

## **Wuling Power Generation Company and Mishan City Sign Cooperation Agreement on New Energy Demonstration Base**

Recently, Wuling Power Generation Company signed a framework cooperation agreement on new energy demonstration base project with Mishan City of Heilongjiang Province.

According to the agreement, Wuling Power Generation Company will give full play to its advantages in developing green energy over the years to build a new energy demonstration base project, including 1,300 MW wind power projects, solar tree manufacturing base, power source and incremental distribution network project in Mishan Development Zone, clean energy transmission and energy storage, hydrogen energy production, etc. in Mishan City. After the project is completed and put into operation, the annual power generation will reach 3,840 GWh, saving about 1.25 million tons of standard coal, reducing CO<sub>2</sub> emissions by 3.03 million tons, SO<sub>2</sub> emissions by 22,000 tons and NO<sub>x</sub> emissions by 33,000 tons, and bringing new green development momentum to the city.
