

# **Mr. Nicolas Grau, Chilean Minister of Economy, Visits XYZ Storage Technology**

On October 18, 2023, Mr. Nicolas Grau, Minister of Economy of Chile, and his delegation visited XYZ Storage Technology (Beijing) Co., Ltd., and Mr. Gao Ping, Executive Director and President of CPID, accompanied the visit and participated in the discussion and exchange.

Mr. Gao warmly welcomed Mr. Grau and his delegation, and introduced the layout of CPID's new energy industry. Mr. Gao said that as one of the leading new energy enterprises in the global capital market, CPID will continue to actively promote the development of clean energy industry, and is willing to work with the Government of Chile to make Chile's new energy industry bigger and stronger, and contribute China's wisdom and strength to the realization of Chile's low-carbon transition.

Mr. Grau highly appreciated CPID's development achievements in the field of clean energy and expressed his willingness to strengthen cooperation with CPID in the field of renewable energy, jointly promote the development of clean energy and contribute to the fight against global climate change.

Before the meeting, Mr. Grau and his delegation visited the manufacturing factory and centralized smart operation center of XYZ Storage Technology, and the color PV power house of Xinyuan Jinwu, to learn in detail about energy storage equipment production line, battery compartment integration technology, digital twin technology and color PV power technology.

The meeting was attended by the heads of the International Business Department (Internationalization Center), CPIH, Pacific Hydro Chile, XYZ Storage Technology and Xinyuan Jinwu of CPID.
