

## **Guangxi Power Generation Company Wins 1.55 GW Market-Oriented Grid-Connected Projects**

Recently, the Energy Bureau of Guangxi Zhuang Autonomous Region issued a construction plan for onshore wind power, PV power and hybrid energy projects in 2021, announcing 51 projects with a total installed capacity of 11.99 GW in the market-oriented grid-connected project construction plan in 2021, and Guangxi Power Generation Company was awarded 1.55 GW.

Facing the fierce market competition, the leaders of Guangxi Power Generation Company hosted several special meetings to work out countermeasures, laying a solid foundation for winning the projects. The winning of the projects will accelerate the clean energy development of Guangxi Power Generation Company and CPID, and boost the company's strategic transition.
