

Wuhu Power Company - 100 GWh Generation in First Quarter

Recently, Wuhu Power Company won an order of 50 GWh power generation for March 2021. So far, the Company has won a total power transaction of 100 GWh in the first quarter of 2021, and has completed 68.5% of the annual planned power generation.

In the next step, the Company will keep an eye on the implementation of various basic power incentive policies and actively participate in monthly direct power trading and pumped storage electricity transactions to strive for more power generation.
