2. Prior year adjustment and comparative figures

With effect from 1 July 2010, the Group changed its accounting policy of its biological assets which include the plantation assets of its subsidiary in New Zealand and oil palm plantations of its associate, Glenealy Plantations (Malaya) Berhad (“Glenealy”), with reference made to the International Accounting Standard (“IAS”) 41, *Agriculture* (“IAS 41”). The comparative financial information for the year ended 30 June 2010 had been restated for such change in the accounting policy.

It was brought to the Directors’ attention that a formula error had been found in the calculations which supported the valuations of plantation assets of Glenealy, and these calculations were adopted by the valuer in forming their conclusions on the fair values of the plantation assets that was prepared in accordance with the accounting policies of IAS 41, which were included in their previously issued valuation reports on the fair value of plantation assets as at 30 June 2010 and 30 June 2011 (“original valuation reports”). On 12 April 2012, the valuer re-issued the valuation reports on the plantation assets of Glenealy as at 30 June 2010 and 30 June 2011 (“re-issued valuation reports”) to replace the original valuation reports to correct the formula error and restate the fair values of the plantation assets of Glenealy as at those dates.

Based on the re-issued valuation reports, the Directors determined that the Group’s investments in associates and jointly-controlled entities as at 30 June 2010 and 30 June 2011, and the restated comparative profits for the financial year ended 30 June 2010 as reported in the Group’s consolidated financial statements for the financial year ended 30 June 2011 issued on 9 September 2011, should be reduced by RM15,878,000 in order to correct this error. The correction of this error had no material impact on profits reported for the financial year ended 30 June 2011.

The effect of the prior year adjustments in respect of the consolidated financial statements for the financial year ended 30 June 2011 is summarised as follows:

	As restated RM’000	As previously reported RM’000

18. Material litigation

Two of the Group's subsidiaries, Samling Plywood (Lawas) Sdn Bhd ("Samling Plywood Lawas") and Samling Plywood (Miri) Sdn Bhd ("Samling Plywood Miri") together with the Director of Forests, Sarawak and State of Government of Sarawak were being jointly sued by certain inhabitants of longhouses and settlements situated on timber concessions held by Samling Plywood Lawas and Samling Plywood Miri. The plaintiffs are claiming various orders, reliefs and damages including declarations that issuance of the forest timber licences by the Director of Forests, Sarawak to Samling Plywood Lawas and Samling Plywood Miri which overlap the plaintiffs' claimed areas are unlawful, unconstitutional, null and void.

As at 31 March 2012, the above proceedings remained pending before the court.

19. Material changes in the quarterly results compared to the results of the immediate preceding quarter

The performance of the Group for the financial quarter under review was affected by the slowdown in demand for timber products from major importing countries. The slower pace of economic growth in China, the still lacklustre Japanese market and the effects of the weakened Indian rupee against the US Dollar which affected Indian importer's purchasing power resulted in the Group recording lower export sales volumes and lower export selling prices for both hardwood logs and plywood during the financial quarter under review. The operating results were further impacted by cost pressures brought about by higher diesel prices during the financial quarter under review. As a consequence, the Group recorded an operating loss before changes in fair value of biological assets less estimated point-of-sale costs of RM5.3 million during the financial quarter under review.

Prices in the market for softwood logs moved downwards at the end of the financial quarter under review and as a result, the Group recognised a loss from changes in fair value of plantation assets of RM7.5 million as compared to a gain of RM7.9 million achieved in the immediate preceding financial quarter.

After accounting for net finance cost of RM2.7 million, foreign exchange gains of RM5.3 million and share of profit after tax of associates of RM19.7 million which included the share of gain from changes in fair value of plantation assets from oil palm associate amounting to RM13.2 million, the Group recorded a profit before taxation of RM9.4 million during the financial quarter under review.

20. Review of performance of the Group for the quarter and financial year-to-date

For the financial quarter under review, the Group achieved revenue of RM374.1 million and an operating loss before changes in fair value of biological assets less estimated point-of-sale costs of RM5.3 million. On a year-to-date basis, the Group recorded revenue and operating profit before changes in fair value of biological assets less estimated point-of-sale costs of RM1,306.1 million and RM40.0 million respectively.

Although demand from China and India had shown signs of slowing down during the financial quarter under review, the logs segment continued to be the key contributor to the Group's operating profits contributing an operating profit (before changes in fair value of biological assets less estimated point-of-sale costs) of RM6.7 million and RM40.7 million during the financial quarter under review and financial year-to-date respectively. For the financial year-to-date, the Group sold 619,593 m³ hardwood logs and 448,645 m³ of softwood logs with average prices of RM469/m³ and RM317/m³ respectively.

Plywood and veneer contributed 31% and 33% to the Group's total revenue for the financial quarter under review and financial year-to-date respectively. Total plywood and veneer volumes sold for the financial year-to-date were 172,911 m³ and 102,785 m³ with average prices of RM1,824/m³ and RM1,064/m³ respectively. Demand for timber for reconstruction activities in areas affected by the Japanese earthquake remained relatively soft.

Revenue recorded by upstream support from external sales was lower during the financial quarter under review due to lower extraction volumes. Consequently, upstream support recorded a lower operating profit during the financial quarter under review as semi-fixed and fixed operating cost were allocated over the lower volumes extracted.

21. Commentary on the outlook of the Group

The global economy remains complex with increasing uncertainty. On the one hand, the recovery in the United States has shown signs of sustainable growth and the emerging markets are expected to continue their gradual growth, albeit with somewhat reduced momentum in some countries, especially China. On the other hand, the outlook for Europe remains unfavourable.

The short term outlook for timber industry is expected to be constrained due to more purchasers taking a cautious approach with the uncertain world economic conditions. The timing of Japan's major reconstruction activities in areas affected by the earthquake and tsunami will be a key impetus for an increase in plywood demand and hopefully selling prices. The demand from China for timber products has shown sign of slowing down with implementation of various macro-economic control measures by the Chinese government to curb the over-heating of the Chinese economy.

Operating under a challenging environment with uncertain outlook and likely greater competition, as various producers strive to increase or at least maintain market share against a likely lower demand base, the Group will continue to manage its cost to remain lean and efficient.
