

CPID signs a strategic cooperation agreement with China Machinery Engineering Corporation

On December 8, 2021, Mr. Zhao Yonggang, Vice President of CPID, and his delegation visited China Machinery Engineering Corporation (CMEC) at its Beijing headquarters.

Mr. Fang Yanshui, General Manager of CMEC, expressed his welcome to Mr. Zhao Yonggang and his delegation, and introduced in detail the development history, track records, industrial structure, new energy mix and patented technologies of CMEC. He hoped to establish a long-term and stable partnership with CPID starting from the signing of this strategic cooperation agreement, to carry out comprehensive and in-depth cooperation with CPID in various fields.

Mr. Zhao first highly recognized the comprehensive strength of CMEC, and then introduced the new energy development strategy and new industries such as green electric traffic, hydrogen energy, energy storage power station, PV+N, etc. of CPID. He said that the cooperation between the two sides had a good foundation and huge potential. He hoped that the two sides would complete each other's advantages and expand their cooperation to achieve win-win results and common development.

After the meeting, the two sides signed a strategic cooperation agreement.
