

Grand Central Plaza Rooftop PV Power Project Commences in Hong Kong

On October 26, 2021, the Grand Central Plaza Rooftop PV Power Project, the second clean energy project jointly developed by CPID and Towngas, was commenced in Hong Kong.

The project has a design capacity of 150 kW and is scheduled to complete its installation in late November 2021.

The joint venture between CPID and Towngas focuses on the development of clean energy in the Greater Bay Area and is currently developing several distributed rooftop PV projects in Hong Kong. The first project, Gemstar Tower Rooftop PV Power Project, was commenced on July 26, 2021. Other three new projects are also in progress.
