Notes:

### 1. BASIS OF PREPARATION

These unaudited interim condensed consolidated financial statements have been prepared in accordance with Hong Kong Accounting Standard (“HKAS”) 34 *Interim Financial Reporting* issued by the Hong Kong Institute of Certified Public Accountants (the “HKICPA”) and the disclosure requirements of Appendix 16 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “Hong Kong Stock Exchange”) (the “Listing Rules”).

The unaudited interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group’s annual financial statements for the year ended 31 December 2020.

The accounting policies and the basis of preparation adopted in the preparation of these unaudited interim condensed consolidated financial statements are consistent with those adopted in the Group’s annual financial statements for the year ended 31 December 2020, which have been prepared in accordance with Hong Kong Financial Reporting Standards (“HKFRSs”) (which include all Hong Kong Financial Reporting Standards, HKASs and Interpretations) issued by the HKICPA, accounting principles generally accepted in Hong Kong and the disclosure requirements of the Hong Kong Companies Ordinance, except for the adoption of the revised HKFRSs as disclose in note 2 below.

These unaudited interim condensed consolidated financial statements have been prepared under the historical cost convention, except for derivative financial instruments and certain financial assets which are measured at fair value. These unaudited interim condensed consolidated financial statements are presented in Hong Kong dollars (“HK\$”) and all values are rounded to the nearest thousand except when otherwise indicated.

### 2. CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

The accounting policies adopted in the preparation of the unaudited interim condensed consolidated financial statements are consistent with those adopted in the Group’s annual consolidated financial statements for the year ended 31 December 2020, except for the adoption of the revised HKFRSs effective as of 1 January 2021.

Amendments to HKFRS 9, HKAS 39, *Interest Rate Benchmark Reform – Phase 2*  
HKFRS 7, HKFRS 4 and HKFRS 16

Amendments to HKFRS 16 *Covid-19-Related Rent Concessions beyond 30 June 2021*  
(early adopted)

### 2. CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES (continued)

Amendments to HKFRS 9, HKAS 39, HKFRS 7, HKFRS 4 and HKFRS 16 address issues not dealt with in the previous amendments which affect financial reporting when an existing interest rate benchmark is replaced with an alternative risk-free rate ("RFR"). The Phase 2 amendments provide a practical expedient to allow the effective interest rate to be updated without adjusting the carrying amount of financial assets and liabilities when accounting for changes in the basis for determining the contractual cash flows of financial assets and liabilities, if the change is a direct consequence of the interest rate benchmark reform and the new basis for determining the contractual cash flows is economically equivalent to the previous basis immediately preceding the change. In addition, the amendments permit changes required by the interest rate benchmark reform to be made to hedge designations and hedge documentation without the hedging relationship being discontinued. Any gains or losses that could arise on transition are dealt with through the normal requirements of HKFRS 9 to measure and recognise hedge ineffectiveness. The amendments also provide a temporary relief to entities from having to meet the separately identifiable requirement when an RFR is designated as a risk component. The relief allows an entity, upon designation of the hedge, to assume that the separately identifiable requirement is met, provided the entity reasonably expects the RFR risk component to become separately identifiable within the next 24 months. Furthermore, the amendments require an entity to disclose additional information to enable users of financial statements to understand the effect of interest rate benchmark reform on an entity's financial instruments and risk management strategy. The amendments are effective for annual periods beginning on or after 1 January 2021 and have been applied retrospectively, but are not required to restate the comparative information.

The Group had certain interest-bearing bank and other borrowings denominated in foreign currencies based on various Interbank Offered Rates as at 30 June 2021. If the interest rates of these borrowings are replaced by RFRs in a future period, the Group will apply this practical expedient upon the modification of these borrowings when the "economically equivalent" criterion is met and no significant modification gain or loss arises as a result of applying the amendments to these changes.

Amendment to HKFRS 16 issued in April 2021 extends the availability of the practical expedient for lessees to elect not to apply lease modification accounting for rent concessions arising as a direct consequence of the Covid-19 pandemic by 12 months. Accordingly, the practical expedient applies to rent concessions for which any reduction in lease payments affects only payments originally due on or before 30 June 2022, provided the other conditions for applying the practical expedient are met. The amendment is effective retrospectively for annual periods beginning on or after 1 April 2021 with any cumulative effect of initially applying the amendment recognised as an adjustment to the opening balance of retained profits at the beginning of the current accounting period. Earlier application is permitted.

The Group has early adopted the amendment on 1 January 2021 and applied the practical expedient during the period ended 30 June 2021 to all rent concessions granted by the lessors that affected only payments originally due on or before 30 June 2022 as a direct consequence of the Covid-19 pandemic. A reduction in the lease payments arising from the rent concessions of HK\$224,000 has been accounted for as a variable lease payment by derecognising part of the lease liabilities and crediting to profit or loss for the period ended 30 June 2021.

<sup>2</sup> Effective for annual periods beginning on or after 1 January 2023

<sup>3</sup> No mandatory effective date yet determined but available for adoption

<sup>4</sup> As a consequence of the amendments to HKAS 1 issued in August 2020, Hong Kong Interpretation 5 *Presentation of Financial Statements – Classification by the Borrower of a Term Loan that Contains a Repayment on Demand Clause* was revised in October 2020 to align the corresponding wording with no change in conclusion

<sup>5</sup> As a consequence of the amendments to HKFRS 17 issued in October 2020, the effective date of HKFRS 17 was deferred to 1 January 2023, and HKFRS 4 was amended to extend the temporary exemption that permits insurers to apply HKAS 39 rather than HKFRS 9 for annual periods beginning before 1 January 2023

The Group is in the process of making an assessment of the impact of these new and revised HKFRSs upon initial application. So far, the Group considers that these new and revised HKFRSs are unlikely to have a significant impact on the Group's results of operations and financial position.

### 13. TRADE RECEIVABLES

The majority of the Group's sales in Mainland China were mainly made on the cash-on-delivery basis or on commercial bills guaranteed by banks within credit periods ranging from 30 to 90 days. For overseas sales, the Group usually requires settlement by letters of credit with tenures ranging from 90 to 180 days. Sales to certain long term strategic customers were made on the open-account basis with credit terms of no more than 180 days.

Save for those amounts due from related parties, in view of the aforementioned and the fact that the Group's trade receivables relate to a large number of diversified customers, there is no significant concentration of credit risk. The Group does not hold any collateral or other credit enhancements over its trade receivables. Trade receivables are non-interest-bearing.

An ageing analysis of the trade receivables as at the end of the reporting period, based on the invoice date, is as follows:

Management has assessed that the fair values of cash and cash equivalents, the current portion of restricted cash and pledged deposits, trade receivables, trade payables and bills payable, financial assets included in prepayments, other receivables and other assets and financial liabilities included in other payables and accruals approximate to their carrying amounts largely due to the short term maturities of these instruments.

### 18. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (continued)

The Group's finance department headed by the finance controller is responsible for determining the policies and procedures for the fair value measurement of financial instruments. The finance controller reports directly to the chief financial officer of the Company ("Chief Financial Officer") and the Audit Committee. At each reporting date, the finance department analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by the Chief Financial Officer. The valuation process and results are discussed with the Audit Committee twice a year for interim and annual financial reporting.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The fair values of non-current portion of restricted cash and pledged deposits, interest-bearing bank and other borrowings and other long-term payables have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The change in fair value as a result of the Group's own non-performance risk for interest-bearing bank and other borrowings as at 30 June 2021 was assessed to be insignificant.

The fair value of the financial liability associated with put option is measured by discounted cash flow model using significant unobservable market inputs.

The fair values of listed equity investments are based on quoted market prices. The fair values of unlisted equity investments designated at fair value through other comprehensive income have been estimated using a market-based valuation technique based on assumptions that are not supported by observable market prices or rates. The valuation requires the Directors to determine comparable public companies (peers) based on industry, size, leverage and strategy, and to calculate an appropriate price multiple, such as enterprise value to earnings before interest and taxes ("EV/EBIT") multiple and price to earnings ("P/E") multiple, for each comparable company identified. The multiple is calculated by dividing the enterprise value of the comparable company by an earnings measure. The trading multiple is then discounted for considerations such as illiquidity and size differences between the comparable companies based on company-specific facts and circumstances. The discounted multiple is applied to the corresponding earnings measure of the unlisted equity investments to measure the fair value. The Directors believe that the estimated fair values resulting from the valuation technique, which are recorded in the consolidated statement of financial position, and the related changes in fair values, which are recorded in other comprehensive income, are reasonable, and that they were the most appropriate values at the end of the reporting period.

### 18. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (continued)

The Group invests in unlisted investments, which represent wealth management products issued by banks in the PRC. The Group has estimated the fair value of these unlisted investments by using a discounted cash flow valuation model based on the market interest rates of instruments with similar terms and risks.

Derivative financial instruments, including forward currency contracts, foreign currency swaps and interest rate swaps, are measured using valuation techniques similar to forward pricing and swap models, using present value calculations. The models incorporate various market observable inputs including the credit quality of counterparties, foreign exchange spot and forward rates and interest rate curves. The Group enters into these kind of derivative financial instruments with various counterparties, principally financial institutions with AAA credit ratings. Derivative financial instruments, including call options and put options, are measured using valuation techniques of Black-Scholes Options Pricing Model or Monte Carlo Simulation Model. The models incorporate various market observable inputs including RFR and volatility. The carrying amounts of forward currency contracts, foreign currency swaps and interest rate swaps, call options and put options are the same as their fair values.

As at 30 June 2021, the mark-to-market value of the derivative asset position was net of a credit valuation adjustment attributable to derivative counterparty default risk. The changes in counterparty credit risk had no material effect on the hedge effectiveness assessment for derivatives designated in hedge relationship and other financial instruments recognised at fair value.

For the fair value of the unlisted equity investments at fair value through other comprehensive income, management has estimated the potential effect of using reasonably possible alternatives as inputs to the valuation model.

## OTHER INFORMATION

### SHARE OPTION SCHEMES

The Company adopted the share option scheme on 15 February 2007 (“2007 Scheme”) for the purpose of providing incentives and rewards to eligible participants who contribute to the success of the Group’s operations. By a shareholders’ resolution passed in the annual general meeting (“AGM”) of the Company held on 18 May 2016, the new share option scheme (“2016 Scheme”) was adopted and the 2007 Scheme was terminated. As a result, the Company can no longer grant any further options under the 2007 Scheme but all options granted prior to the termination of the 2007 Scheme will remain in full force and effect. Eligible participants of the 2007 Scheme include the Directors, including independent non-executive Directors, other employees of the Group, advisers, consultants, agents, contractors, suppliers of goods or services to the Group, customers of the Group, the Company’s shareholders, any non-controlling shareholder in the Company’s subsidiaries and any other person whom the Board at its sole discretion considers may contribute or have contributed to the Group. The 2016 Scheme mainly refined the definition of “any other person” in the eligible participants of the 2007 Scheme to employees and officers of TCL Technology (as the then ultimate beneficial owner of the Company) and its affiliated companies. The 2016 Scheme became effective on 18 May 2016 and, unless otherwise cancelled or amended, will remain in force for 10 years from that date.

The total number of shares of the Company which may be issued upon exercise of all share options to be granted under the 2016 Scheme of the Company must not in aggregate exceed 10% of the number of shares of the Company in issue on the date of approval of the 2016 Scheme. The 10% limit may be refreshed with the approval by ordinary resolution of the shareholders of the Company. The maximum number of shares of the Company which may be issued upon exercise of all outstanding share options granted and yet to be exercised under the 2016 Scheme must not exceed 30% of the number of shares of the Company in issue from time to time. The maximum number of shares of the Company issued or to be issued upon exercise of share options granted to (i.e. the maximum entitlement of) any one participant in a 12-month period shall not exceed 1% (or 0.1% for any substantial shareholder of the Company, independent non-executive Director or any of their respective associates) of the number of issued shares of the Company, unless otherwise approved by the shareholders of the Company in a general meeting of the Company.

## OTHER INFORMATION

### SHARE OPTION SCHEMES (continued)

Share options granted to a Director, chief executive or substantial shareholder of the Company, or to any of their respective associates are subject to approval in advance by the independent non-executive Directors. In addition, the grant of any share options to a substantial shareholder of the Company or an independent non-executive Director, or to any of their respective associates, in excess of 0.1% of the number of shares of the Company in issue at any time and with an aggregate value (based on the price of the shares of the Company at the date of grant) in excess of HK\$5 million, within any 12-month period, is subject to shareholders' approval in advance in a general meeting of the Company.

The offer of a grant of share options may be accepted upon payment of a non-refundable nominal consideration of HK\$1.00 by each grantee. The 2016 Scheme does not specify any minimum holding period but the Board has the authority to determine the minimum period for which a share option in respect of some or all of the underlying shares of the share options must be held before it can be exercised. The exercise period of the share options granted is determinable by the Directors, and commences on a specified date and ends on a date which is not later than ten years from the date of grant of the relevant share options.

The exercise price of a share option to subscribe for shares of the Company is determinable by the Directors, but may not be less than the highest of (i) the closing price of the shares of the Company on the Hong Kong Stock Exchange on the date of grant; (ii) the average closing price of the shares of the Company on the Hong Kong Stock Exchange for the five trading days immediately preceding the date of grant; and (iii) the nominal value of the shares of the Company.

Share options do not confer rights on the holders to receive dividends or to vote at general meetings of the Company.

## OTHER INFORMATION

### SHARE OPTION SCHEMES (continued)

The Directors have estimated the values of the share options granted, calculated using the binomial option pricing model as at the date of grant of the share options. The values of share options calculated using the binomial model are subject to certain fundamental limitations, due to the subjective nature of and uncertainty relating to a number of assumptions of the expected future performance input to the model, and certain inherent limitations of the model itself.

The value of a share option varies with different variables of certain subjective assumptions. Any change to the variables used may materially affect the estimation of the fair value of a share option.

Details of the 2016 Scheme and the amendments were set out in the circular of the Company dated 18 April 2016.

At the AGM of the Company held on 23 May 2018, an ordinary resolution was passed to refresh the scheme mandate limit under the 2016 Scheme provided that the total number of shares of the Company which may be allotted and issued pursuant to the grant or exercise of share option under the 2016 Scheme shall not exceed 10% of the number of issued shares of the Company as at the date on which the resolution was passed (i.e. 10% of 2,332,613,561 shares, that was 233,261,356 shares of the Company). For details, please also refer to the circular of the Company dated 20 April 2018.

As at 30 June 2021, the number of shares of the Company that could be issued upon exercise of (i) all outstanding share options; and (ii) all share options that could be granted under the then available scheme mandate limit were 58,170,397 and 233,261,356, respectively, which represented approximately 2.35% and 9.44% of the total number of issued shares of the Company as at 30 June 2021, respectively. Assuming all said 58,170,397 outstanding share options were exercised as at 30 June 2021, the total number of shares of the Company as at 30 June 2021 would be 2,529,232,593, and the shareholding of T.C.L. Industries (H.K.) and Zeal Limited would drop to approximately 49.83% and 13.79% respectively.

### USE OF RIGHTS ISSUE PROCEEDS AND CHANGE IN USE OF RIGHTS ISSUE PROCEEDS (continued)

#### REASONS FOR AND BENEFITS OF THE CHANGE IN USE OF RIGHTS ISSUE PROCEEDS

In order to strengthen the efficiency and effectiveness of the capital use and to strengthen the business liquidity of the Group, the Board has resolved to reallocate the entire balance of the Remaining Rights Issue Proceeds to the general working capital of the Group. Furthermore, in light of the challenges brought by the pandemic and fierce competition in the industry, boosting the Group's working capital will enhance the flexibility in the Group's capital utilisation and reduce additional finance costs. A stable and healthy liquidity position is also conducive to the Group's business development, thereby enabling the Group to grasp business opportunity and increase its market share. Based on the aforementioned reasons, the Board considers that the reallocation of the entire balance of the Remaining Rights Issue Proceeds as general working capital is beneficial to the future development of the Group.

The Directors confirm that the aforementioned change in use of Rights Issue Proceeds does not have material effect on the Group's business strategies and visions as disclosed in the Prospectus, and consider that the change in use of Rights Issue Proceeds is in the best interest of the Company and its shareholders as a whole and will not have any material adverse effect on the existing business and operations of the Group.
