

## **Two Employees of Yaomeng Power Awarded “Outstanding Young Science and Technology Expert of Pingdingshan City”.**

On 6 August, Li Chaofeng and Lining, both employees of Yaomeng Power Company, were praised by the Twelfth Science and Technology Award of Pingdingshan City and awarded the title of “Outstanding Young Science and Technology Expert of Pingdingshan City” at the work summary meeting of the science association system of Pingdingshan City for the first half of 2020

Li Chaofeng has successively won the individual fourth prize and group third prize in the examination competition of centralized control operation duty officers of 600MW thermal power units of China Power Investment, the second prize of Henan quality management team and the individual third prize in the employee technology activities committee of Pingdingshan City, and his essay titled Economical Research on Coupled Operation of Low Temperature Economizer and Primary Air Cooler for 600MW Units was awarded the first prize at the annual benchmarking meeting of China coal-fired power summit forum and energy efficiency level of thermal power units.

Li Ning has successively won several times of the first prize of Henan quality management team. He led the completion of material projects of DCS system renovation for circulating water system of Yaomeng No. 3 and No. 4 units. Without participation of DCS factories, the design, construction and commissioning were completely self-conducted, saving approximately RMB5 million of renovation cost for the Company.

The Company was awarded the honorary title of the outstanding unit of enterprise and university science association work of Pingdingshan City for three consecutive years and one of its employee was awarded the title of the outstanding worker.
