- 5-mega pixel and 8-mega pixel handset lens sets have commenced mass production
- The production and testing techniques of automatic lens sets have been widely applied

- Mass production for 8-mega and 14-mega pixel handset camera modules has been successfully launched
- Commenced mass production for smart television video modules
- Self-developed semi-automatic, automatic camera module testers started to be applied in mass production
- Self-developed automatic video testing technology was applied in testing of the production line

- Optical analytical instruments for high-throughput screening received special supportive funding from the State

- The R&D of Ultra-thin 8-mega and 13-mega pixel handset lens sets has been successfully completed

- 16-mega pixel handsets camera modules have commenced mass production

- The project of "Development and Application of Trans-scale Three-dimensional Optoelectronic Vibrating Measuring Instruments" was supported by the dedicated funds for development of major National scientific instruments and equipments from the Ministry of Science and Technology

- The "Three-Dimensional Laser Motion Measurement System and Method" has obtained an national invention patent

- 5-mega pixel wide angle handset lens sets have commenced mass production
- 13-mega pixel handset lens sets have commenced mass production
- The R&D of 16-mega pixel handset lens sets has been completed
- The R&D of 13-mega pixel (FNO1.8/ultra-thin/OIS) handset lens sets has been completed
- A manufacturing method of optical lens has obtained a national invention patent

- The OIS handset camera modules have been shipped

- "The method of burning a high resolution camera module and a chip" has obtained a national invention patent

- Self-developed active alignment (AA) equipments have been applied and promoted to the production lines
