

## EVERBRIGHT GREENTECH'S FENG COUNTY ROOFTOP DISTRIBUTED SOLAR ENERGY PROJECT THIRD BATCH PHASE II SUCCESSFULLY CONNECTS TO POWER GRID

**Hong Kong, 21 August 2023** – China Everbright Greentech Limited (“Everbright Greentech”, or the “Company”) (SEHK: 1257.HK) is pleased to announce that the Company’s 6MW rooftop solar energy project, which is installed at the Intelligent Manufacturing and Processing Centre that is part of the phase II of the third batch of Feng County County-wide Rooftop Distributed Solar Energy Project in Jiangsu Province (the “Feng County Solar Energy Project”), has been successfully connected to the power grid.

Dedicated to the development and construction of rooftop solar energy projects for public buildings, including government authorities, schools and hospitals, as well as solar energy projects for various industrial parks in Feng County, the Feng County Solar Energy Project is able to transform the rooftop resources across the county into green energy and optimise the utilisation of resources, thereby reducing the operating costs of the relevant organisations and enterprises and building a secure, green and efficient clean energy supply system.

Feng County is one of the first counties in Mainland China to develop distributed photovoltaic projects on rooftops. Leveraging the abundant rooftop resources and solar energy, Everbright Greentech has been pushing forward the expansion of its solar energy projects. The pilot programme will be constructed in batches and in various areas and is targeted to be completed within the 14th Five-year Plan period. The project is expected to have a total installed capacity of approximately 55MW, with 20MW to be connected to the power grid by 2023 and 35MW to be completed by 2024.

**Mr. Qian Xiaodong, CEO of Everbright Greentech**, said, “The Feng County Solar Energy Project marks an active attempt by Everbright Greentech in response to China’s goal of peaking carbon emissions and achieving carbon neutrality, which is of far-reaching significance in building the Company’s green energy industry chain. In the future, Everbright Greentech will actively assist industrial and commercial users and government authorities to improve energy utilisation efficiency, accelerate the expansion of distributed photovoltaic and energy storage construction, and help its users and the society in general to utilise renewable energy and reduce carbon emissions. The Company will adhere to the development strategy of ‘Reinforcing Principal Businesses and Driving Transformation’, focusing on the development of new business around the ‘Zero-carbon Industry Park’ model to create new growth points.”
