### **CLARIFICATION ANNOUNCEMENT**

Reference is made to the announcement (the “**Announcement**”) dated January 24, 2014 of the Company. The purpose of this announcement is to provide investors and the market further information on the Patent Right Sharing Agreement. Capitalised terms used in this announcement shall have the same meanings as those defined in the Announcement unless the context otherwise requires.

The four patents (the “**Patents**”) as disclosed in the Announcement, namely (a) regeneration process of using low temperature methanol to wash and spray methanol, (b) method of heat pump distillation of methanol, (c) gasifying device for liquid and solid fuel aqueous slurry and (d) petro coke residue slurry with high ash fusion point and its preparation method, were jointly invented by Wison Engineering and Wison Nanjing. Therefore, both Wison Engineering and Wison Nanjing jointly applied for the registration of the Patents and are either registered joint owners or joint applicants for the Patents. As at the date of this announcement, the Patent relating to petro coke residue slurry with high ash fusion point and its preparation method is still pending registration, whilst the other three Patents have been registered. None of the Patents have been put to commercial use and no revenue has been generated from the Patents to date. There has been no disputes between Wison Engineering and Wison Nanjing over the Patents.

Under the PRC Patent Law, a joint applicant/joint owner (as the case may be) of a patent is entitled to use such patent (including licensing third parties to use the patent) without payment of royalty to the other joint applicants/joint owners (as the case may be), unless the joint applicants/joint owners agree otherwise. Accordingly, it is important for the parties to protect their respective interests in the Patents by entering into the Patent Right Sharing Agreement which provides for the sharing of license fees received from third parties on a 50:50 basis should the Patents be licensed to third parties and that Wison Engineering will have the sole right to conduct any marketing in relation to the licensing of the Patents.

Save for the Patents mentioned above, all the registered patents and patent applications listed in Appendix VI to the Company's prospectus dated December 13, 2012 that are still pending registration have been solely owned or made by the Company or its subsidiaries.

By Order of the Board  
**Wison Engineering Services Co. Ltd.**  
**LIU HAIJUN**  
*Executive Director*

Hong Kong, January 29, 2014
