

China Power Guorui Communicates with China Coal Market Network

On May 11, 2022, Mr. Tai Feng, Chairman of China Power Guorui, and his delegation paid a visit to China Coal Market Network for communication and discussion. Mr. Feng Yu, Vice Chairman of China Coal Transportation and Marketing Association and President of China Coal Market Network, Mr. Gong Dayong, Deputy President of China Coal Market Network, and the relevant senior experts in the industry attended the meeting.

Mr. Tai briefly introduced the installation layout and new energy development of SPIC and CPID. Mr. Tai pointed out that under the current background of ensuring energy security, thermal power would still play a central force, and both sides had great potential for cooperation in digital information, coal trading and new energy development, and hoped that both sides could give full play to their respective advantages and further broaden the depth of cooperation.

Mr. Feng welcomed the visit of Mr. Tai and his delegation, introduced the main business of the company and the digital business intelligence eco-service system in the coal industry, and said that China Coal Market Network and SPIC had been cooperating well and achieving great results for many years, and in the future, China Coal Market Network would create more value for its partners by relying on big data and resource

endowment.

Relevant personnel from CPID's Marketing and Fuel Management Center attended the meeting.
