

China Wireless Cooperated with China Unicom

Providing Wireless Data Total Solutions for Zhuhai City Government

Recently, China Wireless Technologies' wholly-owned subsidiary Yulong Computer Telecommunication Scientific (Shenzhen) Co. Ltd cooperated with China Unicom (Stock Code: 762) to provide wireless data total solutions for Crisis Management Office of Zhuhai City in Guangdong Province in special chemical materials leaking management exercise. The system was with advanced technology and outstanding operating effect, and was highly commended by the government.

The special exercise aims at testing the crisis management capacity of Zhuhai government when facing chemical materials leaking emergencies. According to the Emergency Command of Zhuhai City government, it is the first time across country of using a united wireless multimedia data commanding system in emergency drills. The dedicated emergency commanding system, joint-provided by Yulong and China Unicom, can implement online inter-active transfers of video, text and voice, as well as collect, process and dispatch information in a multi-dimensional pattern. It allows the emergency commanding centre to carry out entire, active and multimedia real time monitoring and dispatching, which improve the efficiency of the emergency commanding system and enhance the control centre's capacity of contain and resolve emergent affairs. It received approval from local and provincial officials.

Up until now, Yulong has provided integrated wireless data total solutions for industrial and commercial sectors, public security, taxation offices, physical distributions, communications, environmental protection offices and other governmental sectors and fields. It is known that Beijing City Management Agency has equipped its city management team with thousands of Coolpad 728B smart office terminals with wireless data total solutions embedded. The traffic policemen in Guangdong Province also have had their first batch of customized mobile smart

terminals provided by Yulong.

The administrative deputy general manager of Yulong, Mr. Li Wang said, “As informationization develops, the market of wireless data total solutions application will get into the rapid-development stage. It will be a great opportunity for corporations with strong advantages in core-technology R & D like Yulong. Our goal is to become the leader in global wireless data integrated terminal market. Yulong will input more in this field and contribute on its popularization.”
