BEIJING, China, March 6, 2013 – Phoenix New Media Limited (NYSE: FENG), a leading new media company in China (“Phoenix New Media”, “ifeng” or the “Company”), today announced its unaudited financial results for the fourth quarter and fiscal year ended December 31, 2012.

Fourth Quarter and Fiscal Year 2012 Highlights

- Total revenues for the fourth quarter of 2012 increased by 7.8% year-over-year to RMB302.2 million (US\$48.5 million), primarily driven by a 28.4% increase in net advertising revenues.
- Total revenues for fiscal year 2012 increased by 16.9% year-over-year to RMB1.1 billion (US\$178.3 million), primarily driven by a 31.0% increase in net advertising revenues.
- Net income attributable to Phoenix New Media for fiscal year 2012 increased by 4.8% year-over-year to RMB107.4 million (US\$17.2 million).

Mr. Shuang Liu, CEO of Phoenix New Media, stated, “We are very pleased that for the year of 2012, we continued to outpace other major online portals in China with our online advertising revenue growing 31.0% and the number of daily unique visitors growing 63.8% year-over-year. In particular, we are very encouraged to see a sizeable rebound in our advertising sales in the fourth quarter, which speaks to the success of our strategy and operation. As a result of our recently streamlined sales operation, we have realized strong growth in APRA over the quarter while enhancing our client base and relationships. Benefiting from our proprietary content offering, our video advertising sales have led to an incremental increase in both sales and number of clients, providing us with additional revenue streams for this quarter and beyond.

Going forward, as one of China’s most influential media companies, we are confident that our strategy of expanding exclusive and premium content across PC and mobile Internet platforms, coupled with our proven execution capabilities, will further strengthen our influence in today’s increasingly digital and mobile world.”

Fourth Quarter 2012 Financial Results

REVENUES

Total revenues for the fourth quarter of 2012 increased by 7.8% to RMB302.2 million (US\$48.5 million) from RMB280.5 million in the fourth quarter of 2011.

Net advertising revenues, calculated net of advertising agency service fees, for the fourth quarter of 2012 increased by 28.4% to RMB193.1 million (US\$31.0 million) from RMB150.4 million in the fourth quarter of 2011, primarily due to an increase in average revenue per advertiser (“ARPA”) of 26.4% to RMB605,450 (US\$97,180) for 319 total advertisers.

Paid service revenues for the fourth quarter of 2012 decreased by 16.1% to RMB109.1 million (US\$17.5 million) from RMB130.0 million in the fourth quarter of 2011. Mobile Internet and value-added services (“MIVAS”)¹ revenues decreased by 20.0% to RMB95.3 million (US\$15.3 million) in the fourth quarter of 2012 from RMB119.1 million in the fourth quarter of 2011 due to the expected decrease in user demand from 2G text message based wireless value-added services (“WVAS”). Video value-added services (“video VAS”) revenues increased by 26.1% to RMB13.7 million (US\$2.2 million) in the fourth quarter of 2012 from RMB10.9 million in the fourth quarter of 2011, primarily due to an expansion in video VAS user base across the three major telecom operators in China.

COST OF REVENUES AND GROSS PROFIT

Cost of revenues for the fourth quarter of 2012 increased by 0.5% to RMB165.1 million (US\$26.5 million) from RMB164.2 million in the fourth quarter of 2011. Revenue sharing fees to telecom operators and channel partners decreased to RMB47.3 million (US\$7.6 million) in the fourth quarter of 2012 from RMB78.5 million in the fourth quarter of 2011, primarily due to the decrease in MIVAS revenues. Content and operational costs increased to RMB73.1 million (US\$11.7 million) in the fourth quarter of 2012 from RMB53.4 million in the fourth quarter of 2011 due to the increase in staff-related costs, office rental fees, as well as the increase in content production and acquisition costs. Bandwidth costs increased to RMB19.0 million (US\$3.1 million) in the fourth quarter of 2012 from RMB12.3 million in the fourth quarter of 2011 primarily due to the significant growth in user traffic. Sales tax and surcharges increased to RMB25.6 million (US\$4.1 million) in the fourth quarter of 2012 from RMB20.0 million in the fourth quarter of 2011. Share-based compensation expenses included in cost of revenues was negative RMB1.1 million (US\$0.2 million) in the fourth quarter of 2012 as compared to RMB1.0 million in the fourth quarter of 2011, primarily due to the adjustment of the estimated forfeiture rate².

¹ MIVAS includes Internet VAS, which was previously a separate component of paid service.

² The Company recognized share-based compensation, net of estimated forfeiture rates, on a graded vesting basis over the vesting term. Total share-based compensation for the fourth quarter of 2012 was negative RMB2.1 million. Negative share-based compensation expenses incurred were due to managements’ estimate adjustment of the forfeiture rate for the restricted share units granted.

Gross profit for the fourth quarter of 2012 increased by 18.0% to RMB137.1 million (US\$22.0 million) from RMB116.2 million in the fourth quarter of 2011. Gross margin increased to 45.4% in the fourth quarter of 2012 from 41.4% in the fourth quarter of 2011, mainly due to the increased revenue contribution from higher-margin advertising services business, partially offset by the aforementioned increase in content and operational costs. Adjusted gross margin³, which excludes share-based compensation expenses, increased to 45.0% in the fourth quarter of 2012 from 41.8% in the fourth quarter of 2011.

OPERATING EXPENSES AND INCOME FROM OPERATIONS

Total operating expenses for the fourth quarter of 2012 increased by 31.2% to RMB118.4 million (US\$19.0 million) from RMB90.2 million in the fourth quarter of 2011. The increase in operating expenses was primarily attributable to the increase in staff-related costs, sales and marketing expenses associated with the Company's marketing and promotions, and office rental fees. Share-based compensation expenses included in operating expenses were negative RMB1.0 million (US\$0.2 million) in the fourth quarter of 2012 as compared to RMB3.8 million in the fourth quarter of 2011, primarily due to the adjustment of the estimated forfeiture rate.

Operating margin was 6.2% for the fourth quarter of 2012 as compared to 9.3% in the fourth quarter of 2011. Use of Non-GAAP Financial Measures

To supplement the consolidated financial statements presented in accordance with the United States Generally Accepted Accounting Principles (“GAAP”), Phoenix New Media uses adjusted gross profit, adjusted gross margin, adjusted income from operations, adjusted operating margin, adjusted net income attributable to Phoenix New Media, adjusted net margin, adjusted net income attributable to ordinary shareholders and adjusted net income per diluted ADS, each of which is a non-GAAP financial measure. Adjusted gross profit is gross profit excluding share-based compensation expenses. Adjusted gross margin is adjusted gross profit divided by total revenues. Adjusted income from operations is income from operations excluding share-based compensation expenses. Adjusted operating margin is adjusted income from operations divided by total revenues. Adjusted net income attributable to Phoenix New Media is net income attributable to Phoenix New Media excluding share-based compensation expenses. Adjusted net margin is adjusted net income attributable to Phoenix New Media divided by total revenues. Adjusted net income attributable to ordinary shareholders is net income attributable to ordinary shareholders excluding share-based compensation expenses. Adjusted net income per diluted ADS is adjusted net income attributable to ordinary shareholders divided by weighted average number of diluted ADS. The Company believes that separate analysis and exclusion of the non-cash impact of share-based compensation adds clarity to the constituent parts of its performance. The Company reviews adjusted net income together with net income to obtain a better understanding of its operating performance. It uses this non-GAAP financial measure for planning, forecasting and measuring results against the forecast. The Company believes that using multiple measures to evaluate its business allows both management and investors to assess the company’s performance against its competitors and ultimately monitor its capacity to generate returns for its investors. The Company also believes that non-GAAP financial measures are useful supplemental information for investors and analysts to assess its operating performance without the effect of non-cash share-based compensation expenses, which have been and will continue to be significant recurring expenses in its business. However, the use of non-GAAP financial measures has material limitations as an analytical tool. One of the limitations of using non-GAAP financial measures is that they do not include all items that impact the Company’s net income for the period. In addition, because non-GAAP financial measures are not measured in the same manner by all companies, they may not be comparable to other similar titled measures used by other companies. In light of the foregoing limitations, you should not consider non-GAAP financial measure in isolation from or as an alternative to the financial measure prepared in accordance with U.S. GAAP.
