BUSINESS REVIEW AND PROSPECTS

Manufacture and Sale of Photographic, Electrical and Multimedia Accessories

During the period under review, the Group's segment turnover was decreased from HK$109.3 million to HK$99.6 million, representing a decrease of 8.9% as compared with previous corresponding period. The dropped in sales was mainly caused by one of the Group's electronics partners was put into receivership in October 2007, and which caused the revenues for electrical accessories decreased by HK$10.4 million as compared with previous corresponding period.

Europe continued to be the Group's largest market, accounting for approximately 53.4% of the total turnover of this period (2006: 60%). Total export sales to Europe decreased to HK$55.4 million (2006: HK$65.7 million), representing a decrease of 15.7% as compared to that of the last corresponding period. The management has good knowledge and confidence in this market and will adhere to its established strategy to further penetrate into this very huge market.

In term of product category of photographic, electrical and multimedia accessories, the sale of photographic and multimedia accessories recorded encouraging growth this period. The demand of the Group's photographic and multimedia accessories remained strong and healthy and the Group's photographic and multimedia accessories turnover was increased by HK$16.7 million, representing an increase of 23.8% over the last corresponding period.

Property Portfolio Refinement

During this financial year, the Group's property letting income was approximately HK$4.1 million (2006: HK$2.2 million), an increases by 86% when compared with last corresponding period. The growth was mainly attributable to the inclusion of property letting income of a PRC property located in Guangzhou, PRC being acquired since the end of July 2006.

Having regard to the recent property market in Hong Kong and the PRC, the directors had reviewed the property portfolio and disposed of certain properties in order to realize the gain in property appreciation. In June 2007, the Group disposed of certain investments properties and leasehold building for the total of consideration of HK$59 million, and such disposals improved the cash flow of the Group.

Prospects

For the manufacture and sales of goods segment, the management continues to focus on new revenue channels within the Group's core business of accessories for photographic, multimedia and electrical products. The demand for digital SLR camera bags is still increasing steadily, reflected in the Group's increased turnover within its historical core customer base for photographic accessories. This is reflected in the turnover for photographic products, which has increased by 13.8% as compared with previous corresponding period. New product launches by major hardware manufactures in Q3 of 2007 and anticipated launches at the PMA tradeshow in Las Vegas in January of 2008 should further fuel growth in this area. One of the Group's electronics partners was put into receivership in October 2007, which caused the revenues for electrical accessories plunge by 67.2% as compared with previous corresponding period. Nevertheless, with the expertise gained over the past six years in integrated products, the management believes it can leverage the expertise to work with other technologies in the market to continue to make an impact in this manufacturing sector. A presence at the Hong Kong Electronic Shows in April and October has helped to a continued growth with multimedia accessories up 35.5% as compared with previous corresponding period.

The Group continues to focus on the prospects of increasing its market share in the US as well as the Asian market in the second half of the year. Conservative investment in innovative R&D for integrated electronic products and developments with a company manufacturing a revolutionary pigment based solar technology for the use in bags, will allow the Group to further penetrate new market segments. Keeping costs tight and concentrating on its core competencies, the Group seeks to continue its expansion in both electronic and multimedia accessories over the coming year.

During the period, with a favorable stock market sentiment and a strong local economy, the Company has been strengthen its capital base through a series of placing of shares, issuance of convertible notes and exercise of share options. As a result, the Company raised a total of approximately HK$208.8 million (before issue expenses) through placing of new shares, issue of HK$125 million convertible notes and the exercise of share options.

The Company intends to apply the proceeds towards general working capital or other investments in future. As the Company does not have any identified investment plans at present, the directors are constantly looking for investment opportunities.
