MARENGO MINING LIMITED

ABN 57 099 496 474

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE QUARTER ENDED SEPTEMBER 30, 2010

The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("**MD&A**") for Marengo Mining Limited ("**Marengo**" or the "**Company**") should be read in conjunction with the unaudited interim consolidated financial statements of Marengo for the quarter ended September 30, 2010 (the "**Interim Financial Statements**") and with the June 30, 2010 audited consolidated financial statements (the "**Year-End Financial Statements**") and related notes thereto (together, the "**Financial Statements**"). This information is presented as of November12, 2010. The Financial Statements (and the financial information contained in this MD&A) were prepared in accordance with the Australian equivalents of International Financial Reporting Standards ("**IFRS**").

All amounts in this discussion are expressed in Australian dollars unless otherwise indicated.

In this MD&A, references to "Company" are references to Marengo Mining Limited and its wholly-owned subsidiary, Marengo Mining (PNG) Limited.

The Financial Statements and other information about the Company and its business activities are available on SEDAR at www.sedar.com.

1. Overview

Marengo is an international mineral exploration and development company listed on the Australian Securities Exchange (the "**ASX**"), Port Moresby Stock Exchange Limited ("**POMSoX**") (Code: MGO) and the Toronto Stock Exchange (the "**TSX**") (Code: MRN).

The Company's principal asset is the Yandera copper-molybdenum-gold project (the "**Yandera Project**") in Papua New Guinea. The Company is currently focused on advancing the development of the Yandera Project.

The Company also owns a database of exploration and project evaluation activities (including all exploration and drilling data, assay results from 102 diamond holes totalling 33,000 metres, resource estimates and scoping studies) at the Yandera Project between 1970 and 1989.

In September 2006, the Company commissioned a conceptual mining study (the "**CMS**") for the Yandera Project to include a preliminary mine design and open pit optimization, metallurgical testwork, plant flowsheet design and throughput options and capital and operating cost estimates. In July 2007, the CMS was completed and, based on the positive results thereof, the Company determined to proceed with a definitive feasibility study (the "**DFS**") on the development of the Yandera Project.

Phase 1 of the DFS was completed in April 2008 and comprised a comparative development options analysis study and delivered a number of positive results. Phase 2 of the DFS commenced in May 2008 and is ongoing. Phase 2 of the DFS involves metallurgical testwork, mine design, process plant design, tailings and concentrate pipeline design, route selection, geotechnical studies, equipment selection and infrastructure layout. Phase 2 of the DFS also includes identification and consideration of options for project infrastructure, processing facility locations and transportation in order to reduce initial capital costs.

The Company currently has no source of earnings other than interest paid to it on its current cash position. In order to fund its ongoing exploration efforts and operations, Marengo has historically raised funds through the issuance of equity securities.

2. Subsequent Events

Since the end of the quarter, the subject of this report, the Company has entered into a non-binding agreement with one of China's leading construction and engineering groups, China Nonferrous Metal Industry's Foreign Engineering and Construction Co. Ltd ("NFC").

Under the terms of the Memorandum of Understanding (MOU), Marengo has agreed to work exclusively with NFC to establish the cost and program for delivery of the Yandera Project in parallel with the completion of the current DFS. These discussions will be conducted with a view to entering into:

- a formal construction agreement (Engineering, Procurement and Construction or EPC Contract) under which Marengo will appoint NFC as the principal contractor, under a Lump Sum Turnkey Contract, following a detailed evaluation of the project construction costs, to be undertaken by NFC as part of the final stage of the DFS;

- a formal financing agreement, subject to agreement on the terms of the construction contract, under which NFC will facilitate at least 70% of the necessary financing for the project development costs of the Yandera Project through Chinese banks.

In addition, the MOU contemplates NFC placing a substantial amount of the project copper and molybdenum concentrate off-take with a variety of customers, including NFC itself, and investing in either Marengo or the Yandera Project or both, on terms to be agreed.

Under the proposed construction agreement, NFC will be permitted, to the extent reasonably practicable, to maximise the use and procurement of engineering services, mechanical equipment, fabricated steel and other construction materials, and mining equipment required for the Yandera Project in China.

The MOU includes an indicative timetable which contemplates the commencement of project construction at Yandera by the first half of 2012 following completion of a formal EPC contract and approved financing anticipated by November 2011.

Other than noted no matters or circumstances have arisen since period end which will significantly affect, or may significantly affect, the state of affairs or operations.

3. Overall Performance

The Company began the quarter ended September 30, 2010 with cash reserves of $6,984,582. During the quarter the Company raised a total of $21,600,000, before costs, from the issue of 240,000,001 ordinary shares. Funds expended were used to actively advance the Company's Yandera Project.

During the quarter ended September 30, 2010 the Company incurred exploration expenditures of $4,511,617 (2009: $2,380,768). In accordance with the Company's accounting policies, all exploration expenditures other than acquisition and feasibility costs, were written off as incurred resulting in a write off of $57,160 (2009: $2,116,205) during the quarter. This resulted in an operating loss after income tax for the quarter ended September 30, 2010 of $1,757,893 (2009: $3,863,360).

The Company has a cash balance of $20,198,921 as at September 30, 2010.

Details of the Company's recent exploration and development activities and overall performance are contained in the September 2010 Quarterly Report released on April 27, 2010 to the ASX and POMSoX, and concurrently filed under the Company's profile at www.sedar.com.

Highlights of the Company's activities for the quarter ended September 30, 2010 are set out below:

- Second deep vertical diamond drill hole (YD 294 - Gremi) intersected 660 metres @ 0.48% Cu, between 33 metres and 693 metres. This intersection included 51 metres @ 1.06% Cu between 624 metres and 675 metres;

- Diamond drilling at the Dimbi zone (YD 291) intersected 96 metres @ 0.68% Cu between 129 metres and 225 metres, and 24 metres @ 2.09% Cu between 309 and 333 metres;

- Diamond drilling at the Imbruminda zone (YD 278) intersected 461 metres @ 0.36% Cu between 0 to 461 metres;

- The Company made application for an exploration over an area east of the Yandera Project. This location (Yakumbu) previously provided anomalous gold values from stream sediment samples previously carried out by third parties;

In November 2008, the Company expanded the scope of Phase 2 of the DFS and extended its anticipated completion date from mid-2009 to December 31, 2010 to consider new options for project infrastructure, processing facility locations and transportation. Release of this data is anticipated to take place during the first quarter of 2011.

Work to be completed as part of Phase 2 of the DFS includes consideration of several mine site process plant locations including geotechnical investigation of the initially proposed site and a mineral processing trade-off study to refine the plant layout. It is currently suggested that relocating a portion of the processing plant to a coastal location, thereby separating the process site with comminution located at the mine site and flotation located nearer the coast, may have a positive impact on capital and operating cost estimates for the Yandera Project.

The Company also proposes to complete a district exploration program at the Yandera Project in that area where any discoveries could have an impact on the Yandera resource; however, general prospecting work is also planned for the more regional strike extensions to the north-west and south-east. The Company believes that the area has excellent potential to generate additional targets for detailed exploration work.

The amount and nature of the exploration expenditures will depend on the progress and results of the exploration program with expenditures being focused on areas with positive results.

The primary focus of the Company for the ensuing period is to complete the DFS and the district exploration program focusing on the area surrounding the Yandera central resource.

Marengo will require further capital from external sources to develop any newly discovered mineral deposits and/or, if the DFS is positive, to develop the Yandera Project. Marengo intends to raise any such funds through debt and/or equity financing. There can be no assurance that additional financing will be available at all or on terms acceptable to the Company to develop any newly discovered mineral deposits and to finance the development of the Yandera Project.

In particular, commodity price fluctuations may significantly affect the ability of the Company to fund the development of the Yandera Project and the Company's forecasts and expectations regarding the economic viability of developing its mineral deposit. Fluctuations in commodity prices may also impact the results of operations once mining commences. The monitoring of price movements and trends for the Company's target mineral is essential to understand and monitor the viability of the Company's assets.

Copper prices have historically fluctuated significantly. The closing price of copper as at November 12, 2010 was approximately US$4.0476/lb Cu.

Molybdenum prices have also historically fluctuated significantly. The closing price of molybdenum as at November 12, 2010 was approximately US$15.15/lb molybdenum oxide. Molybdenum prices were especially volatile during calendar 2005 and 2006 fluctuating between a high of US$40.00/lb and a low of US$22.00/lb molybdenum oxide.

In addition, most of the costs incurred by the Company are denominated in Australian dollars, Canadian dollars and Papua New Guinea kina. Revenue from product sales is expected to be quoted and earned in US dollars. The relative exchange rates of these currencies therefore affect the results of the operations of the Company.

4. Results of Operations

Quarter Ended September 30, 2010 Compared to Quarter Ended September 30, 2009

Revenue from continuing operations for the quarter ended September 30, 2010 was $115,941 (2009: $36,907) and is comprised primarily of interest revenue. The increase was primarily due to an increase in the balance of cash deposits earning interest as compared to the quarter ended September 30, 2009.

Exploration expenditure of $57,160 (2009: $2,116,205) has decreased as activity has focussed on the DFS at Yandera, with the majority of expenditure being capitalised.

Expenditure on the DFS in the quarter ended September 30, 2010 was $4,511,617 (2009: $264,563).

Salaries and employee benefits expense $557,293 (2009: $254,726) has increased primarily due to the recent activity associated with the DFS.

Share based payments expense for the quarter ended September 30, 2010 of $31,826 (2009: $53,076) resulted from that portion of the value of options issued to Directors, suppliers and employees that were vesting during the period.

Administration, corporate and other expenditure totalled $1,227,555 for the quarter ended September 30, 2010 (2009: $1,476,260) has decreased primarily as a result of foreign exchange rate fluctuations.

Marengo undertakes certain transactions denominated in foreign currencies and, as a result, is subject to volatility in exchange rates.

Inflation and price changes have not had a material impact on Marengo's revenues and net income or loss.

5. Summary of Quarterly/Half-Yearly Results

The following table sets out the financial results for the Company's most recently completed eight quarters. The financial data is derived from the Financial Statements.

Summary of Quarterly Results

	Quarter 30 September 2010	Quarter 30 June 2010	Quarter 31 March 2010	Quarter 31 December 2009	Quarter 30 September 2009	Quarter 30 June 2009	Quarter 31 March 2009	Quarter 31 December 2008
				(A$)				
Total revenue	115,941	59,498	21,938	42,429	36,907	51,540	55,792	344,205
Net loss	(1,757,893)	(4,284,746)	(3,533,389)	(4,147,598)	(3,863,360)	(2,357,280)	(3,340,710)	(5,404,237)
Basic loss per share (cents)	(0.3)	(0.9)	(0.7)	(0.8)	(1.1)	(0.9)	(1.2)	(2.0)
Diluted loss per share (cents)	(0.3)	(0.9)	(0.7)	(0.8)	(1.1)	(0.9)	(1.2)	(2.0)
Cash and cash equivalents	20,198,921	6,984,582	12,352,849	16,898,257	21,374,297	5,088,081	8,020,072	11,302,932
Total assets	43,332,758	25,769,730	28,279,381	32,863,993	37,458,419	22,326,229	26,103,476	29,335,551
Total long-term financial liabilities	Nil	Nil	Nil	Nil	Nil	Nil	Nil	Nil
Cash dividends declared per share	Nil	Nil	Nil	Nil	Nil	Nil	Nil	Nil

Marengo became a reporting issuer in April 2008. Prior to becoming a reporting issuer in Canada quarterly financial statements had not been prepared by Marengo as they are not required under the *Corporations Act Cth* (Australia).

Marengo primarily incurs costs in Australian dollars, Canadian dollars and Papua New Guinea kina and as such is subject to exchange rate risk. Over the last three months, movements in exchange rates were as follows:

	30 June 2010	30 September 2010	High – 1 July to 30 September 2010	Low – 1 July to 30 September 2010
AUD / CAD	0.8945	0.9986	0.9986	0.8918
AUD / PGK	2.2392	2.5889	2.5983	2.3531
AUD / USD	0.8482	0.9701	0.9726	0.8323

6. Discussion of Cash Flows

	Three Month Period Ended	
	30 September 2010	30 September 2009
	$	$
Cash flows from:		
Operating activities	**(850,120)**	(3,637,795)
Investing activities	**(6,111,095)**	(338,888)
Financing activities	**20,189,688**	20,321,605

Cash outflow from operating activities was $850,120 (2009: $3,637,795) for the quarter ended September 30, 2010 with the majority of expenditure for the current period being administration, and for the prior period being related to activity on mining tenements. The decrease in expenditure for the quarter ended September 30, 2010 is due to most exploration expenditure being associated with the DFS which is classified as cashflow from an investing activity.

Cash outflow from investing activities was $6,111,095 (2009: $338,888) for the quarter ended September 30, 2010. The majority of this expenditure related to the DFS.

Cash inflow from financing activities was $20,189,688 (2009: $20,321,605) being the net proceeds from share issues during the quarter.

7. Discussion of Financial Position

	30 September 2010	30 June 2010
	$	$
CURRENT ASSETS		
Cash and cash equivalents	**20,198,921**	6,984,582
Trade and other receivables	**564,156**	702,068
TOTAL CURRENT ASSETS	**20,763,077**	7,686,650
NON CURRENT ASSETS		
Other financial assets	**479,720**	468,028
Plant and equipment	**781,397**	760,945
Mining properties	**21,308,564**	16,854,107
TOTAL NON CURRENT ASSETS	**22,569,681**	18,083,080
TOTAL ASSETS	**43,332,758**	25,769,730
CURRENT LIABILITIES		
Trade and other payables	**3,369,205**	2,801,963
Provisions	**744,975**	524,249
TOTAL CURRENT LIABILITIES	**4,114,180**	3,326,212
TOTAL LIABILITIES	**4,114,180**	3,326,212
EQUITY	**39,218,578**	22,443,518

Cash and Cash Equivalents

Cash and cash equivalents increased to $20,198,921 at September 30, 2010 from $6,984,582 at June 30, 2010 primarily due to the funds raised from the issue of ordinary shares during the September 2010 quarter, and funds being expended in a manner consistent with the Company's business objectives.

Trade and Other Receivables

Trade and other receivables decreased to $564,156 as at September 30, 2010 as compared to $702,068 as at June 30, 2010 primarily due to a decrease in sundry receivables and prepayments.

Other Financial Assets (refer Section 11 – Transactions with Related Parties)

Other financial assets increased to $479,720 as at September 30, 2010 as compared to $468,028 as at June 30, 2010 due to the recognition of the fair value of the loan to Mr Les Emery.

Plant and Equipment

Plant and equipment increased to $781,397 as at September 30, 2010 as compared to $760,945 as at June 30, 2010 primarily due to purchases and depreciation of fixed assets in the normal course of business.

Mining Properties

Mining properties increased to $21,308,564 as at September 30, 2010 as compared to $16,854,107 as at June 30, 2010 primarily due to expenditure being capitalised in relation to the DFS.

Trade and Other Payables

Trade and other payables increased to $3,369,205 as at September 30, 2010 as compared to $2,801,963 as at June 30, 2010 primarily due to increased expenditures and timing of payments in respect of the Yandera Project.

Provisions

Provisions increased to $744,975 as at September 30, 2010 as compared to $524,249 as at June 30, 2010 primarily due to increase in staff leave entitlements during the quarter.

Equity

Equity increased to $39,218,578 as at September 30, 2010 as compared to $22,443,518 as at June 30, 2010 due to the net capital raising of $19,921,288 partially offset by a loss of $1,757,893 for the three months, and a decrease in reserves of $1,388,335 primarily due to unfavourable foreign exchange rate movements.

8. Liquidity and Capital Resources

The Company's principal requirements for cash over the next twelve months will be for the development of the Yandera Project, namely completion of the DFS.

The Company had a cash balance of $20,198,921 at September 30, 2010.

The Company's contractual obligations are set out below:

	Payments due by Period				
Contractual Obligations – A$	**Total**	**Less than 1 year**	**1 – 3 years**	**4 – 5 years**	**After 5 years**
Long term Debt	-	-	-	-	-
Operating Leases	743,342	674,705	68,637	-	-
Capital Lease Obligations	-	-	-	-	-
Purchase Obligations	-	-	-	-	-
Total Contractual Obligations	**743,342**	**674,705**	**68,637**	-	-

The Company has implemented a rigorous planning and budgeting process to help determine the funding requirements to support the Company's current operations and expansion and development plans. The Company's objective is to ensure that there are sufficient committed financial resources to meet its short term requirements.

As of the date of this MD&A the Company has cash and cash equivalents to assist financing its district exploration program and definitive feasibility study (DFS) on the Yandera Project and its general administrative expenses for the ensuing twelve month period.

The Company's ability to continue its operations in the normal course of business after the ensuing twelve months is dependent upon its ability to raise additional debt and/or equity.

In addition, if the DFS is positive, additional funding through a combination of equity and/or debt will be required to finance the development of the project, including construction of plant and other infrastructure, minimum pre-strip and working capital.

The success and pricing of any such capital raising and/or debt financing will be dependent upon the prevailing market conditions at the time, the outcome of the DFS or any other relevant feasibility studies and exploration programs. Although the Company has been successful in raising additional funds in the past, there is no assurance that it will be able to do so in the future.

9. Financial Instruments and Other Instruments

The Company is exposed to commodity price risk and foreign exchange risk in the normal course of its business operations.

The Company has not entered into any forward sales or hedging agreements for copper or molybdenum or any other metals.

The Company has not entered into any currency hedges in the ensuing period.

Currency hedges involve risks such as default by the other party, illiquidity and the extent to which the Company's assessment of certain market movements is incorrect and the risk that the use of hedges could result in losses greater than if hedging had not been used.

The risks associated with fluctuations in the price of metals and foreign exchange rates are managed by the Company's management, as determined from time to time, using detailed budgets, forecasts and mine plans, but the Company cannot guarantee the effectiveness of its present or future hedging practices.

10. Off-Balance Sheet Arrangements

There are no off-balance sheet arrangements as at September 30, 2010.

11. Transactions with Related Parties

On 11 June 2008, the Company entered into a loan agreement with the Managing Director, Les Emery, to lend $1,000,000 interest free for a 10 year loan term. The purpose of the loan was for Mr Emery to exercise 4,000,000 unlisted options expiring 30 November 2008. This agreement was approved by shareholders at the Company's general meeting on 28 November 2007.

The principal terms of the loan provide as follows:

- If Mr Emery's employment ceases for any reason other than death, permanent disability or removal from office, the loan becomes payable within one month of such cessation. If Mr Emery's employment ceases because of death, permanent disability or removal from office, the loan becomes payable within 6 months of such cessation. The Board retains discretion to extend these time periods;

- Any dividends must be applied to reduce the outstanding loan; and

- The loan is limited recourse. That is, in the event the shares obtained under the loan are sold for an amount less than the amount of the loan, the maximum amount Mr Emery will be required to repay is the amount of the sale proceeds. In this way, Mr Emery is protected against a decline in the Company's share price.

As at September 30, 2010 the loan to Mr Emery is still outstanding.

12. Critical Accounting Estimates

The accounting policies that involve significant management judgement and estimates are discussed in this section. For a complete list of the significant accounting policies, reference should be made to note 1(u) of the Year-End Financial Statements.

Share based payment transactions

The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by an internal valuation using a Black-Scholes option pricing model.

Exploration and evaluation costs

Exploration and evaluation costs are written off in the year they are incurred except for acquisition and feasibility costs which are carried forward where right of tenure of the area of interest is current and in respect of an area that has not at balance sheet date reached a stage that permits reasonable assessment of the existence of economically recoverable reserves. The application of this policy necessarily requires management to make certain estimates and assumptions as to future events and circumstances, in particular, an assessment of whether economic quantities of reserves have been found. Any such estimates and assumptions may change as new information becomes available.

13. Changes in Accounting Policies including Initial Adoption

The Company is assessing the impact of recently issued accounting pronouncements, which are not expected to be material, for the three month period ended September 30, 2010.

14. Risk Factors

The Company's risk factors are discussed in detail in the Company's AIF dated September 28, 2010 which is available on SEDAR at www.sedar.com and should be reviewed in conjunction with this document.

15. Outstanding Share Data

As at November 12, 2010, the only class of shares of the Company outstanding is ordinary shares. As at November 12, 2010, the Company had 738,810,863 ordinary shares outstanding and 85,101,050 options to acquire ordinary shares at various exercise prices.

16. Corporate Responsibility for Financial Reports

The Company's Managing Director (MD) and Chief Financial Officer (CFO) are responsible for establishing and maintaining the Company's disclosure controls and procedures and internal control over financial reporting. Access to material information with respect to the Company is facilitated by the small size of the Company's senior management team. The MD and CFO, after evaluating the effectiveness of the Company's disclosure controls and procedures as of September 30, 2010, have concluded that the Company's disclosure controls and procedures were adequate and effective to ensure that (i) material information relating to the Company is made known to them by others particularly during the period covered by this MD&A; (ii) the information required to be disclosed by the Company in its annual filings, interim filings or other reports filed or submitted by it under securities legislation is recorded, processed, summarized and reported, within the time periods specified in securities legislation, and (ii) provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. There were no changes in our internal control over financial reporting for the three months ended September 30, 2010, that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

17. Cautionary Note Regarding Forward-Looking Information

Certain information in this MD&A, including all statements that are not historical facts, constitutes forward-looking information within the meaning of applicable Canadian securities laws. Such forward-looking information includes, but is not limited to, information which reflect management's expectations regarding Marengo's future growth, results of operations (including, without limitation, future production and capital expenditures), performance (both operational and financial) and business prospects (including the timing and development of new deposits and the success of exploration activities) and opportunities. Often, this information includes words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate" or "believes" or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved.

In making and providing the forward-looking information included in this MD&A, the Company has made numerous assumptions. The assumptions include, among other things, assumptions regarding: (i) the accuracy of exploration results received to date; (ii) anticipated costs and expenses; (iii) the accuracy of the Company's mineral resource estimate; (iv) the future price of copper and molybdenum; and (v) that the supply and demand for copper, molybdenum, and other metals develop as expected.

Although management believes that the assumptions made and the expectations represented by such information are reasonable, there can be no assurance that the forward-looking information will prove to be accurate. By its nature, forward-looking information is based on assumptions and involves known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance or achievements, or industry results, to be materially different from future results, performance or achievements expressed or implied by such forward-looking information. Such risks, uncertainties and other factors include, among other things, the following: (i) need for additional financing to develop the Yandera Project; (ii) decreases in the price of copper and molybdenum; (iii) exploration risk; (iv) the risk that the Company will not obtain a renewal of exploration licence 1335; (v) dependence on the Yandera Project; and (vi) state equity interest.

This MD&A and the Company's AIF dated September 28, 2010 contain additional information on risks, uncertainties and other factors relating to the forward-looking information. Although the Company has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in the forward-looking information, there may be other factors that cause actual results, performances, achievements or events not to be as anticipated, estimated or intended. Also, many of the factors are beyond the Company's control. Accordingly, readers should not place undue reliance on forward-looking information. The Company undertakes no obligation to reissue or update forward-looking information as a result of new information or events after the date of, this MD&A except as may be required by law. All forward-looking information disclosed in this MD&A is qualified by this cautionary statement.

Additional information about the Company and its business activities is available under the Company's profile on SEDAR at www.sedar.com.

18. Scientific and Technical Information

The scientific and technical information contained in this MD&A was prepared by or under the supervision of Peter Dendle. Mr. Dendle is a member of the Australasian Institute of Mining and Metallurgy and a full-time employee of Marengo. Mr. Dendle is a "Qualified Person" as defined by National Instrument 43-101 "*Standards of Disclosure for Mineral Projects*" ("**NI 43-101**"). Mr. Dendle verified the data underlying the information in this MD&A prepared by him.

For a description of: (i) the quality assurance program and quality control measures applied during Marengo's work programs; (ii) a summary description of the geology, mineral occurrences and nature of mineralization found; (iii) a summary description of rock types, geological controls and dimensions of mineralized zones at the Yandera Project; and (iv) a summary description of the type of analytical or testing procedures utilized, sample size and the name and location of each analytical or testing laboratory used please refer to the revised and restated technical report on the Yandera Project originally dated December 2008 and revised and restated, January 2009, prepared by Stephen Godfrey, senior resource geologist of Golder Associates Pty Ltd (Australia).
