

# **Mr. He Xi Attends 2023 ZGC Forum on New Type of Energy Storage and Hydrogen Energy Industry Development**

On May 26, 2023, Mr. He Xi, Chairman of CPID and Chief Engineer (New Energy) of SPIC, attended the 2023 ZGC Forum on New Type of Energy Storage and Hydrogen Energy Industry Development & Investment in Fangshan - Global Investment Promotion Conference, and spoke as a representative of the contracted enterprises.

Based on the new energy industry resources in Fangshan District, the event attracted and gathered high-quality resources and leading enterprises in the new type of energy storage and hydrogen energy industry, building a new energy industry chain ecosystem and leading China's new energy technology innovation and industry upgrade, and is of great significance to promote the green energy transition in Beijing, the capital of China, guarantee energy security and promote high-quality energy development.

Mr. He delivered a speech as a representative of the contracted enterprises invited to the conference. Mr. He pointed out that Beijing is the source of China's energy storage technology innovation and application innovation, and Fangshan District is Beijing's main demonstration base of new type of energy storage and is attracting and promoting more and more high-end industrial elements to gather and develop here. Mr. He said that as a long-term, stable and important strategic partner of Fangshan District, CPID has been promoting new industries to take root in Fangshan District by building a professional platform for new type of energy storage, promoting an intrinsically safe platform for energy storage and developing a platform for clean energy industry. Mr. He expressed that in the future, CPID would cooperate with all circles to build an industry cluster for new type of energy storage and hydrogen energy based on Fangshan District, with a layout in whole China and an outlook at the world, and write a new chapter for new energy industry development together.

At the conference, CPID, China Power Energy Storage, and China Power Clean Energy Materials signed strategic cooperation agreements with the Government of Fangshan District.
