

Pu'an Power - Ranking First in Generation Indicator in Guizhou Province in March

It is reported recently from Guizhou's Conference on Power Operation and Dispatch that Pu'an Power Company ranked first in generation indicator in Guizhou Province in March 2021. As of March 14, 2021, the Company had generated 79% more electricity in 2021 than in the same period in 2020. The Company has won an order of more than 6,000 GWh power generation for 2021.

In March 2021, Pu'an Power Marketing Center completed a bilaterally-negotiated power transaction of about 100 GWh, helped power users to complete online registration for the power trading platform, and negotiated with other related market players in the region and obtained an order of 150 GWh power generation.
