Income Statement

Profit after tax for the nine months stood at US\$35.5 million, an increase of 19.5% as compared to US\$29.7 million in the previous corresponding period. The following review sets out the factors that affected profit after tax for the period:

Revenue

Revenue decreased by 8.9% to US\$278.0 million year-on-year due mainly to lower revenue generated from both gaming and property development segments. The volatility in the gaming sector continued to affect overall revenue performance. Hotel revenue was stable as compared to previous corresponding period despite the impact of rooms not available for sale due to the refurbishment, however the weakening of GBP/USD rate has lowered revenue in USD term during the period.

Bass Strait oil and gas royalty

Income from the Bass Strait oil and gas royalty in Australia decreased by 7% principally due to impact of lower average crude oil and gas prices as well as the weakening of AUD/USD rate as compared to previous corresponding period.

Gain on disposal of investments/assets

The decrease in gain on disposal of investments/assets was mainly due to sale of a casino licence by Clermont Leisure UK in the previous corresponding period.

Direct costs of raw materials, consumables and services

The decrease in direct costs of raw materials, consumables and services for the nine months by 8.7% was due mainly to lower gaming duty in tandem with the decrease in revenue from gaming sector during the period.

Personnel expenses

The decrease in personnel expenses was attributable to the implementation of the new VCGM management model at the Group's hotel operations which resulted in significant cost savings at central support office.

Other operating expenses

The decrease in other operating expenses for the nine months reflecting overall cost disciplines for the group and transformation cost incurred during the start-up stage in the previous corresponding period.

Net financing costs

Lower financing costs for the nine months was primarily due to the savings from the interest cost relating to the term loan refinancing in December 2014.

Income tax expense

The decrease in income tax expense was mainly due to higher tax provision on property development segment in the previous corresponding period.

Statement of Comprehensive Income

Total comprehensive loss for the nine months was US\$113.7 million. This was due to a net foreign exchange loss of US\$143.5 million as a result of translating the books of the Group's UK subsidiaries and the Bass Strait oil and gas royalty rights which are denominated in GBP and AUD respectively into the Group's reporting currency, which is USD. As at 31 March 2015, GBP depreciated against USD by 13.3% and AUD depreciated against USD by 19.1% as compared to 30 June 2014.

Statement of Financial Position

The Group's net assets before non-controlling interests decreased by 11.3% from US\$1,217.3 million as at 30 June 2014 to US\$1,079.8 million as at 31 March 2015. This is mainly attributable to net foreign exchange translation loss referred to above.

Excluding the effects of currency translation, other significant factors that affected the Group's net assets as at 31 March 2015 were as follows:

- a) Trade and other receivables – decrease was primarily due to lower outstanding debts and prepayments for the hotel segment during the period.
- b) Cash and cash equivalents – increase was due to the timing difference on receipt of royalty income as well as lower repayment of short term borrowings.
- c) Short term loans and borrowings – decrease was due to redemption of mortgaged debenture stock.
- d) Trade and other payables – decrease was mainly due to scheduled settlement of creditor liabilities.
- e) Corporate tax payable – decrease was mainly due to actual tax paid during the period.
- f) Long term loans and borrowings – increase was due to draw down of bank loan facility for redemption of mortgaged debenture stock.
- g) Provisions – decrease was due to actual pension payments made during the period.

Statement of Cash Flows

A negative net cash flow of US\$10.3 million was recorded for the nine months as compared with net cash inflow of US\$9.8 million in the previous corresponding period. This was primarily due to lower cash flow from gaming operations and royalty receipt as well as higher share purchases for ESOS 2008 and capital expenditure during the period. However, this was offset by lower repayment of short term loans and borrowings.

9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results

The Group has not previously released any forecast or prospect statements.

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months

The first hotels under two of the group's new brands were launched during the current financial year - the Amba Hotel Charing Cross in December 2014 and every Hotel Piccadilly in February 2015.

The refurbishment of our hotels is expected to continue over the next 12 months. The impact of rooms not available for sale due to the refurbishment will continue to be felt over this period. Average occupancy for the London hotel market is expected to remain stable, with average room rates rising at modest levels.

The group reached an agreement to cease management of 19 regional Thistle Hotels and the handover of these hotels is expected to take place in the third quarter of 2015.

The Pound Sterling has fallen against the US Dollar by 13% from the beginning of the financial year. This continues to impact our revenues, assets and liabilities which are denominated in Pound Sterling.

A significant decline in global oil prices coupled with a weaker Australian Dollar have adversely affected the group's oil and gas royalty revenues. Oil prices are not expected to

improve in the coming quarters. Industrial action at the Bass Strait joint venture between Exxon Mobil and BHP Billiton during first quarter of 2015 had an impact on the quarterly oil output from the oilfields. The negative impact of this action will be seen in the next quarter's royalty income. The group expects its royalty income to be affected until a resolution is reached between the oil producer and its workforce.

The group refinanced its £138 million mortgage debenture stock in December 2014 with a floating rate term loan. Based on prevailing benchmark rates, this is expected to result in interest savings for the group.
