OVERSEAS REGULATORY ANNOUNCEMENT QUARTERLY ACTIVITIES REPORT

The following is the text of the quarterly activities report of Brockman Mining Limited (formerly Wah Nam International Holdings Limited) (the “Company”) released by the Company on ASX Limited today.

By order of the board of directors of
Brockman Mining Limited
Chan Kam Kwan, Jason
Company Secretary

Hong Kong, 31 October 2012

As at the date of this announcement, the board of directors of the Company comprises Mr. Kwai Sze Hoi (Chairman), Mr. Liu Zhengui (Vice Chairman), Mr. Warren Talbot Beckwith and Mr. Ross Stewart Norgard as non-executive directors; Mr. Luk Kin Peter Joseph (Chief Executive Officer), Mr. Chan Kam Kwan, Jason (Company Secretary) and Mr. Chu Chung Yue, Howard as executive directors; and Mr. Lau Kwok Kuen, Eddie, Mr. Uwe Henke Von Parpart, Mr. Yip Kwok Cheung, Danny and Mr. David Michael Spratt as independent non-executive directors.

QUARTERLY ACTIVITIES REPORT

SEPTEMBER 2012

HIGHLIGHTS

- Compulsory acquisition process completed on 15 August 2012, with 100% ownership in Brockman Resources Limited now secured.
- Changes to the Company's board composition:
Mr. Ross Stewart Norgard has been appointed as non-executive director of the Company and Mr. David Michael Spratt has been appointed as independent non-executive Director; effective from 22 August 2012.
- Entering into an independent rail alliance study agreement with QR National and Atlas (the "Independent Rail Alliance Study Agreement").
- Planned commencement of production at the Marillana project is projected for 2016.
- Issue of bond raising HK\$156 million.
- Final conditional approval has been received from the Commonwealth Department of Sustainability, Environment, Water, Pollution and Communities for both the Marillana mine and rail spur projects.
- An initial Indicated and Inferred Mineral Resource estimate of 108 Mt grading 58.3% Fe was announced for the Pallas and Castor deposits at Coondiner of which a total of 64 Mt (all at Pallas) or 60% of the total Mineral Resource estimate is in the Indicated category.
- Significant thicknesses of DSO grade mineralisation continue to be intersected at Kalgan Creek, with better intercepts of 94m at 59.3% Fe in hole KRC0033 (from 2m) and 72m at 59.7% Fe in hole KRC0068 (from 26m).
- Operations resumed in Damajianshan following the installation of plant upgrades.

CORPORATE REVIEW

Takeover Offer for Brockman Resources Limited

The compulsory acquisition process for the acquisition of Brockman Resources Limited in Australia was completed on 15 August 2012, with the Company now controlling 100% of the target.

Change of Company Name

Following the above acquisition, the Company held a special general meeting on 28 August 2012, which approved the change of company name from Wah Nam International Holdings Limited to Brockman Mining Limited and, upon the name change becoming effective, to adopt a new Chinese name “布萊克萬礦業有限公司” in place of the existing Chinese name “華南投資控股有限公司”, adopted for identification purposes only. Accordingly, trading in the shares of the Company on the Stock Exchange under the stock short name of “Brockman Mining” (“布萊克萬礦業”) and the ticker of the Company for the listing on the ASX Limited to be changed to “BCK”, became effective on 25 September 2012. The Board considers that the new name more accurately reflects the business focus of the Group.

Board Appointments

The following appointments became effective on 22 August 2012.

Mr. Ross Stewart Norgard

Mr. Ross Stewart Norgard was appointed as non-executive director of the Company.

Mr. David Michael Spratt

Mr. David Michael Spratt was appointed as independent non-executive director of the Company.

The above directors' biographical information is contained in the announcement dated 22 August 2012.

Management Team Changes — Australian Operation

Michelle Manook joined the Brockman Mining Australia management team in August, in the role of General Manager External Affairs. Michelle has most recently held senior resource management roles in Woodside Energy Limited, Roc Oil Ltd and Epic Energy Pty Ltd, encompassing national and international operations in Australia, South East Asia, United Kingdom and West Africa.

Bank and Cash position

The consolidated cash and bank balance of the Group as at 30 September 2012 amounted to approximately HK\$399.9 million.

Issue of Bonds

On 21 September 2012, the Company issued bonds of an aggregate principal amount of HK\$156 million. Interest is payable on the date of redemption at the rate of 12% per annum of the outstanding principal amount. The bonds are due on 23 December 2013.

MARILLANA IRON ORE PROJECT (100% INTEREST)

Mining and Metallurgy

Testwork programs continued on the potential for the processing of the naturally occurring minus 1 mm run of mine (ROM) feed material. In the current process flowsheet, the material accounts for 36% of the process plant feed tonnes and is currently scheduled to be rejected as waste.

Rail and Port Infrastructure

NWI continued planning for the development of a multi-user iron ore export (landside) facility at Port Hedland, including finalisation of the development timeframes for those facilities with respect to each stakeholder's proposed mining project developments. NWI is negotiating a lease agreement with the PHPA. The Western Australian Department of State Development has allocated a dedicated transport corridor to NWI for the development of a rail line linking the port facilities and rail infrastructure.

NWI is preparing a port development business case based on a phased development of the South West Creek infrastructure. This business case will need to be integrated with the development of the proponent's proposed mines and the proposed EPIR.

Brockman, Atlas and QR National are studying the potential development of the EPIR for the haulage of iron ore production from the proposed mines to the port facility. All parties have directed their efforts to establishing the technical and commercial fundamentals of the supply infrastructure network, which includes the planning and undertaking of baseline environmental and cultural heritage surveys, obtaining a State Agreement and the pursuit of the strategic project environmental approvals required by Commonwealth and State governments. These activities will continue through to the end of 2012 when the study is due to be completed.

Project Approvals

The Company continues to progress all required State and Commonwealth government environmental approvals for the mine, rail and port projects, where plans/designs have been finalised, in line with Project requirements and development timeframes. Variations to the Marillana Project footprint, since the submission and approval of the Public Environmental Review, will require a variation to the Ministerial Statement approval via a s45C process under the Environmental Protection Act.

A modified Project Management Plan is being developed for submission to DMP, as well as a new Mining Proposal to cover both early works during the construction phase and the operating mine. Secondary approvals including site operational licences, water licences and vegetation clearing permits will be completed in parallel with a future BFS.

Final conditional approval has been received from the Commonwealth Department of Sustainability, Environment, Water, Pollution and Communities for both the Marillana mine and rail spur projects. A substantial amount of work will be required in 2013 to develop the management plans associated with each of these projects, once design engineering and the BFS commence.

REGIONAL IRON ORE PROJECTS (100% INTEREST)

Ophthalmia Project

Field activities continued to focus on infill reverse circulation (RC) drilling of the Kalgan Creek and Sirius prospects. During the quarter, a total of 79 RC drill holes for 8,000 m and seven PQ diamond drill holes for 745.8 m were drilled. The locations of the various Ophthalmia prospects are shown in Figure 1.

An initial Mineral Resource estimate was carried out over the Pallas and Castor Deposits at Coondiner. Compilation and interpretation of the Kalgan Creek drilling results were also carried out in preparation for resource estimation at this prospect, expected to be completed in Q4, 2012. A resource estimate for the Sirius prospect is expected in Q1, 2013.

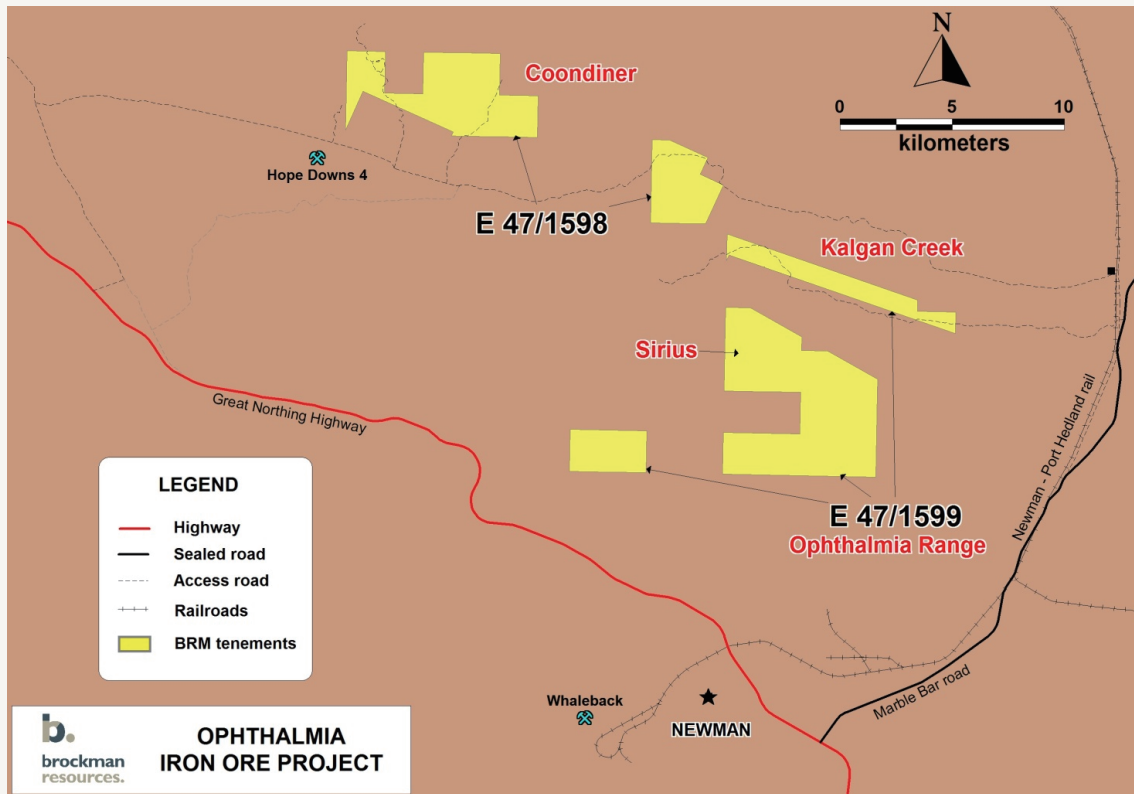

Figure 1: Location of Ophthalmia Prospects

Coondiner Prospect

Work continued in preparation for the initial Indicated and Inferred Mineral Resource estimate for the Pallas and Castor deposits at Coondiner. Perth-based Golder was engaged to prepare the Mineral Resource estimation, which will be classified in accordance with the guidelines of the 2004 Edition of the "Australasian Code of Reporting of Mineral Resources and Reserves" (JORC Code).

A program of PQ diamond drilling comprising 5 holes for 564.1 m was completed at Coondiner to provide core samples for preliminary metallurgical testwork and twin hole assay data for comparison to RC holes. All cores have been

geologically logged and cut, but no assays have yet been received. Visual indications from logging suggest that the mineralised zones compare well with the RC twin holes.

Kalgan Creek Prospect

Extension RC drilling continued at Kalgan Creek, with 69 holes totalling 6,503 m completed during the period. Following completion of drilling, the rig moved to the Sirius prospect. Two PQ diamond drill holes for 181.7 m were also completed to provide metallurgical sample and twin hole assay data. Results have been received for all RC holes (see Table 1 and Figure 2) but the diamond core results are pending.

Table 1: Significant drill intersections – Kalgan Creek Prospect

Notes: Intercepts calculated at a nominal 54% Fe cut-off grade including up to 3 m of internal dilution
 All intercepts exceeding 20 m down hole width reported
 Analyses by Nagrom Laboratories using XRF spectrometry
 Fe Calcined is calcined iron and is calculated by the formula: CaFe = Fe% / (100-LOI)*100
 * reported last quarter

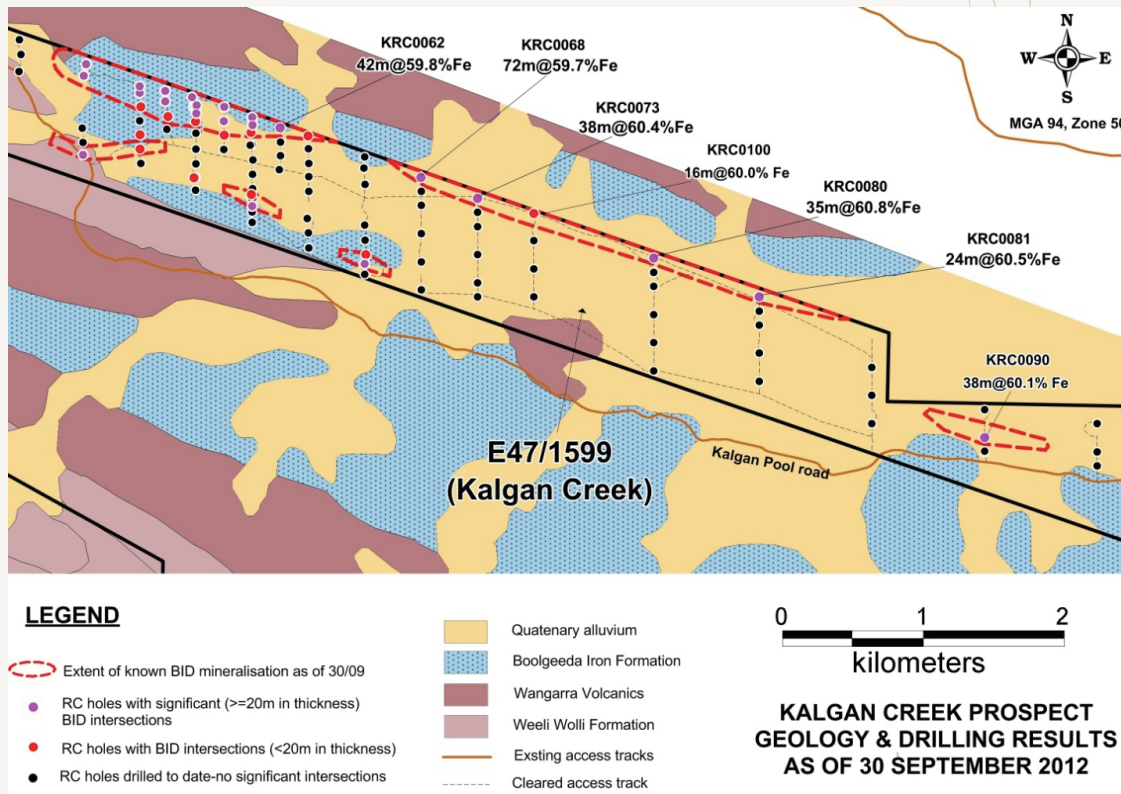

Figure 2: Drill hole location plan – Kalgan Creek

Results have confirmed the continuity of a main zone of mineralisation along the northern boundary of the tenement along a strike length of at least 1,500 m, a width across strike of about 300 m and average thickness of about 50 m (varies up to 94 m in KRC0033). The depth to the top of mineralisation in this area is typically less than 10m.

Step out drilling along the strike of the Boolgeeda Iron Formation to the east of this main zone has identified additional mineralisation that extends for another 3 km to the east, although the width of this zone is thinner (only defined by one hole per section) and the depth to the top of mineralisation is deeper.

Following compilation of results and geological interpretation, Golder has been commissioned to undertake a Mineral Resource estimate for Kalgan Creek. This is expected to be completed in Q4, 2012.

Sirius Prospect

Following initial delays in gaining a clearing permit to construct an access track through a neighbouring tenement to the Sirius prospect, a program of infill and extension RC drilling commenced on 23 September. By month end, a total of 10 holes for 1,497 m had been completed. Assay results are pending.

West Pilbara Project

During the period, heritage surveys were carried out over the West Hamersley and Mt Stuart areas to facilitate a short helicopter-supported diamond drilling program, which commenced in early October.

SIGNIFICANT EVENTS OUTSIDE THE PERIOD

On 15 October, the Company announced an initial Indicated and Inferred Mineral Resource estimate of **108 Mt grading 58.3% Fe** for the Pallas and Castor deposits at Coondiner. The Coondiner Mineral Resource estimate includes 64 Mt of Indicated Mineral Resources (all at Pallas) and 44 Mt of Inferred Mineral Resources (at Pallas and Castor). The Mineral Resource estimate is detailed in Table 2 below:

The Mineral Resource estimation was prepared by Golder and has been classified in accordance with the guidelines of the 2004 Edition of the "Australasian Code for Reporting of Mineral Resources and Reserves" (JORC Code). It has been estimated within geological boundaries using a 54% Fe lower cut-off grade for DSO grade mineralisation.

Table 2: Coondiner Mineral Resource estimate at a 54% Fe cut-off grade

Deposit	Class	Tonnes (Mt)	Fe (%)	CaFe* (%)	SiO ₂ (%)	Al ₂ O ₃ (%)	S (%)	P (%)	LOI (%)
Pallas	Indicated	64.3	58.0	61.6	5.79	4.40	0.009	0.166	5.77
	Inferred	7.5	57.2	60.7	6.97	4.67	0.009	0.154	5.70
	SUBTOTAL	71.8	58.0	61.6	5.91	4.42	0.009	0.164	5.76
Castor	Inferred	36.2	59.1	62.4	5.01	4.32	0.006	0.181	5.35
GRAND TOTAL		108.0	58.3	61.8	5.61	4.39	0.008	0.170	5.62

* CaFe represents calcined Fe and is calculated by Brockman using the formula $CaFe = Fe\% / ((100-LOI)/100)$
 Total tonnes may not add due to rounding

The extent of the Mineral Resource model is shown in Figure 3.

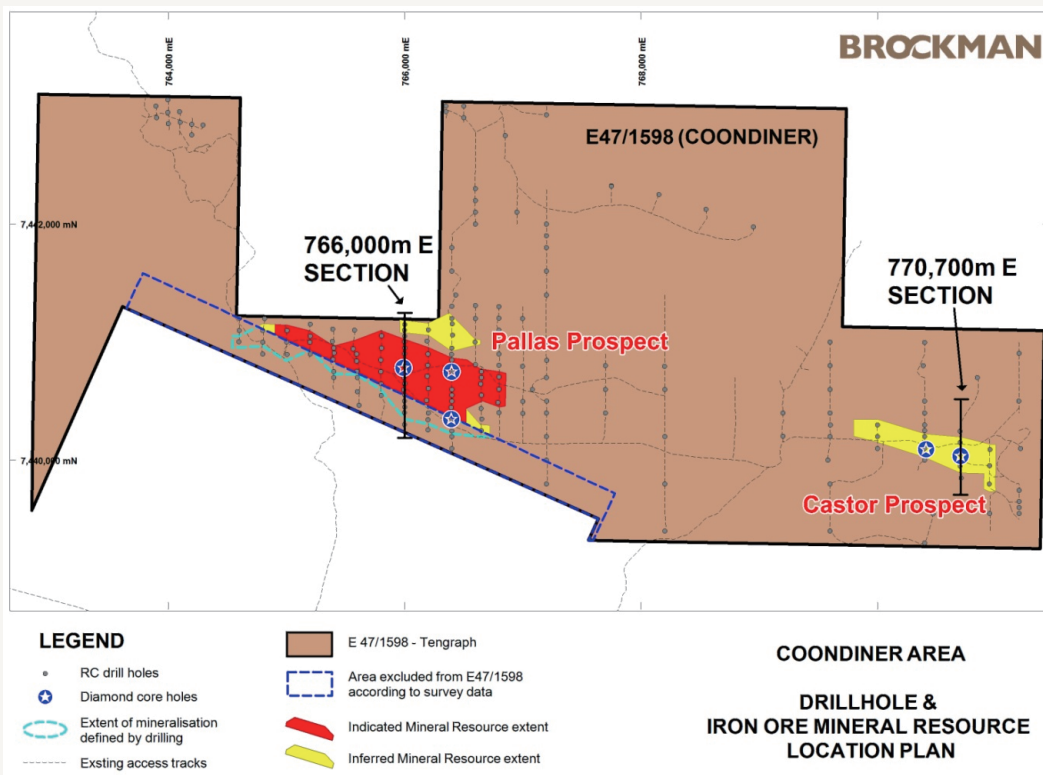

Figure 3: Drill hole locations and extent of Mineral Resource outline at Coondiner

Mineralisation is hosted by the Boolgeeda Iron Formation and forms a sub-horizontal blanket up to 100 m thick, commencing from shallow depths. For this reason, it is expected that the stripping ratio will be low and that mining will be relatively straightforward.

The proximity of Ophthalmia to Brockman's Marillana Project means that ore could be trucked to the proposed Marillana rail loading stockyards for raiing to Port Hedland.

Preliminary survey data for the tenement which adjoins the Coondiner tenement E47/1598 indicates a discrepancy between the position of the south-western boundary of E47/1598 as recorded on the DMP tenement management system (TENGRAPH) and that recorded by the survey. The potential impact of this is shown in Figure 3. The Pallas Deposit Mineral Resource released by Brockman assumes that the survey data is adopted in full by DMP. If the survey data is not adopted, additional Mineral Resources could be added to those listed in Table 2. The Castor Mineral Resource is not affected in any way by the survey data.

Competent Person's Statement

The information in this report that relates to Mineral Resources is based on information compiled by Mr J Farrell and Mr A Zhang.

Mr J Farrell, who is a Chartered Professional and Member of the Australasian Institute of Mining and Metallurgy and a full-time employee of Golder Associates Pty Ltd, produced the Mineral Resource estimates based on the data and geological interpretations provided by Brockman. Mr Farrell has sufficient experience that is relevant to the style of mineralisation, type of deposit under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2004 edition of the 'Australasian Code for Reporting of Exploration, Results, Mineral Resource and Ore Reserves'. Mr Farrell consents to the inclusion in this report of the matters based on his information in the form and context that the information appears.

Mr A Zhang, who is a Member of the Australasian Institute of Mining and Metallurgy and a full-time employee of Brockman Mining Australia Pty Ltd, provided the geological interpretations and the drill hole data used for the Mineral Resource estimation. Mr Zhang has sufficient experience that is relevant to the style of mineralisation, type of deposit under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2004 edition of the 'Australasian Code for Reporting of Exploration, Results, Mineral Resource and Ore Reserves'. Mr Zhang consents to the inclusion in this report of the matters based on his information in the form and context that the information appears.

DAMAJIANSHAN MINE

During the quarter ended 30 September 2012, cash receipts from product sales of approximately RMB10.9 million were contributed by the Company's wholly-owned subsidiary, Smart Year, a 90% owner and operator of the Damajianshan Mine (quarter ended 30 September 2011: RMB0.9 million).

Cash payments for production associated with the mining operation during the quarter ended 30 September 2012 amounted to approximately RMB8.4 million (quarter ended 30 September 2011: RMB3.5 million) and cash payments of expenditure associated with exploration activities and development amounted to approximately RMB0.5 million (quarter ended 30 September 2011: RMB0.4 million).

With previous installation works in place, production from the Damajianshan Mine has resumed during the quarter, resulting in a significant increase in production.

The Damajianshan Mine is located in Qimaba Township, Luchun County of Yunnan Province in the PRC. The Damajianshan mining right covers 3.67 square kilometres. As at November 2011, the Damajianshan Mine had Proved and Probable Ore Reserves of 7.6 million tonnes with an average Cu grade of 1.46%, included in a Measured, Indicated and Inferred Mineral Resource of 15.2 million tonnes with an average Cu grade of 1.68%.

JORC Copper Ore Reserves for the Damajianshan Mine have not changed significantly since 11 November 2011.

These estimates were included in the Independent Geologist's Report dated 11 November 2011 prepared by Christopher Arndt, Consulting Geologist in collaboration with Xianping Zhu, Consulting Geophysicist, and Huairan Liu, Consulting Geologist in accordance with the JORC Code.

Exploration activities continued during the quarter and the Company will produce an update in due course.

Competent Person Statement

The information in this Report that relates to Exploration Results, Mineral Resources or Ore Reserves in relation to the Damajianshan Mine has been reviewed by Mr. Christopher Arndt who is a self-employed consultant to the Company. Mr. Arndt is a Fellow of the Australasian Institute of Mining and Metallurgy and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr. Arndt consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.

Mining Licence

The renewal of the mining right certificate is being processed and Yunnan State Land Resources Bureau has temporarily granted Luchun Xingtai Mining Co Ltd ("Luchun"), the operator of the Damajianshan Mine an extension of the existing mining certificate for a period of three months to December 2012, pending the approval of the official renewal.

With reference to an independent legal opinion received by Luchun, there are no legal barriers to Luchun obtaining the renewal of the mining right certificate, provided that it complies with the requirements as deemed necessary by the relevant government authorities. The Board considers that the Group will be able to renew the mining right at minimal charge.

TRANSPORT SERVICES BUSINESS

Receipts from the limousine rental and airport shuttle bus operations amounted to approximately HK\$28.5 million during the quarter ended 30 September 2012, decreased by 14.9% from HK\$33.5 million as recorded in the corresponding quarter last year. The Company will continue to monitor market developments and formulate the best business strategy so as to sustain the overall profit margin.

Non-cash financing and investing activities

- 2.1 Details of financing and investing transactions which have had a material effect on consolidated assets and liabilities but did not involve cash flows

The compulsory acquisition process for the takeover of Brockman Resources Limited, was completed on 15 August 2012. A total of 49,054,662 ordinary shares of the Company have been issued and allotted to Brockman shareholders who have accepted the takeover offer during the quarter.

On 21 September 2012, the Company issued bonds of aggregate principal amount of HK\$156 million. Interest is payable on the date of redemption at the rate of 12% per annum of the outstanding principal amount, accruing from the date of issue of the bonds on a daily basis. The bonds are due on 23 December, 2013.

- 2.2 Details of outlays made by other entities to establish or increase their share in projects in which the reporting entity has an interest

N/A

Financing facilities available

Add notes as necessary for an understanding of the position.

	Amount available HK\$'000	Amount used HK\$'000
3.1 Loan facilities	25,800	18,373
3.2 Credit standby arrangements	—	—

Note: In addition to the above facilities the Company has in place two convertible notes and two bonds (see 7.5 and 7.11.) As at 30 September 2012, the carrying amount of the convertibles bonds and bonds are approximately HK\$158.8 million and HK\$156.5 million respectively.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.

+ See chapter 19 for defined terms.
