Lukfook Group Granted “Invention Patent” in China Innovation in Electroforming Technology Fostered Industry Development Self-invented “Physical Gold Ornament” Debut

(26 April 2021) – **Luk Fook Holdings (International) Limited** (“Lukfook” / the “Group”) (Stock Code: 00590) is pleased to announce that “a Physical Gold Ornament and an innovative Electroforming Technology” developed by the Group has been granted an “Invention Patent” (Patent No.: 201910217097.4) by the China National Intellectual Property Administration. The Group has brought forth innovation to create the “Physical Gold Ornament” with this patented technology, underlining its competitive edge in the market and remarkable accomplishments in manufacturing technology.

The “Physical Gold Ornament and the Electroforming method” has combined the advantages of different gold ornaments in the market. This unique technique creates stunning texture appeal like heavy solid gold, producing aesthetic yet three-dimensional effect with more diversified designs. Traditional electroformed gold ornaments are often being served as display decoration only while the “Physical Gold Ornament” overcomes the limitations of traditional statues which are soft and easily deformed. With a higher resistance to deformation, one can hold the “Physical Gold Ornament” with hands for appreciation. The size of a “Physical Gold Ornament” is about twice as that of a traditional electroformed gold ornament of the same weight, making the “Physical Gold Ornament” better value for money.

Mr. Wong Wai Sheung, Chairman and Chief Executive Officer of the Group said, “The Group has been committed to providing quality products for customers. The acceptance of this invention patent affirms our technological innovation and enhances our core competitiveness, further consolidating our leading position in the industry. The newly launched ‘Physical Gold Ornament’, with our self-invented and patented technology are not only demonstrating our high level of craftsmanship, but also securing our first-mover advantage in the market and promoting our business development. Going forward, we will continue to strive for innovation and perfection to advance technological development in the industry.”

Each “Physical Gold Ornament” comes with a certificate issued by the National Gemstone Testing Center to proliferate customers’ confidence. The “Melody of Love Collection of Physical Gold Ornament in Crystal Ball Music Box”, using the invention patented technology, is making its debut in the Mainland China and is perfect for gifting and collection.
