. Why the Company did not kick start the share buyback at such a low level? Does the Company have any plans for share buyback?

虽然本公司去年取得较好业绩，但股价于过去数年仍持续下跌，近日更跌至相当低的水平。在现时股价如此低的情况下，本公司为何仍未开始股份回购？本公司是否计划股份回购？

Mr. An replied as below:

安先生回复如下：

Share buyback is a good mechanism for the Company and the Shareholders when the share price of the Company is low. The Company bought back a total of 8,283,400 shares in 2016. However, the Company's current public float is as low as 27.05% (the controlling shareholder Everbright International holds around 72.87% of the Company's shares and the directors of the Company hold around 0.08%). The HK Listing Rules require a listed company to maintain a public float of not less than 25%. As such and in view of the liquidity, there is very limited room for the Company to implement share buybacks.

对于本公司及股东而言，在股价低迷时进行股份回购是个很好的操作。本公司曾于二零一六年间回购股份8,283,400股。然而，目前本公司的流通股比例仅为27.05%（控股股东光大国际持股约72.87%，本公司董事持股约0.08%）。由于香港上市规则要求上市公司至少维持25%的流通股比例，同时考虑到股份流动性，本公司目前进行股份回购的空间有限。

In order to increase the Shareholders' returns, the Company has been declaring dividends after the Reverse Takeover.

为增加股东的回报，本公司在反向收购完成后一直坚持派发股息。

8. For FY2019 final dividend, is scrip dividend an option or the Shareholders have both the choices of cash dividend and scrip dividend? Given the current low valuation of the Company's share price, the Shareholders hope that the Company does not offer the scrip dividend option as this is highly dilutive for the Shareholders' holdings.

对于二零一九财年的末期股息而言，股票股息是否为选项之一，或是股东们同时拥有选择现金股息和股票股息的权利？考虑到本公司现有股价很低，股东们希望本公司不要提供股票股息的选项，因为以股代息会对股东现有持股比例造成稀释。

Mr. An replied as below:

安先生回复如下：

Regardless whether it is a cash dividend or scrip dividend, dividend distributions are the rewards given by the Company to the Shareholders. In the past, the Company allowed the Shareholders to elect to receive cash dividend or scrip dividend. In relation to the FY2019

final dividend, considering that most of the minority Shareholders preferred cash dividends and the prevailing share price of the Company is low, the Board is of the view that distribution of cash dividends (without the scrip dividend choice) is more beneficial to the Company and the Shareholders as a whole. As such, the FY2019 final dividend would be distributed in cash form only.

无论是否提供以股代息的选项，派发股息都是本公司给予股东的回馈。本公司在过往派发股息时均会给予股东选择权，由其决定接收现金股息或股票股息。对于二零一九财年的末期股息，考虑到过往大多数小股东偏好现金股息以及本公司现行股价低迷，董事会认为派发现金股息（而不再提供以股代息的选项）更符合本公司和全体股东的利益。因此，二零一九财年末期股息将仅以现金形式发放。

In addition, as the Company achieved its dual listing status in Singapore and Hong Kong in May 2019, the implementation of scrip dividend scheme became more complex involving various announcements and election documents. Therefore, it increased the relevant management costs and extended the dividend distribution timeline. Meanwhile, the Company has a low public float, and thus, distribution of cash dividends would be more beneficial to the liquidity of the Company's shares.

另外，本公司在二零一九年五月实现了新加坡和香港两地上市，这使得股代息计划的实施相对复杂，涉及各类披露公告和选择文件，一定程度上增加了管理成本且使派息时间表更长。同时，由于本公司的流通股比例相对较低，派发现金股息对于本公司股份的流动性而言更具有优势。

In view thereof, the Company is more inclined to distribute cash dividends recently. Having said that, the Company decided to keep the existing scrip dividend scheme, as the cost to set up a new scheme would be higher after terminating the existing one. As for whether the Company will apply the scrip dividend scheme in the future, it will depend on various factors, such as: the Company's then shareholding structure and prevailing share price. Moving forward, the Board will decide whether the scrip dividend scheme applies to a particular dividend distribution based on the interest of the Company and the Shareholders as a whole.

鉴于上述原因，本公司在近期将倾向于派发现金股息。尽管如此，本公司决定保留现有的以股代息计划，这主要是考虑到计划失效后重新设立的成本更高，而未来本公司是否需要适用这一计划将取决于届时本公司的股权结构、股价等综合因素。董事会届时将从本公司和全体股东的利益出发，确定特定股息是否适用以股代息计划。

Group 3: questions relating to macro-environment and prospects

第三组：关于宏观环境和未来展望的问题

- 9. The Shareholders understand that most of the Group's projects are for governments, thus, the Shareholders are concerned on the Group's bargaining power with local governments and the Group's profit margin. Could the Board explain and/or assure the Shareholders that it is not an issue?**

股东们理解本集团的大多数项目是为政府进行，因此，股东对本集团在与地方政府谈判时的议价能力以及本集团的利润率感到担忧。董事可否提供解释并向股东确保这对本集团而言不是问题？

Mr. An replied as below:

安先生回复如下：

The Group's majority revenue was the waste water treatment services fees received from various local governments in relation to provision of the municipal and industrial waste water treatment services.

本集团的大部分收入来源于提供市政污水和工业废水处理服务而从各地方政府收取的

污水处理服务费。

The bargaining power of the Company mainly depends on its overall strengths and business performance. Better solutions and services will enhance the Company's bargaining power. The bargaining power can be mainly demonstrated in two areas, namely the determination of the internal rate of returns ("IRR") of projects during the negotiation stage and the adjustment of waste water treatment service fees during the operation stage.

本公司的议价能力主要取决于其综合优势和业务表现。更好的方案和更优的服务能够提升本公司的议价能力。议价能力主要体现在两方面：项目谈判阶段项目内部收益率（“IRR”）的确定以及项目运营阶段污水处理服务费的调整。

With the growth in the Company's teams and business, the Company's bargaining power with the governments has improved - IRR of the greenfield projects gradually increased from 8% to 10% while the upgrading and expansion projects of the existing water plants have even higher IRR.

凭借近年来的团队成长和业务发展，本公司与政府的议价能力有所提升：绿地项目的 IRR 从 8% 逐渐提高到 10%，而现有水厂提标或扩建项目的 IRR 更高。

In relation to the adjustment of waste water treatment service fees, the concession agreements, which the Group entered into with the relevant local governments, stipulate the mechanisms to adjust waste water treatment service fees based on factors such as increase in labor costs, increase in pharmaceutical costs and change of energy costs. Once the fee adjustment mechanism is triggered, the Group will carry out tariff hike adjustment procedures with the relevant government. In FY2019, the Group had a total of 10 waste water treatment projects which received approval for tariff hikes, ranging from 4% to 61%.

关于污水处理服务费的调整，本集团在与各级政府签署的特许经营协议中均约定了水价调整机制，调整因素包括人工成本上升、药剂成本增加、能耗变动等。一旦触发水价调整机制，本集团将与各级政府开展水费调价工作。二零一九财年，本集团旗下十个污水处理项目获批执行上调水价，幅度介于 4% 至 61%。

10. How have the Company's operations been affected by the novel coronavirus epidemic ("COVID-19") and the U.S.-China trade war and what steps are taken by the Company to mitigate such impacts?

新型冠状病毒疫情（“新冠疫情”）及中美贸易战对本公司的影响如何？本公司采取了哪些措施来缓解相关影响？

Mr. An replied as below:

安先生回复如下：

U.S.-China trade war does not have any impact on the Group.

中美贸易战对本集团无任何影响。

Since the COVID-19 outbreak in January 2020, the Group's business has been affected to certain extent, mainly in terms of project constructions and operations.

自二零二零年一月新冠疫情爆发以来，本集团的经营受到一定影响，主要体现在工程建设和项目运营两方面。

In relation to project constructions, due to the various policies implemented by the local governments in February 2020 regarding postponement of work resumption and temporary travel restrictions, certain construction projects of the Group were unable to commence construction or resume works as originally scheduled after the lunar new year. Therefore, there was a slight delay for the construction projects in short term. However, following the

effective containment of the epidemic in China, various areas in China have gradually resumed work. As at mid-April 2020, all the Group's construction projects resumed constructions. The Group has adjusted the construction plan for each construction project with an aim to minimise the delay caused by the epidemic at the beginning of the year.

工程建设方面，由于中国各地政府于二零二零年二月陆续出台延期复工返工及短期交通管制等相关政策，本集团部分建设工程项目无法于春节后如期开工或复工，工程进度在短期内有所推迟。随着新冠疫情在中国得到有效控制，中国各地陆续复工。于二零二零年四月中旬，本集团旗下工程建设项目已全部复工。本集团已重新调整各建设工程项目的施工计划，力求将工程进度在年初所受的疫情影响降到最低。

In relation to project operations, some industrial waste water treatment projects of the Group experienced a reduction in water treatment volume during the epidemic period. This was due to postponement of operation of the upstream enterprises which the Company provided services to. However, it has now returned to normal. For the municipal waste water treatment projects, the water volume was not affected. In relation to the collection of service fees, due to the epidemic, the payments by certain local governments were slightly delayed as compared with the previous years. However, the project companies are actively communicating with the local governments to ensure the collection of receivables.

运营方面，本集团的个别工业废水处理项目因所服务的上游企业推迟运营而导致水处理量在疫情期间有所减少，目前均已恢复正常；市政污水处理项目的水量基本未受到疫情影响。关于污水处理费的回款，个别地方政府与过往年度相比存在一定的延迟支付情况，项目公司管理层均积极与地方政府沟通协调，确保应收账款的回款。

In summary, COVID-19 has certain impact on the project constructions and operations of the Group. However, the overall impact is controllable, as the Group has actively taken various precautions measures to reduce the impact of epidemic.

综上所述，新冠疫情对本集团的工程建设及运营管理产生了一定程度的不利影响，但本集团已积极采取各项措施，因此疫情对本集团的影响总体可控。

11. Does the lower interest rate environment now offer better financing options for the Company? As mentioned in the FY2019 Annual Report, many of the Group's bank borrowings are subject to the fulfilment of covenants relating to the Group's certain financial ratios. Can the Company disclose the conditions drawn out for these financial ratios?

目前的低息环境是否为本公司提供了更好的融资选项？如二零一九年度报告中提及，本集团的银行贷款很多都要求本集团满足一定的财务比率，本公司是否可以披露这些财务比率的相关要求？

Mr. Luo replied as below:

罗先生回复如下：

The current interest rate was obviously lower than that in 2019, being it in the capital market in mainland China or the offshore United State dollars or Hong Kong dollars. This has brought a good opportunity to the Company in terms of financing management. It is noted that the Company's overall financing costs have reduced since April 2020 and expected that the benefits of the lower financing rates to the Group would become apparent in the second half of 2020.

无论是中国境内资本市场还是境外美元或港元市场，目前的利率水平相较二零一九年均有明显下降趋势，这的确为本集团的融资管理提供了较好机会。从二零二零年四月以来，本集团的综合融资成本明显下降，预计资金成本下降对本集团的利好影响在二零二零年下半年集中表现出来。

Currently, the London Inter-bank Offered Rate (“**LIBOR**”) and the Hong Kong Inter-bank Offered Rate (“**HIBOR**”) dropped significantly. However, the projects of the Group are all located in mainland China, and the Group’s businesses are settled in RMB. Hence, the Management would consider the foreign exchange risks when taking loans denominated in foreign currencies. As at end of 2019, the foreign-currency loans of the Group were mainly denominated in United States dollars and Hong Kong dollars and such borrowings compose approximately 41% of the total borrowings of the Group. The Company would closely monitor the changes in the foreign exchanges and would adjust the proportion of foreign currency-denominated borrowings or adopt hedging measures when appropriate.

目前伦敦同业拆借利率 (“**LIBOR**”) 及香港同业拆借利率 (“**HIBOR**”) 利率相比之前大幅下降。但本集团的主要业务处于中国境内，业务主要采用人民币结算，因此管理层在进行外币融资时会考虑外币汇兑风险。截至二零一九年末，本集团的外币贷款主要为美元贷款及港元贷款，在本集团全部贷款中合计占比约为 41%。本公司会密切关注汇率变化，将适时调整外币贷款占比或采取外汇对冲措施。

Apart from bank loans, the Group is also exploring other financing channels, such as: medium-term notes (“**MTNs**”), RMB-denominated corporate bonds (“**Corporate Bonds**”) and asset-backed securities (“**ABS**”).

除了银行贷款，本集团也积极探索其它融资方案，比如：中期票据、人民币计价公司债券 (“**公司债券**”)、资产支持证券等。

The Management has been closely monitoring the changes in the capital market, and is prepared to seize the opportunity to issue the Corporate Bonds or MTNs during the good window period. For example, the Company issued the third tranche of Corporate Bonds with a coupon rate of 3.89% in January 2019.

管理层一直高度关注资本市场的变化并做好充分准备，并在良好的利率窗口期发行公司债券或者中期票据，例如：本公司在二零一九年一月发行了第三期公司债券，票面利率为 3.89%。

In 2020, the Company’s financing management objectives are to control financing costs, adjust financing structure, ensure sufficient capital liquidity and lay a solid foundation for the Company’s long-term development.

二零二零年，本公司的融资管理目标是控制融资成本、调整融资结构，保证充足的流动性，为本公司长远发展奠定坚实基础。

The financial covenants in the loan agreements of the Group mainly include the following financial ratios or figures: gearing ratio, net gearing ratio, current ratio, EBITDA*-to-interest expenses coverage ratio, equity attributable to the shareholders of the Company and net tangible assets.

本集团银行贷款协议中涉及的财务制约条款主要包括以下财务比率或数据：资产负债率、净负债比率、流动比率、EBITDA*利息保障倍数、股东应占权益总额、有形净资产总额等。

The Management has been closely monitoring each financial ratio or figure of the Group to ensure the compliance with the relevant financial covenants. Currently, the Group’s gearing ratio is reasonable, its financial position is healthy, and it is not in breach of any loan agreement.

管理层一直持续监控本集团的各项财务比率或数据，确保符合财务制约条款的要求。本集团目前的负债比例合理，财务状况健康，不存在贷款协议的违约情形。

[*EBITDA refers to earnings before interest, taxes, depreciation and amortisation.]

[*EBITDA 指除利息、税项、折旧及摊销前盈利。]

12. It was noted that one of the Company's industry peers listed on SGX-ST has been privatized. Does the Board foresee any privatization bid for the Company?

本公司在新交所上市的其中一个同行者已经私有化。董事会是否预计本公司将收到任何私有化要约？

Mr. An replied as below:

安先生回复如下：

The Company currently does not have any privatisation plan.

本公司目前没有私有化计划。

The Company issued Corporate Bonds in three tranches from 2017, completed the listing on the Main Board of SEHK in May 2019, and recently received approvals from regulators in mainland China on the applications to issue MTN and ABS. The Company has been exploring various financing options and expanding its financial channels to lay a solid foundation for its long-term development. The Board believes that diverse financing channels would reduce the Company's financing costs, enhance the Shareholders' returns and increase the Company's financing flexibility, to explore on the optimal capital structure between equity financings and debt financings.

本公司从二零一七年起分三期发行了公司债券，二零一九年五月完成于联交所主板上市，最近中国境内监管机构批准了关于 MTN 及 ABS 的发行申请。本公司一直不断探索各种融资方式，扩大融资渠道，为本公司长远发展奠定坚实的基础。董事会相信多元融资渠道能够降低本公司融资成本并增加股东回报，亦能增加本公司融资的灵活性，在股权融资及债务融资之间寻求最优化的资本结构。

In addition to the considerations of financing costs and capital structure, listing on the SGX-ST and SEHK also helps the Company's business promotion and business development. Through these two stock exchanges, the Company discloses information on corporate governance, sustainable development, operations and financial performance in a public and transparent manner to its various stakeholder groups (such as: governments, suppliers, communities, employees, creditors, Shareholders and the other business partners). As an environmental protection enterprise, it not only demonstrates the Company's social responsibility commitments but also enhances various stakeholders' confidence over the Company's sustainable development.

除了融资成本及资本结构的考虑，于新交所及联交所上市具有协助业务推广及拓展的意义。本公司透过两个交易所向不同的持份者（如政府、供应商、社区、员工、债权人、股东及其他合作方等）将企业治理、可持续发展、运营及财务表现公开透明地发布。作为一家环保企业，这既体现了本公司的社会责任担当，也增强了各持份者对本公司可持续发展的信心。

Furthermore, through publication of various information, the Company's business and management are overseen by various stakeholders. This will also help the Company continuously improve its corporate governance and business management.

另外，通过公开发布公司的各项信息，本公司的业务及管理受到各持份者的监督，这亦推动本公司的企业管治及业务管理不断进步。

13. Which are the main competitors of the Company? What is the current market share of China's water treatment industry that the Company holds? Moving forward, how does the Company plan on expanding its market share and gaining edges over the other players in the industry? What are the drivers of the Company's growth over the next 3 years?

本公司主要的竞争者有哪些？本公司目前在中国污水处理行业的市场占有率是多少？本公司将来打算如何增加市场占有率并在众多同行业竞争者中脱颖而出？本公司未来三年的增长驱动力是什么？

Mr. An replied as below:
安先生回复如下：

The main competitors of the Company comprised central state-owned enterprises, local state-owned enterprises and private-owned enterprises in China, as well as a small number of foreign-owned enterprises. The Company has been promoting collaboration and co-operation with its competitors to maintain fair competitions with peer companies. The water market of China (both the waste water treatment and the water supply business) are highly fragmented. The Company's business is primarily in the municipal waste water treatment market. The Company's market share was around 1.9% to 2% in the municipal waste water industry in China as at end of 2018. However, the Board was of the view that market share was not necessarily related to a company's performance. A company's performance was mainly determined by the IRR of projects – the higher the IRR is, the more returns are generated for the Company and the Shareholders.

本公司的主要竞争对手包括中国的中央国企、地方国企、私营企业以及少量外资水务公司。本公司一直提倡“竞合有度”，和同业公司保持竞争有序、合作有度的关系。中国的水务市场（无论是污水处理市场还是供水市场）都是高度分散的。目前公司业务主要集中于市政污水处理业务。截至二零一八年末，本公司在中国市政污水处理市场的占有率为 1.9% 至 2%。但是，董事会认为市场占有率和公司表现并无必然关系，公司表现主要是取决于项目的内部收益率，即：较高的项目收益率可为本公司及股东带来较好的回报。

In the future, leveraging on its position in the traditional municipal waste water treatment market, the Company will proactively expand its business in other areas, such as: raw water protection, rural water supply, industrial waste water treatment, sludge treatment and disposal and river-basin ecological restoration etc.

在立足传统市政污水处理市场的基础上，本公司未来将积极在原水保护、城市供水、工业废水处理、污泥处理处置以及流域治理等领域加大市场拓展力度。

The key drivers of the Company's growth over the next three years are as follows:
本公司未来三年的增长驱动力主要如下：

- (i) “Technological Innovation-Driven Development”. In the recent years, the Company has boosted its efforts in improving the technological research and development (“R&D”) capabilities. The Company has a technical team of nearly 100 staff, focusing on the development of the new water technology and asset-light business such as design and technology process. In addition, the Group has focused on improving the existing operating projects in terms of digitalisation, information and automation, to increase the efficiency of the operations management and reduce the consumption of energy, pharmaceutical items and manpower and thereby to increase the returns on the asset-heavy business. In short, the Company aims to increase the returns on the asset-heavy business through the development of asset-light business.

1. The long-term borrowings have gone up. Could the Company share with the Shareholders the justification of higher long-term borrowings (e.g. for research and development or project financing, etc)?

本公司长期贷款在二零一九年增加，可以解释增加的原因吗（例如用于研发或者项目融资等）？

Mr. Luo replied as below:
罗先生回复如下：

The Group's long-term borrowings increased from HKD5,440,376,000 as at end of 2018 to HKD7,069,140,000 as at end of 2019; and the proportion of the balance of long-term borrowings against the balance of the total borrowings of the Group increased from 72% as at end of 2018 to 78% as at end of 2019.

本集团的长期贷款从二零一八年末的 5,440,276,000 港元增加至二零一九年末的 7,069,140,000 港元；本集团的长期贷款余额占总贷款余额的比例从二零一八年末的 72% 增加至二零一九年末的 78%。

These were mainly due to the followings:
主要原因如下：

- (i) the number of new projects increased in FY2019, and majority of the long-term borrowings were used to finance the construction of projects;
二零一九财年的新项目数量有所增加，大部分的长期贷款用于项目工程建设；
- (ii) in order to better manage and control the financing costs, the Group replaced some short-term borrowings with long-term ones to adjust its capital structure.
为了更有效地管理及控制融资成本，本集团以长期贷款置换了部分短期贷款，以此调整了资本结构。

2. It is heartening to share that the Company is taking great care of the employees post COVID-19. Is the Company experiencing any material impact due to COVID-19? For example, does the project cost go up due to supply constraints? Does this squeeze the profit margins of the awarded projects?

本公司在新冠疫情期间对员工给予关怀，这令人感到欣慰。新冠疫情对本公司有哪些重大影响？例如，由于供应链问题导致的项目成本上升等？这是否会影响本公司的利润率？

Mr. An replied as below:
安先生回复如下：

As explained earlier, the COVID-19 has certain impact on the Group, particularly on the project construction. During the early stage of COVID-19 epidemic, there were slight delays to the constructions of certain projects in the short term as the workers were unable to return to work due to the travel restrictions imposed by the various local governments. However, all the Group's construction projects resumed constructions by mid-April 2020. As such, the overall

impact of COVID-19 on the Group was controllable.

如早前所述，新冠疫情对本集团有一定程度的不利影响，主要体现在工程建设方面。在新冠疫情爆发早期，中国各地政府为防控疫情纷纷推出了延迟复工、交通管制等措施，导致部分劳务人员无法于春节后及时返回工地复工，使得本集团部分项目的建设进度在短期内有所推迟。但是，本集团的所有工程建设项目已于 2020 年 4 月中旬全部恢复正常。因此，新冠疫情对本集团的影响总体可控。

In relation to the supply chain, costs of some raw materials increased for short term due to the travel restrictions imposed by the local governments, but all have returned to normal. In addition, the prices of certain other raw materials have dropped during the epidemic period, e.g., steel. As such, fluctuation of part of the supply chain did not have any major impact on the Group's overall long-term profit.

至于供应链，各地政府推出的交通管制措施导致一些原料的成本在短期内上升，但现在均已恢复正常。另外，也有一些原材料的价格在疫情时期有所下跌，比如：钢铁。综合而言，供应链的部分波动对本公司整体的长期盈利没有任何重大影响。

本公司短期及中期的最大威胁有哪些？

Mr. An replied as below:

安先生回复如下：

The Company's short-term threats include the situation of COVID-19. It may affect the progress of the Group's construction projects should there be a second COVID-19 wave in China.

本公司的短期威胁包括新冠疫情。如果中国发生新一波新冠疫情扩散，将影响本集团的工程建设。

The Company's long-term threats were as follows:

本公司的长期威胁如下：

- (i) Human resources: Talents are the key resources for corporate development. As such, the Company places a lot emphasis on the human resource management to retain and attract its talents, such as improvement of working environment, provision of competitive remuneration packages.

人力资源：人才是企业发展的关键资源。因此，本公司非常注重人力资源管理（如改善工作环境、提供有竞争力的薪酬配套等）以吸引和保留人才。

- (ii) Technology: The technological R&D and the application of technological research are paramount in determining the performance of the water enterprises. Therefore, the Company emphasized on the importance of technological R&D and boosted its efforts on technological R&D. The Group will strive to achieve breakthrough in technological R&D and outperform its peer companies.

技术：技术研发和技术成果应用对水务企业的表现十分关键。因此，本公司非常注重技术研发，也增加了技术研发方面的投入力度，将力争实现技术研发的突破并超越同行。

- (iii) Cost control: As the service fees in the water industry are strictly regulated by the government, cost management is important in increasing the profitability. As such, the Company has implemented various procedures and policies to control and manage its costs. The Company has also reduced operation management costs because of the technological breakthroughs.

4. What is the reason that the Company cancelled the proposed issuance of first tranche of the MTNs? Is there any other cheaper option of debt issuances/ borrowings or the Company does not require the funding at this moment?

本公司取消了中期票据第一期的建议发行，具体的原因是什么？本公司是预期有更加便宜的融资方式，还是因为不需要资金？

Mr. Luo replied as below:
罗先生回复如下：

The Company originally proposed to issue the first tranche of MTNs (“**First Tranche MTNs**”) in June 2020 with a principal amount of RMB1.2 billion and a maturity period of 5 years. The Company undertook the book-building process on 8 and 9 June 2020 accordingly. However, the bond market in China recently experienced fluctuations and the investors were in the wait-and-see mood. Thus, the interest rate for the First Tranche MTNs based on the book-building process was not very favourable. In view thereof, the Company decided to cancel the proposed issuance of the First Tranche MTNs.

本公司原计划于二零二零年六月发行本金为人民币 1,200,000,000 元、期限为五年的第一期中期票据，本公司据此在二零二零年六月八日至九日期间进行了簿记建档。但是，由于中国债券市场近期的波动较大、投资者持有观望情绪，通过簿记建档取得的该建议发行第一期中期票据的利率不具有优势。因此，本公司决定取消发行该建议第一期中期票据。

As the Group has sufficient capital, the cancellation of the proposed issuance of the First Tranche MTNs does not have any significant impact on the Group. The Company will continue monitoring the market and look for a better window period for the said issuance.

本集团目前拥有充足资金，取消发行该建议第一期中期票据对本集团无任何重大影响。本公司会继续监控市场情况，将选择适当的窗口期发行中期票据。
