

Living Cell Technologies Limited

ACN: 104 028 042
ASX: LCT
OTCQX: LVCLY

ASX ANNOUNCEMENT

LCT exits peptide projects

Sydney, Australia & Auckland, New Zealand, 29 March 2021 – Living Cell Technologies Limited's (LCT) research and related licence contracts with the University of Auckland will terminate with effect from 25 March 2021. LCT will pay the University net NZD 400,000 on account of work done, and expects to recover part of this amount from third parties.

The contracts were to develop early preclinical candidates of lipidated calcitonin gene-related peptide and lipidated pramlintide peptide compounds for possible treatment of migraine and obesity respectively.

LCT will terminate these projects at the end of the contracts, as the projects did not reach the desired endpoints.

The company continues to look for research project opportunities to maximise its financial assets.

Authorised for release by the Board of Living Cell Technologies Limited.

Forward-looking statements

This document may contain certain forward-looking statements, relating to LCT's business, which can be identified by the use of forward-looking terminology such as "promising," "probable", "plans," "anticipated," "will," "project," "believe," "forecast," "expected," "estimated," "targeting," "aiming," "set to," "potential," "seeking to," "goal," "could provide," "intends," "is being developed," "could be," "on track," or similar expressions, or by express or implied discussions regarding potential filings or marketing approvals, or potential future sales of product candidates. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to be materially different from any future results, performance or achievements expressed or implied by such statements. There can be no assurance that any existing or future regulatory filings will satisfy the FDA's and other health authorities' requirements regarding any one or more product candidates nor can there be any assurance that such product candidates will be approved by any health authorities for sale in any market or that they will reach any particular level of sales. In particular, management's expectations regarding the approval and commercialisation of the product candidates could be affected by, among other things, unexpected clinical trial results, including additional analysis of existing clinical data, and new clinical data; unexpected regulatory actions or delays, or government regulation generally; our ability to obtain or maintain patent or other proprietary intellectual property protection; competition in general; government, industry, and general public pricing pressures; and additional factors that involve significant risks and uncertainties about our products, product candidates, financial results and business prospects. Should one or more of these risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated or expected. LCT is providing this information and does not assume any obligation to update any forward-looking statements contained in this document as a result of new information, future events or developments or otherwise.
