

China Power Changxing signs strategic cooperation agreement with Jiebang Village, Shanghai

On December 1, 2021, China Power Changxing, a subsidiary of CPID, held a signing ceremony with the village committee of Jiebang Village, Zhoupu Town, Pudong New Area, Shanghai. Representatives of both sides signed the rural revitalization strategic cooperation framework agreement, jointly turning to the new path of rural revitalization. Mr. Shi Guojian, General Manager of China Power Changxing, and Mr. Li Jiandong, member of CPC Zhoupu Town Committee, attended the signing ceremony.

The signing of this agreement marked a great success of CPID in entering the Shanghai market of rural revitalization. Jiebang Village project is CPID's first rural revitalization project in Shanghai and second rural revitalization project after Jiangxiang Village project. China Power Changxing would figure out a rural revitalization plan that suits the local conditions of Jiebang Village, and make the best use of the influence of Disney Resort to construct an integrated smart energy system and demonstration project in Jiebang Village, so as to help build Jiebang Village into a charming village and promote the transition of CPID to clean and low-carbon energy.
