Note: Hong Kong Financial Reporting Standards ("HKFRS") do not permit leasehold land other than investment properties to be carried at valuation.

The Group considers that such treatment does not reflect the economic substance of its hotel property investments. Therefore the Group has presented supplementary unaudited financial information taking into account the fair market value of hotel properties and the corresponding deferred tax in addition to the net asset value based on the financial statements prepared in accordance with HKFRS.

The hotel properties in Hong Kong and Canada were revalued by Knight Frank and Grant Thornton Management Consultants respectively, independent professional valuers, on an open market value basis as at 31st March 2008.

Chairman's Statement

I am pleased to report the Group's result to the shareholders.

Group revenue for the year increased 7% to HK\$665 million (2007: HK\$619 million), and gross operating profit increased 23% to HK\$200 million. The consolidated profit attributable to shareholders for the year ended 31st March 2008 amounted to HK\$96 million (2007: HK\$28 million), which equaled to earnings per share of HK0.76 cent (2007: HK0.30 cent) per share.

Total borrowings were at HK\$984 million, and the gearing ratio measured against revalued net asset value is 25% (2007: 22%).

Our new project, Empire Hotel Causeway Bay is progressing, and the target opening time is in the first quarter of 2009. The renovation and expansion project for adding 28 rooms with spa facilities in our Empire Hotel Kowloon is also targeted to complete by end of 2008. In addition, our Vancouver Hotel is under planning for a renovation program for its room operations.

The Board proposes a final dividend of HK0.07 cent in scrip per share.

On behalf of the Board, I would like to express my gratitude to our staff for their invaluable contribution, and our customers, shareholders and the investment community for their support.

By Order of the Board

Results

The Group's revenue and profit attributable to shareholders for the twelve months ended 31st March 2008 amounted to HK\$665 million and HK\$96 million respectively. The increase in the profit attributable to shareholders over last year was in part due to fair value changes of financial liabilities at the balance sheet date.

Business Review

Visitor arrivals to Hong Kong in 2007 reached a record high of more than 28 million, an increase of 11.6% on 2006's arrivals. Arrivals from Mainland China passed the 15-million mark for the first time, 13.9% more than in 2006. Among the long-haul market regions, Europe, Africa and the Middle East led the field with arrivals growing by 14.2%, followed by The Americas and Australia, New Zealand and South Pacific. As for shorthaul markets, South & Southeast Asia enjoyed solid gain of 8.6% to become Hong Kong's second largest source market region. The cumulative arrivals for the first quarter of 2008 saw a 10% growth on the same period last year.

2008 Revenue by hotels

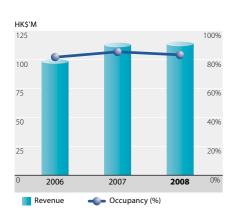

Empire Hotel Hong Kong

Empire Hong Kong's average room rate increased 6% and occupancy rate at 84%. Total revenue amounted to HK\$114 million whilst its gross operating profit increased 6% to HK\$73 million. The improved yield was primarily due to its strategic focus on higher yield commercial and corporate segment. With a number of refurbishment projects planned for in the coming year, the hotel would be in a promising position to earn market share further in the higher yield business segment.

Empire Hotel Hong Kong

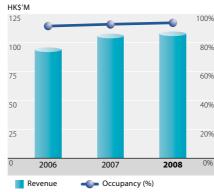

Empire Hotel Kowloon

Empire Hotel Kowloon

Empire Kowloon's average rate increased 5% while maintaining a very healthy occupancy rate of 94%, leading to increased revenue at HK\$108 million. Gross operating profit amounted to HK\$69 million. The expansion project for adding 28 rooms with spa facilities has commenced, and the target opening time is around end of 2008. These creations will further increase the hotel capacity by 9%, from 315 rooms to 343 rooms.

Empire Hotel Kowloon

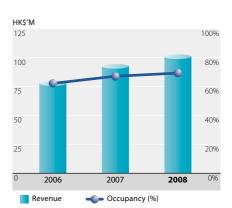

Empire Landmark Hotel Vancouver

Empire Landmark Hotel Vancouver

Empire Landmark's average rate remained the same for the year but occupancy improved 3% to 69%. Coupled with a strong Canadian dollar, total revenue increased HK\$8 million to HK\$101 million, up 9%. Gross operating profit also increased 10% to HK\$38 million. An extensive renovation and upgrading work has been planned to carry out progressively in the next 2 years to enhance its quality and facilities to be competitive among its peers.

Empire Landmark Hotel, the tallest hotel with the award-winning revolving "Cloud 9" restaurant in the heart of Vancouver, shall continue to reap the benefit of Canada's sustained economic growth in welcoming the 2010 Winter Olympics.

Empire Landmark Hotel Vancouver

The New 280 rooms hotel in Causeway Bay

Creation of this new hotel is approached with the application of advanced, intelligent, user-friendly concepts with green touch wherever possible, together with designer spa facilities that are completely complementary to our guests. Management considers this new hotel, upon delivery in 2009, will be exciting and appreciated by various segments in the travelling world.

The Group's room portfolio will increase 30% from the current 1,036 rooms to 1,344 rooms as a direct result.

TGI Friday's

Travel and Catering

Revenues for the travel and catering amounted to HK\$283 million and HK\$20 million respectively.

Financial Review

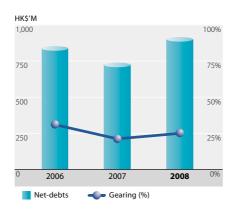

As at 31st March 2008, total assets amounted to HK\$3,190 million, increased 13% when compared with HK\$2,811 million as at 31st March 2007. Appraised by independent professional valuers on an open market value basis, the total revalued amount of the four hotel properties as at 31st March 2008 was HK\$4,455 million, up 9% when compared with that prepared on the same basis as at 31st March 2007.

The shareholders' funds amounted to HK\$2,068 million, increased by HK\$125 million over last year. The increase was mainly due to profit for the year and the conversion of all outstanding convertible bonds in April 2007, offset by a debit reserve from the issue of bonus warrants. Taking into account the market value of the hotel properties, the revalued net asset value of the Group would become HK\$3,599 million.

The Group has long term securities investment of HK\$314 million and other financial assets of HK\$88 million. This segment of business generated a profit of HK\$13 million, compared with a gain of HK\$2 million last year.

The consolidated net debt was HK\$900 million, increased by HK\$177 million when compared with that at 31st March 2007. The corresponding gearing on net asset value increased from 37% to the present 43%, and against revalued net asset value, from 22% to 25%. Subsequent to the balance sheet date, the Group has completed a 10 year new long term bank facility, part of which was to refinance its HK\$200 million short term borrowings then outstanding.

Gearing Ratio

86% of the total debt is denominated in HK dollar, the remaining is the Vancouver property mortgage loan of HK\$118 million (2007: HK\$136 million) that was borrowed in Canadian dollar, the local currency. Total interest rate swap contracts of HK\$300 million were entered for hedging purposes against our borrowings which are all at floating interest rate.

The aggregate net book value of hotel properties pledged as securities for loans of the Group as at 31st March 2008 amounted to HK\$2,583 million (2007: HK\$2,599 million).

Human Resources

As at 31st March 2008, the total number of employees of the Company and its subsidiaries were 421. In addition to salary payment, other additional benefits include insurance, medical scheme and retirement plans and others.

Options to subscribe for a total of 700,000,000 shares of the Company at an exercise price of HK\$0.13 per share were granted on 2nd April 2007 under the share option scheme. Up to 31st March 2008, none of the option shares granted have been exercised.

Future Prospects

The Group has performed well within buoyant hospitality markets in Hong Kong. With timely asset enhancement initiatives carried out by our hotels and the continuous economic growth in Mainland China, the Directors are confident in the medium to long term prospects of the Group.

Significant potential value is seen in the new 280 rooms' boutique hotel in Causeway Bay, which is anticipated to be in operation in the first quarter of 2009.

Prospects for our Vancouver hotel look equally optimistic because of the expected growth in Canada's tourism led by its sustained economic expansion, and in anticipation of the 2010 Winter Olympics.

Corporate governance practices

The Company is committed to raise its corporate governance standards by emphasising transparency, independence, accountability, responsibility and fairness. The Company exercises corporate governance through the Board of Directors ("Board") and various committees.

Board of Directors

The Board consists of five Executive Directors and three Independent Non-executive Directors. The posts of Chairman and Chief Executive are separate and are held by different individuals. The Chairman, Mr. Poon Jing is responsible for overseeing the functioning of the Board and the strategies and policies of the Group. The Chief Executive and Deputy Chairman, Dr. Lim Yin Cheng is responsible for managing the Group's business. The biographical details and relationship of the Directors are disclosed in the biography of Directors set out on page 16.

According to the Bye-laws of the Company, at every annual general meeting of the Company one-third of the Directors (other than the Chairman and the Managing Director) for the time being, or, if their number is not three or a multiple of three, then the number nearest to, but not exceeding one-third, shall retire from office by rotation. The Chairman and the Managing Director shall retire voluntarily at the Annual General Meeting every three years in accordance with the Code on Corporate Governance Practices. A retiring Director shall be eligible for re-election at the meeting. The Independent Non-executive Directors are not appointed for a specific term but are subject to rotation in accordance with the Bye-laws of the Company.

The Board meets quarterly and is responsible for the formulation and reviewing of long-term business directions and strategies, to monitor the operating and financial performance of the Group. It also considers and approves future strategic plans and budgets for the Group. The management is delegated with the authority to make decisions and responsible for daily operations of the Group under the leadership of the Chief Executive.

The management provides explanation and information to the Board to enable the Board to make an informed assessment of the financial and other information put forward to the Board for approval. The Chief Executive, working with the other Executive Directors and the head of each division, is responsible for managing the business of the Group, including implementation of strategies adopted by the Board and assuming full accountability to the Board for operations of the Group. All Executive Directors have made full and active contributions to the affairs of the Board.

The Directors are responsible for selecting and consistently applying appropriate accounting policies and preparing financial statements which give a true and fair view. The Directors are not aware of any material uncertainties relating to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern. Accordingly, the Directors have prepared the financial statements on a going concern basis.

The Board acknowledges that it is its responsibility to prepare the financial statements and to present a balanced, clear and comprehensive assessment to annual and interim reports, other financial disclosures required under the Rules Governing the Listing of Securities on the Stock Exchange (the "Listing Rules"), and reports to regulators as well as to information required to be disclosed pursuant to statutory requirements.

During the year, the Board held four meetings. The Directors of the Board and the attendance of each Director are as follows:

Remuneration Committee

The Remuneration Committee currently comprises the Chief Executive (who also act as the Chairman of the Remuneration Committee), and two Independent Non-executive Directors, Mr. Ip Chi Wai and Mr. Hung Yat Ming. The duties of the Committee includes making recommendations to the Board on the remuneration policy and structure of the Directors and senior management, approving the remuneration, determining the remuneration packages of all Executive Directors and senior management and approving the compensation to Directors and senior management on termination or dismissal. The remuneration packages including basic salary, annual bonus, retirement and other benefit such as share options are commensurate with their job nature and experience level.

During the year, the Remuneration Committee held one meeting, which all members had attended, to review, discuss and approve the remuneration packages of the Directors.

Audit Committee

The Audit Committee members currently comprise all the Independent Non-executive Directors, Mr. Hung Yat Ming (as Chairman), Mr. Leung Wai Keung, Richard and Mr. Ip Chi Wai. The terms of reference adopted by the Audit Committee are aligned with the recommendations set out in "A Guide for Effective Audit Committees" issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA"). The principal activities of the Audit Committee include the review and supervision of the Group's financial reporting process and internal controls. The Audit Committee meets at least twice a year for review of the annual financial statements and the unaudited interim financial statements. During the year, the Audit Committee met twice to review the Company's financial reporting and the recommendation by the auditor on the issues of internal control. All the members had attended the meetings.

The Audit Committee has reviewed the annual financial statements for the year ended 31st March 2008.

Investment Committee

The Group's securities investments activities were managed centrally at the corporate level by the Investment Committee. The Investment Committee members currently comprise three of the Executive Directors and the Group's authorised representative, Mr. Poon Jing (as Chairman), Dr. Lim Yin Cheng, Mr. Woo Wei Chun, Joseph and Mr. Lee Tai Hay, Dominic.

The principal activities of the Investment Committee include the decision making, review and supervision of the Group's investing activities. The Investment Committee meets at least twice a week.

Nomination of Directors

In considering the nomination of a new Director, the Board will take into account the qualification, ability, working experience, and professional ethics of the candidates. Currently the full Board is responsible for selection and approval of candidates for appointment as Executive Director to the Board. The Board will arrange meeting for nomination of Director on an as-needed basis.

Code of Conduct regarding securities transactions by directors

The Group has adopted its own Code for Securities Transactions by Directors on terms no less exacting than the required standard of dealings as set out in the Model Code for Securities Transactions by Directors of Listed Issuers (Appendix 10) of the Listing Rules. The Company has also made specific enquiry of the Directors and the Company was not aware of any non-compliance with the required standard of dealings and its code of conduct regarding securities transactions by Directors.

Code on Corporate Governance Practices

During the year, the Company has complied with the Code on Corporate Governance Practices as set out in Appendix 14 of the Listing Rules.

Internal Control

It is the responsibility of the Board to ensure that the Group maintains sound and effective internal controls to safeguard the shareholders' investments and the Group's assets. During the year, the Board reviewed the effectiveness of the internal control system of the Group. The review covered all material controls, including financial, operational and compliance controls and risk management functions of the Group.

Auditor's remuneration

PricewaterhouseCoopers has been appointed as the auditor of the Company by the shareholders at the annual general meeting. The services provided by PricewaterhouseCoopers include audit, taxation related and other services. An amount of HK\$2,193,000 (2007: HK\$1,736,000) was charged to the financial statements of the Group for their audit services. Taxation services fees, capital market transactions, review on interim results and other services provided by PricewaterhouseCoopers to the Group amounted to HK\$216,000 (2007: HK\$1,330,000).

Investor relationship

The Group aims to provide its shareholders and investors with high level of transparency. During the year, the Executive Directors had a lot of meetings with various investors and analysts. The Board is committed to providing clear and full performance information of the Group to shareholders and the investment community through the publication of interim and annual reports, announcements, circulars and press releases.

The Company has also maintained a website at http://www.asiastandardhotel.com which enables shareholders, investors and public to access to the information of the Company on a timely basis.

Share option scheme

The share option scheme of the Company adopted on 24th May 2000 ("Old Share Option Scheme") has been terminated pursuant to an ordinary resolution passed at the annual general meeting of the Company held on 28th August 2006 ("2006 AGM") without prejudice to the rights and benefits of and attached to those option granted thereunder which are outstanding as at that date. At the 2006 AGM, an ordinary resolution was duly passed under which a new share option scheme ("New Share Option Scheme") was adopted and approved by shareholders. According to the New Share Option Scheme, the Board of the Company may grant share options to any director, employee, consultant, customer, supplier, agent, partner or advisers of or contractor to the Company, its subsidiary or any invested entity, their discretionary trust or the companies owned by them. The purpose was to provide incentives, recognise and acknowledge the contributions of, motivate and maintain and ongoing relationship with the eligible participants whose contributions are or will be beneficial to the long term growth of the Group.

The total number of shares available for issue upon exercise of all share options to be granted under the New Share Option Scheme must not exceed 1,250,880,615 shares, representing about 9.7% of the shares in issue at the date of this report. The total maximum number of shares which might be issued upon exercise of all outstanding options granted and yet to be exercised under the New Share Option Scheme and any other share option scheme must not exceed 30% of the shares in issue from time to time. The maximum number of shares in respect of which share options might be granted to a participant, when aggregated with shares issued and issuable (including exercised, outstanding and cancelled share options) under any share option granted to the same participant under the New Share Option Scheme or any other share option scheme within any 12 months period, must not exceed 1% of the shares in issue from time to time.

There was no requirement for a grantee to hold the share option for a certain period before exercising the share option unless otherwise determined by the Directors. The exercisable period should be any period determined by the Board but in any event the exercise period should be no later than 10 years from the date of grant. The grantee has to accept an option within 21 days from the date of offer by making a non-refundable payment of HK\$1 to the Company.

The subscription price shall be at the discretion of the Board provided that it shall be not less than the highest of (i) the closing price of a share on the relevant date of grant; (ii) the average of the closing prices of the shares for the five trading days immediately preceding the date of grant; and (iii) the nominal value of a share. The New Share Option Scheme is effective for 10 years from 28th August 2006.

On behalf of the Board

POON JING

Chairman

Hong Kong, 10th July 2008

Independent Auditor's Report

To the Shareholders of Asia Standard Hotel Group Limited

(incorporated in Bermuda with limited liability)

We have audited the consolidated financial statements of Asia Standard Hotel Group Limited (the "Company") and its subsidiaries (collectively, the "Group") set out on pages 32 to 90, which comprise the balance sheets of the Company and of the Group as at 31st March 2008, and the consolidated profit and loss account, the consolidated cash flow statement and the consolidated statement of changes in equity for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Directors' responsibility for the financial statements

The Directors of the Company are responsible for the preparation and the true and fair presentation of these consolidated financial statements in accordance with Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants and the disclosure requirements of the Hong Kong Companies Ordinance. This responsibility includes designing, implementing and maintaining internal control relevant to the preparation and the true and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit and to report our opinion solely to you, as a body, in accordance with Section 90 of the Companies Act 1981 of Bermuda and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and true and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Company and of the Group as at 31st March 2008 and of the profit and cash flows of the Group for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the disclosure requirements of the Hong Kong Companies Ordinance.

1 Basis of preparation

The financial statements have been prepared under the historical cost convention as modified by the revaluation of financial assets at fair value through profit or loss, available-for-sale investments, and financial liabilities (including warrant liabilities and derivative financial instruments), which are carried at fair value, and in accordance with Hong Kong Financial Reporting Standards ("HKFRS").

The preparation of financial statements in conformity with HKFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 4.

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the year presented, unless otherwise stated.

2 Principal accounting policies

(a) The adoption of new/revised HKFRS

During the year, the Group adopted the new standard, amendment and interpretations of HKFRS below, which are relevant to its operations.

HKAS 1 (Amendment) Presentation of Financial Statements: Capital Disclosures

HK (IFRIC) – Int 8 Scope of HKFRS 2

HK (IFRIC) – Int 9 Reassessment of Embedded Derivatives

HK (IFRIC) – Int 11 HKFRS 2 – Group and Treasury Share Transactions

HKFRS 7 Financial Instruments: Disclosures

The Group has assessed the impact of the adoption of these standard, amendment and interpretations and considered that there were no significant impact on the Group's results and financial position and no substantial changes in the Group's accounting policies, except that additional disclosures relating to capital management and financial instruments are required under HKAS 1 (Amendment) and HKFRS 7 respectively.

2 Principal accounting policies (continued)

(a) The adoption of new/revised HKFRS (continued)

Standards, interpretations and amendments to existing standards that are not yet effective

HKFRS 2 (Amendment) Share-based Payment – Vesting Conditions and Cancellations

HKFRS 8 Operating Segments

Effective from 1st July 2009

HKAS 27 (Revised) Consolidated and Separate Financial Statements

HKFRS 3 (Revised) Business Combination

The Group has not early adopted the above standards, amendments and interpretations and is not expected to have substantial changes to the Group's accounting policies and presentation of the financial statements.

(b) Basis of consolidation

The consolidated financial statements of the Group incorporate the financial statements of the Company and all its subsidiaries made up to 31st March.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

2 Principal accounting policies (continued)

(b) Basis of consolidation (continued)

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Group. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interests. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference, being negative goodwill is recognised directly in the consolidated profit and loss account.

The profit or loss on disposal of subsidiaries, is calculated by reference to the net assets at the date of disposal including the attributable amount of goodwill which remains unamortised and any related exchange reserve.

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the accounting policies adopted by the Group.

Minority interests represent the interests of outside shareholders in the operating results and net assets of subsidiaries.

(c) Subsidiaries

Subsidiaries are all entities (including special purpose entities) companies in which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

In the Company's balance sheet, the investments in subsidiaries are stated at cost less provision for impairment losses. The results of subsidiaries are accounted for by the Company on the basis of dividends received and receivable.

2 Principal accounting policies (continued)

(d) Segment reporting

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments. A geographical segment is engaged in providing products or services within a particular economic environment that are subject to risks and returns that are different from those of segments operating in other economic environments.

(e) Property, plant and equipment

Property, plant and equipment are stated at historical cost less accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items and other costs incurred to bring the asset into its existing use and location.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are expensed in the profit and loss account during the financial period in which they are incurred.

Depreciation is calculated using straight-line method to allocate the cost to their residual values over their estimated useful lives, as follows:

Hotel buildings in Hong Kong Lower of underlying land lease term or 50 years

Hotel buildings in Overseas 25 years
Plant and equipment 3 – 10 years

The assets' residual values and useful lives are reviewed and adjusted if appropriate, at each balance sheet date.

The gain or loss on disposal of an asset is the difference between the net sales proceeds and the carrying amount of the relevant asset, and is recognised in the profit and loss account.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Freehold land is accounted for as property, plant and equipment and stated at cost less impairment. No amortisation is provided for freehold land.

2 Principal accounting policies (continued)

(f) Goodwill

Goodwill represents the excess of the cost of acquisition over the fair values of the Group's share of the net identifiable assets of the acquired subsidiaries at the date of acquisition. Goodwill on acquisition of a foreign operation is treated as an asset of the foreign operation and translated at closing rate.

Goodwill on acquisition of a subsidiary is included in intangible assets. Goodwill is tested annually for impairment as well as when there is indication for impairment and carried at cost less accumulated impairment losses.

Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. Impairment losses recognised on goodwill are not reversed.

(g) Inventories

Inventories comprise primarily food, beverages and operating supplies and are stated at the lower of cost and net realisable value. Cost is calculated on the weighted average basis. Net realisable value is the estimated selling price in the ordinary course of business, less selling expenses.

(h) Impairment of assets

Assets that have an indefinite useful life and are not subject to depreciation or amortisation are at least tested annually for impairment and are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Assets that are subject to depreciation or amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows. Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

(i) Financial assets

The Group classifies its investments in the following categories: financial assets at fair value through profit or loss, loans and receivables, available-for-sale investments and derivative financial instruments. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and re-evaluates this designation at every reporting date.

2 Principal accounting policies (continued)

(i) Financial assets (continued)

(i) Financial assets at fair value through profit or loss

This category has two sub-categories: financial assets held for trading, and financial assets designated at fair value through profit or loss at inception. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term or if so designated by management. Derivatives are also categorised as held for trading unless they are designated as hedges. Assets in this category are classified as current assets if they are either held for trading or are expected to be realised within 12 months of the balance sheet date.

(ii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a debtor with no intention of trading the receivable. They are included in current assets, except for maturities greater than 12 months after the balance sheet date. These are classified as non-current assets.

(iii) Available-for-sale investments

Available-for-sale investments are non-derivatives that are either designated in this category or not classified in any of the other categories. These are classified as non-current assets.

Purchases and sales of investments are recognised on trade-date – the date on which the Group commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognised at fair value and transaction costs are expensed in the profit and loss account. Investments are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership. Financial assets at fair value through profit or loss and available-for-sale investments are subsequently carried at fair value. Loans and receivables are carried at amortised cost using the effective interest method.

Gains and losses arising from changes in the fair value of the "financial assets at fair value through profit or loss" category including interest and dividend income are included in the profit and loss account in the period in which they arise. Dividends on available-for-sale equity instruments are recognised in the profit and loss account as part of income when the Company's right to receive payments is established. Change in the fair value of available-for-sale investments are recognised in equity. When securities classified as available-for-sale are sold or impaired, the accumulated fair value adjustments recognised in equity are included in the profit and loss account as gains and losses from investments.

2 Principal accounting policies (continued)

(i) Financial assets (continued)

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity securities classified as available-for-sale, a significant or prolonged decline in the fair value of the securities below its cost is considered as an indicator that the securities are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in the profit and loss – is removed from equity and recognised in the profit and loss account. Impairment losses recognised in the profit and loss account on equity instruments are not reversed through the profit and loss account. Impairment test of trade receivables is described in note 2(p).

Derivatives financial instruments mainly represents interest rate swaps and forward foreign exchange contracts are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value.

Certain derivative instruments do not qualify for hedge accounting. Changes in the fair value of derivative instruments are recognised immediately in the profit and loss account.

(j) Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Transaction costs are incremental costs that are directly attributable to the initiation of the borrowings, including fees and commissions paid to agents, advisers, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the profit and loss account over the period of the borrowings using the effective interest method.

The fair value of the liability portion of a convertible bond is determined using a market interest rate for an equivalent non-convertible bond. This amount is recorded as a liability on an amortised cost basis until extinguished on conversion or maturity of the bonds. The remainder of the proceeds is allocated to the conversion option. This is recognised in equity, net of tax.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

2 Principal accounting policies (continued)

(k) Current and deferred income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company's subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, if the deferred income tax is not accounted for if it arises from initial recognition of an asset or a liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

(I) Provisions

Provisions are recognised when there is a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made. Provisions are not recognised for future operating losses.

(m) Finance leases

Assets leased under agreements that transfer substantially all the risks and rewards incident to ownership of the relevant assets to the Group are classified as finance leases. At the inception of a finance lease, the fair value of the asset or, if lower, the present value of the minimum lease payments is capitalised as a property, plant and equipment; the corresponding obligations, net of finance charges, is included under long term liabilities. Gross rental payable in respect of finance leases are apportioned between interest charges and a reduction of the lease obligations based on the interest rates implicit in the relevant leases.

2 Principal accounting policies (continued)

(n) Operating leases

Leases on which a significant portion of risks and rewards of ownership of assets are retained by the lessors are accounted for as operating leases. Receipts or payments made under operating leases net of incentives received from the lessors, are charged to the profit and loss account on a straight line basis over the terms of the leases.

(o) Leasehold land

The up-front prepayments made for leasehold land are amortised on a straight-line basis over the period of the lease and are charged to profit and loss account. In the course of hotel properties conversion, the amortisation charge of leasehold land is included as part of the costs of hotel properties under conversion. Where there is impairment, impairment are expensed in the profit and loss account.

(p) Trade and other receivables

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of trade and other receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the receivable is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the assets is reduced through the use of an allowance account, and the amount of the loss is recognised in the profit and loss account within administrative expenses. When a receivable is uncollectible, it is written off against the allowance account for receivables. Subsequent recoveries of amounts previously written off are credited against administrative expenses in the profit and loss account. Trade and other receivables in the consolidated balance sheet are stated net of such provision.

(q) Revenue recognition

Revenue comprises the fair value of the consideration received or receivable for the sales of goods and services in ordinary course of the Group's activities. Revenue is shown, net of returns, rebates and discounts and after eliminating sales within the Group. Revenue is recognised as follows:

Revenue from hotel and catering operations is recognised upon provision of services.

Operating lease rental income is recognised on a straight line basis over the term of the lease.

2 Principal accounting policies (continued)

(q) Revenue recognition (continued)

Revenue from sale of air tickets and hotel reservation service is recognised when the related services are rendered.

Interest income is recognised on a time proportion basis using the effective interest method.

Dividend income is recognised when the right to receive payment is established.

(r) Translation of foreign currencies

(i) Functional and presentation currency

Items included in the financial statements of the Group's companies are measured using the currency of the primary economic environment in which the Group's companies operates (the "functional currency"). The financial statements are presented in Hong Kong Dollars, which are the Company's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit and loss account.

Changes in the fair value of monetary securities denominated in foreign currency classified as available for sale are analysed between translation differences resulting from changes in the amortised cost of the securities and other changes in the carrying amount of the securities. Translation differences related to changes in the amortised cost are recognised in profit or loss, and other changes in the carrying amount are recognised in equity.

Translation differences on non-monetary financial assets and liabilities are reported as part of the fair value gain or loss. Translation differences on non-monetary financial assets and liabilities such as equities held at fair value through profit or loss are recognised in profit or loss as part of the fair value gain or loss. Translation differences on non-monetary financial assets such as equities classified as available-for-sale are included in the fair value reserve in equity.

2 Principal accounting policies (continued)

(r) Translation of foreign currencies (continued)

(iii) Group companies

The results and financial position of all the group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (a) assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet:
- (b) income and expenses for each profit and loss account are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- (c) all resulting exchange differences are recognised as a separate component of equity.

On consolidation, exchange differences arising from the translation of the net investment in foreign operations, and of borrowings and other currency instruments designated as hedges of such investments, are taken to equity. When a foreign operation is sold, exchange differences that were recorded in equity are recognised in the profit and loss account as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

(s) Employee benefits

(i) Employee leave entitlements

Employee entitlements to annual leave and long service leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave and long service leave as a result of services rendered by employees up to the balances sheet date.

Employee entitlements to sick leave and maternity leave are not recognised until the time of leave.

2 Principal accounting policies (continued)

(s) Employee benefits (continued)

(ii) Retirement benefit obligations

The Group contributes to several defined contribution retirement benefit schemes which are available to employees. The assets of the schemes are held separately from those of the Group in independently administered funds. The Group's contributions to these schemes are expensed as incurred.

(iii) Share-based compensation

The Group operates an equity-settled, share-based compensation plan. The fair value of the employee services received in exchange for the grant of the options is recognised as an expense. The total amount to be expensed over the vesting period is determined by reference to the fair value of the options granted, excluding the impact of any non-market vesting conditions (for example, profitability and sales growth targets). Non-market vesting conditions are included in assumptions about the number of options that are expected to become exercisable. At each balance sheet date, the Company revises its estimates of the number of options that are expected to become exercisable. It recognises the impact of the revision of original estimates, if any, in the consolidated profit and loss account with a corresponding adjustment to equity.

The proceeds received net of any directly attributable transaction costs are credited to share capital (nominal value) and share premium when the options are exercised. The amount of share options reserve is transferred to revenue reserve when the options are lapsed.

(t) Borrowing costs

Borrowing costs incurred on hotel properties under development that necessarily take a substantial period of time to get ready for their intended use are capitalised as part of the cost of the properties under development.

All other borrowing costs are recognised in the consolidated profit and loss account in the year in which they are incurred.

(u) Trade payables

Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

(v) Warrant liabilities

Warrant liabilities are initially recognised at fair value on the date of grant and are subsequently remeasured at fair value. Changes in the fair value of warrant liabilities are recognised in the consolidated profit and loss account.

2 Principal accounting policies (continued)

(w) Dividend distribution

Dividend distribution to the Company's shareholders is recognised as a liability in the Group's financial statements in the period in which the dividends are approved by the Company's shareholders or Directors as applicable.

(x) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

(y) Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts.

(z) Related parties

Related parties are individuals and companies, including subsidiaries, fellow subsidiaries and key management (including close members of their families), where the individual, Company or Group has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions.

3. Financial risk management and fair value estimation

3.1 Financial risk management

The Group's activities expose it to a variety of financial risks: market risk (including currency risk and price risk), credit risk, liquidity risk and interest rate risk. The Group's overall risk management focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. The Group uses derivative financial instruments to hedge certain risk exposures.

(a) Market risk

(i) Foreign exchange risk

The Group operates mainly in Hong Kong and has limited exposures to foreign exchange risk arising from future commercial transactions, recognised assets and liabilities and net investments in foreign operations.

The Group has certain investments in foreign operations in Canada and Mainland China, whose net assets are exposed to foreign currency translation risk. Currency exposure arising from the net assets of the Group's foreign operations in Canada is managed primarily through borrowings denominated in the relevant foreign currency.

At 31st March 2008, the Group had outstanding HK\$20,110,000 (2007: Nil) Japanese Yen loan, if the Hong Kong dollar had strengthened/weakened by 1% against the Japanese Yen with all other variables held constant, post tax profit for the year would have been HK\$166,000 (2007: Nil) higher/lower.

3. Financial risk management and fair value estimation (continued)

3.1 Financial risk management (continued)

(a) Market risk (continued)

(ii) Price risk

The Group is exposed to equity securities price risk because investments held by the Group are classified on the consolidated balance sheet as financial assets at fair value through profit or loss, available-for-sale investments and derivative financial instruments for purchase of listed securities. The Group is not exposed to commodity price risk.

The Group's equity investments in equity of other entities are publicly traded in the Hong Kong Stock Exchange. For every 1% increase/decrease in the prices of financial assets at fair value through profit or loss and available-for-sale investments, post tax profit for the year and equity would increase/decrease by HK\$727,000 (2007: HK\$216,000) and HK\$2,590,000 (2007: Nil) respectively.

The Group's derivative financial instruments and warrants are not publicly traded in the Hong Kong Stock Exchange. For every 1% increase/decrease in price of the underlying shares with all other variables held constant, post tax profit for the year would increase/decrease HK\$424,000 (2007: Nil) and HK\$695,000 (2007: Nil) respectively.

(b) Credit risk

The Group has no significant concentrations of credit risk. Sales are either made in cash, via major credit cards or to customer with appropriate credit history. Cash transactions are limited to high-credit-quality financial institutions.

Customers are assessed and rated based on the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set by management and the utilisation of credit limits is regularly monitored. No credit limit was exceeded during the year, and management does not expect any significant losses from non-performance by these relevant parties.

For bank balances and cash, the Group has limited its credit exposure by restricting their selection of financial institutions on those reputable banks with good credit ratings.

The maximum exposure to credit risk at the reporting date is the carrying value of total unimpaired trade and other receivables, and bank balances and cash in the consolidated balance sheet.

(c) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. The Group maintains flexibility in funding by keeping committed credit lines available.

The relevant maturity groupings on the contractual undiscounted cash flows based on the remaining period at the balance sheet date to the contractual maturity date of the Group's and the Company's financial liabilities and net-settled derivative financial liabilities are analysed elsewhere in the financial statement. Balance due within 12 months equal their carrying balances as the impact of discounting is not significant.

3. Financial risk management and fair value estimation (continued)

3.1 Financial risk management (continued)

(c) Liquidity risk (continued)

Certain borrowings were refinanced subsequent to year end. Details are set out in note 35.

Management monitors rolling forecasts of the Group's liquidity reserve comprises undrawn borrowing facility and cash and cash equivalents (note 23) on the basis of expected cash flow.

(d) Interest rate risk

The Group's interest rate risk arises from loans receivable and borrowings issued at variable rates.

The Group manages certain of its interest rate risk from borrowings by limited use of floating-to-fixed interest-rate swaps. Such interest-rate swaps have the economic effect of converting borrowings from floating rates to fixed rates.

3.2 Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Group monitors capital on the basis of the gearing ratio against net assets and revalued net assets. Net assets ("Net assets") are the net assets as shown in the consolidated balance sheet prepared in accordance with HKFRS where revalued net assets ("Revalued net assets") are prepared having taken into account the fair value of hotel properties, net of relevant deferred taxes, in addition to the Net assets. According to the Group's accounting policies, no properties other than investment properties are to be carried at valuation. Details of the valuation of the hotel properties, prepared for readers' information only, are set out in note 16(f) to the financial statements.

The gearing ratio against Net assets is calculated as net debt divided by Net assets and the gearing ratio against Revalued net assets is calculated as net debt divided by Revalued net assets. Net debt is calculated as total borrowings (including current and non-current borrowings as shown in the consolidated balance sheet) less bank balances and cash.

3. Financial risk management and fair value estimation (continued)

3.2 Capital risk management (continued)

The gearing ratios at 31st March 2008 and 2007 were as follows:

| | 2008 | 2007 |
|---|-----------|-----------|
| | HK\$'000 | HK\$'000 |
| Tatal hamanin an (anta 20) and an annutible hands (anta 20) | 002.742 | 701 000 |
| Total borrowings (note 28) and convertible bonds (note 30) | 983,743 | 791,809 |
| Less: Bank balances and cash (note 23) | (84,116) | (68,861) |
| | | |
| Net debt | 899,627 | 722,948 |
| | | |
| Net assets | 2,068,287 | 1,942,641 |
| Gearing ratio against net assets | 43% | 37% |
| Revalued net assets | 3,599,000 | 3,347,000 |
| Gearing ratio against Revalued net assets | 25% | 22% |

3.3 Fair value estimation

The fair values of financial instruments traded in active markets are based on quoted market price at the balance sheet date. The quoted market price used for financial assets held by the Group is the current bid price; the appropriate quoted market price for financial liabilities is the current ask price.

The fair values of financial instruments that are not traded in an active market are determined by using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Quoted market prices or dealer quotes for similar instruments are used for long term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows. The fair value of foreign exchange contract is determined using forward exchange rates at the balance sheet date.

The carrying amounts of trade and other receivables, financial assets at fair value through profit or loss, derivative financial instruments, bank balances and cash and trade and other payables are assumed to approximate their fair values. The fair value of other financial assets and liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

4. Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom be equal to related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are set out below:

(a) Impairment of assets

The Group tests annually whether goodwill has suffered any impairment. Other assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets exceeds its recoverable amount. The recoverable amounts of an asset or a cash-generating unit have been determined based on value-in-use calculations. These calculations require the use of estimates.

(b) Income taxes

The Group is subject to income taxes in Hong Kong and other jurisdictions. Judgment is required in certain provision for income taxes for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for potential tax exposures based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax provisions in the period in which such determination is made.

Recognition of deferred tax assets, which principally relate to tax losses, depends on management's expectation of future taxable profits that will be available against which tax losses can be utilised. The outcome of their utilisation may be different.

(c) Fair value of warrants

The fair value of warrants that are not traded in an active market is determined by using valuation techniques. The Group uses Lattice model and make assumptions that are mainly based on market conditions existing at each balance sheet date.

(d) Share options valuation

The significant inputs into the Binomial option pricing model were share price of HK\$0.13 at the grant date, exercise price of HK\$0.13, implied life of options of 1.6 years, annual risk-free interest rate of 4.302% and 1 year annualised daily volatility rate.

(e) Fair values of derivative financial instruments

The fair values of derivative financial instruments that are not traded in active markets are determined by using valuation techniques. Where valuation techniques are used to determine fair values, they are validated and periodically reviewed by qualified personnel independent of the area that created them. All models are calibrated to ensure that outputs reflect actual data and comparative market prices. To the extent practical, models use only observable data, however areas such as credit risk, volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect the fair values of derivative financial instruments.

(b) Segment information

Primary reporting format – business segments

The Group is organised into the following main business segments:

Hotel operation – hotel operation in Hong Kong and Canada

Catering services – restaurant operation in Hong Kong and Mainland China

Travel agency – sale of air tickets and hotel reservation service in Hong Kong

Investment – Investment in financial instruments

There is no other significant identifiable separate business segment. In accordance with the Group's internal financial reporting and operating activities, the primary reporting is by business segments and the secondary reporting is by geographical segments. Segment assets consist primarily of property, plant and equipment, leasehold land, inventories, trade and other receivables, available-for-sale investments and derivative financial instruments, excluding deferred income tax assets, bank balances and cash. Segment liabilities comprise trade and other payables and derivative financial instruments for purchase of listed securities, excluding borrowings, current income tax payable, warrant liabilities, convertible bonds, interest rate swaps, and bank overdrafts.

| | | |
| | 110,422 | 91,342 |

Share option expenses are included in other income and charges in the consolidated profit and loss account. The remaining staff costs are included in cost of sales and administrative expenses.

The Group participates in defined contribution schemes for employees, namely the Mandatory Provident Fund ("MPF") Scheme and Occupational Retirement Scheme Ordinance ("ORSO") Scheme in Hong Kong and Canada Pension Plan ("CPP") in Canada.

In Hong Kong, the Group participates in defined contribution schemes under the ORSO which are available to employees joining before 1st December 2000. Under these schemes, contributions of 5% of the employee's monthly salaries are made by the employees and by the Group. The Group's contributions may be reduced by contributions forfeited by those employees who leave the schemes prior to vesting fully in the contributions. There were no fortfeitures utilised (2007: Nil) for the year. As at 31st March 2008, no forfeitures (2007: Nil) were available to reduce the Group's future contributions to the ORSO schemes.

The Group also participates in the MPF scheme which are available to all employees not joining the ORSO schemes in Hong Kong, and in the CPP organised by the Canadian Government for all employees in Canada. Monthly contributions to the MPF scheme and CPP are made equal to 5% (2007: 5%) or a fixed sum and 4.95% (2007: 4.95%) respectively, of the employee's relevant income in accordance with the local legislative requirements.

The assets of all retirement schemes are held separately from those of the Group in independently administered funds.

The Group also contributes to retirement plans for its employees in Mainland China at a percentage of applicable payroll costs in compliance with the requirements of the relevant municipal government in Mainland China.

The Group's contributions to all these schemes are expensed as incurred.

Share option schemes

The Company has a share option scheme whereby share options may be granted to employees of the Group including the Directors to subscribe for shares of the Company. Consideration to be paid on each grant of share option is HK\$1.

The movement of share options outstanding during the year is as follows:

| | | | Number of share options | | | |
|--|--------------------------|-------------------|----------------------------------|--|---------------------------------------|--------------------------------------|
| Exercise price Date of grant per share | Exercise price per share | Expiry date | outstanding at 1st April 2007 | granted during the year (note a) | lapsed during the year (note d) | outstanding at 31st March 2008 |

| | | | 244,465,909 | 700,000,000 | (84,465,909) | 860,000,000 |

Notes:

- (a) The fair value of options granted during the year determined using the Binomial option pricing model was HK\$22,400,000 (2007: HK\$7,680,000). The significant inputs into the model were share price of HK\$0.13 at the grant date, exercise price of HK\$0.13, implied life of options of 1.6 years, annual risk-free interest rate of 4.3% and 1 year annualised daily volatility rate (notes (b) and (c)).
- (b) The volatility measured at the standard deviation of expected share price returns is based on statistical analysis of daily share prices over one year immediately preceding the grant date.
- (c) The calculation of the fair values of share options granted in April 2007 is based on the assumption that there is no material difference between the expected volatility over the whole life of the options and the historical volatility of the shares.
- (d) The fair value of HK\$2,840,000 (2007: Nil) in respect of the share options lapsed during the year was transferred from share options reserve to revenue reserve.

Save as disclosed above no option was exercised or cancelled during the year.

| Temporary differences not recognised | 570 | (3,154) |
| Income tax expense | 13,952 | 10,345 |

13. Profit attributable to shareholders

The profit attributable to shareholders is dealt with in the financial statements of the Company to the extent of profit of HK\$130,767,000 (2007: HK\$79,742,000).

14. Dividends

| | 2008 | 2007 |
|---|----------|----------|
| | HK\$'000 | HK\$'000 |

| | | |
| | 42,141 | 57,125 |

At a meeting held on 10th July 2008, the Board has proposed the payment of a final dividend of HK0.07 cent per share in scrip. This proposed dividend is not reflected in the financial statements, but will be reflected as an appropriation of revenue reserve in the year ending 31st March 2009.

15. Earnings per share

The calculation of basic earnings per share is based on the profit attributable to shareholders of HK\$96,270,000 (2007: HK\$27,605,000) and on the weighted average of 12,605,196,985 (2007: 9,270,960,859) shares in issue during the year ended 31st March 2008.

The outstanding warrants and share options did not have dilutive effect on the earnings per share for the year ended 31st March 2008.

The diluted earnings per share is equal to the basic earnings per share for the year ended 31st March 2008.

The calculation of diluted earnings per share for the year ended 31st March 2007 was based on the profit attributable to shareholders of HK\$27,605,000 and 9,631,039,137 shares equalling to the weighted average number of 9,270,960,859 shares in issue during the year plus 360,078,278 potential shares deemed to be in issue assuming the convertible bonds had been converted.

The outstanding share options did not have dilutive effect on the earnings per share for the year ended 31st March 2007.

| | 37,099 | 40,023 |

22. Trade and other receivables (continued)

(b) The majority of past due but not impaired trade receivables are less than 120 days. These relate to a number of independent customers for whom there is no recent history of default. The ageing analysis of these trade receivables is as follows:

| | 2008 | 2007 |
|-----------------------------|----------|----------|
| | HK\$'000 | HK\$'000 |
| | | |
| 0 – 60 days | 9,013 | 8,497 |

| | | | |
| | 37,099 | 40,023 | |

- (f) Other receivables include loans receivable of HK\$30,000,000 (2007: Nil) which were interest bearing at 2% above prime rate per annum and repayable within one year.
- (g) The creation and release of provision for impaired receivables have been included in "administrative expenses" in the profit and loss account. Amounts charged to the allowance account are generally written off when there is no expectation of recovering additional cash.
- (h) The other classes within trade and other receivables do not contain impaired assets.
- (i) The maximum exposure to credit risk at the reporting date is the fair value of each class of receivable mentioned above.

⁽e) The effective interest rates of the borrowings at the balance sheet date ranged from 1.29% to 4.95% (2007: 4.53% to 7%) per annum. The interest rates of the borrowings are not subject to contractual repricing.

⁽f) The carrying amount of borrowings approximate their fair values.

29. Deferred income tax

Deferred income tax is calculated in full on temporary differences under the liability method using applicable tax rates prevailing in the countries in which the Group operates.

The movement of the net deferred income tax assets is as follows:

| | Group | | |
|---|----------|----------|--|
| | 2008 | | |
| | HK\$'000 | HK\$'000 | |

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to set off current income tax assets with current income tax liabilities and when the deferred income tax relates to the same authority. The following amounts, determined after appropriate offsetting, are shown separately on the balance sheet.

| | Group |) | Compa | any |
|---------------------------------|----------|----------|----------|----------|
| | 2008 | 2007 | 2008 | 2007 |
| | HK\$'000 | HK\$'000 | HK\$'000 | HK\$'000 |

| Deferred income tax liabilities | (2,607) | - | | |
| | 16,276 | 30,372 | 137 | 137 |
| | | ** | | |

Deferred income tax assets are recognised for tax loss carry forwards to the extent that realisation of the related tax benefit through the future taxable profits is probable. The Group did not recognise deferred tax assets of HK\$14 million (2007: HK\$26 million) in respect of losses amounting to HK\$61 million (2007: HK\$115 million) that can be carried forward against future taxable income. Except for tax losses of HK\$20 million (2007: HK\$78 million) which have no expiry date, the balance will expire at various dates up to and including 2026 (2007: 2026).

30. Convertible bonds

On 1st February 2007, the Company issued HK\$127,850,000 convertible bonds at 100% of the principal amount to Asia Standard Development Ltd ("ASDL"), and HK\$172,150,000 convertible bonds at 100% of the principal amount to Asia Standard Finance Company Limited ("ASFCL"), as consideration of the acquisition of Master Asia Enterprises Limited. Both ASDL and ASFCL are indirect wholly owned subsidiaries of Asia Standard International Group Limited ("ASI"), the ultimate holding company of the Company.

The bond holders had the right at any time after the first business day after the date of the convertible bonds up to 30 days before the maturity of the convertible bonds to convert all or any part of their convertible bonds into shares at an initial conversion price of HK\$0.105 per share.

Conversion might occur at any time between 1st February 2007 and 31st January 2011. If the bonds had not been converted, they would be redeemed on 1st February 2011 at the principal amount of the convertible bonds plus redemption premium equal to 3% of the principal amount.

The convertible bonds contained two components, liability and equity elements. The equity element was presented in equity heading "convertible bonds – equity component".

The movement of the liability component of the convertible bonds for the year was set out below:

| | HK\$'000 |
|--|-----------|
| | |
| Proceeds of issue | 300,000 |
| Equity component (note 27) | (67,676) |
| | |
| Liability component | 232,324 |
| Exercise of convertible bonds | (116,162) |
| Liability component at 31st March 2007 | 116,162 |
| Exercise of convertible bonds | (116,162) |
| Liability component at 31st March 2008 | - |

In April 2007, ASFCL converted all its remaining convertible bonds in an aggregate principal amount of HK\$22,150,000 into 210,952,380 ordinary shares of HK\$0.02 each, and ASDL converted an aggregate principal amount of HK\$127,850,000 convertible bonds into 1,217,619,047 ordinary shares of HK\$0.02 each.

31. Operating lease arrangements

(a) Lessor

The Group leases out certain part of its hotel properties under operating leases which typically run for lease terms between 2 and 4 years.

The future aggregate minimum lease receivable under non-cancellable operating leases is as follows:

| | Group | Group | |
|--|----------|----------|--|
| | 2008 | 2007 | |
| | HK\$'000 | HK\$'000 | |
| Within one year | 8,731 | 11,173 | |
| In the second to fifth years inclusive | 16,652 | 19,129 | |
| | 25,383 | 30,302 | |

As at 31st March 2008, the Company had no operating lease receivable arrangements (2007: Nil).

(b) Lessee

Future aggregate minimum lease payable under non-cancellable operating leases in respect of land and buildings is as follows:

| | Group | Group | |
|--|----------|----------|--|
| | 2008 | 2007 | |
| | HK\$'000 | HK\$'000 | |
| Within one year | 3,784 | 4,818 | |
| In the second to fifth years inclusive | 3,250 | 7,150 | |
| | 7,034 | 11,968 | |

As at 31st March 2008, the Company had no operating lease payable arrangements (2007: Nil).

32. Capital commitments

Capital commitments at the balance sheet date are as follows:

| | 2008 HK\$'000 | 2007 HK\$'000 |
|-----------------------------------|------------------|------------------|
| Property, plant and equipment | | |
| Contracted but not provided for | 111,900 | 1,300 |
| Authorised but not contracted for | 29,827 | 96,700 |
| | 141,727 | 98,000 |

33. Financial guarantee

| | HK\$'000 | HK\$'000 |
| | | |
| Guarantees for the banking and loan facilities of Subsidiaries | 870,496 | 676,740 |

As at 31st March 2008, the Group had no contingent liabilities (2007: Nil). The Directors consider that the subsidiaries are financially resourceful in settling the obligations.

34. Related party transactions

The major shareholders of the Group are ASI and Asia Orient Holdings Limited ("Asia Orient"), companies incorporated in Bermuda and listed in Hong Kong. ASI directly own 67.70% of the Company's shares and Asia Orient owns effectively 2.96% of the Company's shares. The remaining 29.34% shares are widely held.

In addition to the related party information shown elsewhere in the financial statements, the following transactions were carried out with related parties at terms mutually agreed between the transacted parties:

| Sales and purchases of goods and services the transacted parties | 2008 | 2007 |

| Management service expenses | (973) | (977) |
| Income from Asia Orient | | |
| Hotel services | 6 | 2 |

35. Subsequent events

Subsequent to the balance sheet date, the Group completed a 10 year HK\$380 million new long term bank facility and HK\$320 million new short term bank facility. The new long term bank facility is used primarily to refinance the long term bank borrowings of approximately HK\$180 million and short term bank borrowings of approximately HK\$200 million then outstanding, and the new short term bank facility is to provide additional working capital for the Group.

36. Reconciliation of profit before income tax to net cash generated from operations:
