

Gao Ping meets with Wen Jianbo, General Manager of CSSC Haizhuang Wind Power.

On December 2, 2021, Mr. Gao Ping, Executive Director and President of CPID, met with the delegation led by Mr. Wen Jianbo, General Manager of CSSC Haizhuang Wind Power.

Mr. Gao first expressed his welcome to Wen Jianbo and his delegation, then briefly introduced the achievements made by SPIC and CPID in new energy in the recent years and the advantages of CPID, and elaborated the new development strategy of CPID on new energy, integrated smart energy, hydrogen energy, energy storage, green electric traffic, geothermal energy and rural revitalization with the guidance of the "3060" target. Mr. Gao added that, CSSC Haizhuang Wind Power had made outstanding achievements in wind power equipment. He hoped that the two sides would empower each other, complement each other, and establish a long-term and stable partnership, to boost the steady growth of both sides.

Mr. Wen briefly introduced the development history of CSSC and CSSC Haizhuang Wind Power, and introduced in detail the achievements and track records of CSSC Haizhuang Wind Power in wind power equipment manufacturing, operation and maintenance and integration of new energy systems. He also expressed that CSSC Haizhuang Wind Power was willing to expand its cooperation with CPID to achieve win-win results.

At the meeting, the two sides made discussions over the development trend of offshore wind power, innovative cooperation modes and cooperation contents in clean energy development, and reached a consensus on further cooperation.
