OVERSEAS REGULATORY ANNOUNCEMENT
QUARTERLY ACTIVITIES REPORT

The following is the text of the quarterly activities report of Brockman Mining Limited (the “Company”) released by the Company on ASX Limited today.

By order of the board of directors of
Brockman Mining Limited
Chan Kam Kwan, Jason
Company Secretary

Hong Kong, 30 January 2015

As at the date of this announcement, the board of directors of the Company comprises Mr. Kwai Sze Hoi (Chairman), Mr. Liu Zhengui (Vice Chairman) and Mr. Ross Stewart Norgard as non-executive directors; Mr. Chan Kam Kwan, Jason (Company Secretary), Mr. Kwai Kwun Lawrence and Mr. Warren Talbot Beckwith as executive directors; Mr. Yap Fat Suan, Henry, Mr. Uwe Henke Von Parpart, Mr. Yip Kwok Cheung, Danny and Mr. Choi Yu Chun, Eugene as independent non-executive directors.

9.	APPENDIX 5B	14

1. HIGHLIGHTS

- Following the victory in the Supreme Court in September 2014 (in which the Supreme Court ruled that Brockman's Access Proposal was valid and complied with the requirements of section 8 of the Access Code), Brockman continues to progress the Access Proposal under the Code. Work during the period entailed the review of the ERA's draft Floor and Ceiling redetermination and WACC draft determination, together with the continued preparation of submissions to satisfy the section 14 and 15 requirements of the Code ahead of the commencement of negotiations.
- Mineral Resources at Brockman's Ophthalmia Project were increased by 36Mt following extension and infill drilling at the Coondiner and Kalgan Creek deposits. The total Mineral Resource now stands at 341Mt grading 59.3% Fe, of which 280.4Mt (or 82% of the total) grading 59.3% Fe is in the Indicated category.
- Exploration Targets ranging from 31 – 50Mt grading from 55 – 60% Fe were also identified from the drilling at Coondiner and Kalgan Creek.
- Brockman is progressing a Pre-Feasibility Study for a 15 Mtpa DSO mining operation at Ophthalmia, predicated on the Company achieving a rail infrastructure solution for the Marillana Project, located 80 km northwest of Ophthalmia. The study is due for completion in early 2015.

2. CORPORATE REVIEW

Cash position

The consolidated cash position of the Group as at 31 December 2014 was HK\$140.3 million.

Corporate

In light of the current challenging environment for iron ore, the Company has implemented a number of cost saving measures to reduce the overheads of the Group.

3. MARILLANA IRON ORE PROJECT (100% INTEREST)

3.1 Rail and port infrastructure

Rail Access

Brockman is seeking access rights to The Pilbara Infrastructure Pty Ltd's ("TPI's") below-rail infrastructure under the Western Australian Railways (Access) Code 2000 (WA) ("Code"), to allow it to haul up to 20 Mtpa of hematite iron ore product from its Marillana Iron Ore Project ("Marillana"), for a term of 20 years ("Access Proposal"). The access sought proposed to exit the TPI mainline at Port Hedland where North West Infrastructure ("NWI") has a capacity allocation of 50 Mtpa at the proposed SP3 and the SP4 berths for iron ore export from South West Creek in the Inner Harbour.

As part of the Access Proposal process commenced in May 2013, Brockman will procure the necessary spur lines and associated infrastructure to connect Marillana with the TPI railway and to connect it to the proposed NWI facilities in Port Hedland, which will include unloading, stockpiling and ship loading facilities in South West Creek, Port Hedland.

In October 2013, following the September 2013 ERA determination of Floor and Ceiling Costs, TPI commenced proceedings in the WA Supreme Court challenging the validity of the Access Proposal ("Validity Writ") and a judicial review proceeding challenging the Floor and Ceiling Costs determination and the section 10 approval ("Judicial Review"). The 26 September 2014 decision of the Hon. Justice Edelman confirmed that Brockman's Access Proposal was valid for the purpose of s8 of the Code. Brockman is involved in a process to recover its legal costs from TPI regarding the failed Validity Writ proceedings. TPI's October 2014 appeal on both decisions will be opposed by Brockman and are expected to be heard in March or April of 2015. Brockman does not anticipate that the appeal process will impede the current progression of the Access Proposal under sections 14 and 15 of the Code.

As part of the decision of Justice Edelman on the Judicial Review matter regarding the ERA review of 'contingencies' and 'asset lives' relating to the calculation of GRV and the determination of the Floor and Ceiling Costs, the ERA published a remade determination of the Floor and Ceiling Costs on 9 January 2015. The final determination was materially similar, in numerical effect, to the pre-Judicial Review decision. Accordingly, the remade determination will not materially affect the pricing in Brockman's financial model.

During the quarter, Brockman further advanced the development of the section 14 and 15 submissions and it is now expected that these will be submitted late in March 2015. Brockman is progressing its own legal proceedings in the Supreme Court, commenced in November 2014, to compel TPI to publish a correct statement regarding the available capacity of each route section the subject of the Access Proposal. The application is listed for a directions hearing on 29 January 2015.

North West Infrastructure

Brockman remains focused on protecting its foundation shareholding position, to participate in NWI port development to utilise the capacity allocation of 50 Mtpa at berths SP3 and SP4 at South West Creek in the Port Hedland harbour.

4. OPHTHALMIA IRON ORE PROJECT (100% INTEREST)

4.1 Ophthalmia Exploration

The Ophthalmia Project, located north of Newman in the East Pilbara region of Western Australia, is the most significant iron ore project for the company outside of its flagship Marillana project. During the quarter the Company announced an upgraded Mineral Resource of 158 Mt grading 58.4% Fe for the Coondiner Deposits and an upgraded Mineral Resource of 59 Mt grading 59.4% Fe for the Kalgan Creek Deposit, This takes the total Indicated and Inferred Mineral Resource Estimate for Ophthalmia to 341 Mt, grading 59.3% Fe (Refer ASX announcement dated 1 December 2014 and Table 2) from three separate areas/deposits: Sirius, Coondiner and Kalgan Creek (Figure 1).

Figure 1: General location map of Ophthalmia Iron Ore Project

Deposit	Class	Tonnes (Mt)	Fe (%)	CaFe* (%)	SiO ₂ (%)	Al ₂ O ₃ (%)	S (%)	P (%)	LOI (%)
Coondiner (Pallas and Castor)	Indicated	140.5	58.5	62.0	5.18	4.46	0.007	0.176	5.71
	Inferred	17.1	58.1	61.5	6.06	4.45	0.008	0.155	5.47
	Sub Total	157.6	58.4	62.0	5.27	4.46	0.007	0.174	5.68
Kalgan Creek	Indicated	34.9	59.3	62.7	4.08	4.57	0.009	0.183	5.49
	Inferred	24.4	59.5	63.2	4.38	3.90	0.007	0.157	5.81
	Sub Total	59.3	59.4	62.9	4.21	4.29	0.009	0.173	5.63
Sirius	Indicated	105.0	60.4	63.7	3.54	3.97	0.007	0.178	5.22
	Inferred	19.0	60.2	63.4	4.09	3.83	0.009	0.168	5.14
	Sub Total	124.0	60.3	63.6	3.62	3.95	0.007	0.177	5.20
Ophthalmia Project	Indicated	280.4	59.3	62.7	4.43	4.29	0.007	0.178	5.50
	Inferred	60.5	59.3	62.8	4.76	4.03	0.008	0.160	5.50
	Total	340.9	59.3	62.7	4.49	4.24	0.007	0.175	5.50

Table 1: Ophthalmia Mineral Resource (DSO) Summary

* CaFe represents calcined Fe and is calculated by Brockman using the formula $CaFe = Fe\% / ((100 - LOI) / 100)$

** Tonnes may not add up due to rounding

The increase represents an overall increase of 36Mt over the previously announced Mineral Resources but significantly 82% of the total resources (280.4 Mt) are now classified as Indicated Resources, whereas the previous resource for Ophthalmia contained Indicated Resources of 200 Mt (or 66% of the total). The average grade of mineralisation has remained nearly identical at 59.3%.

The upgraded Mineral Resource estimates for the Coondiner and Kalgan Creek Deposits were estimated by Golder Associates Pty Ltd (Golder). It has incorporated the results of an additional 193 infill and extension RC drill holes (13,627 m) completed in 2013 and 2014 since the original Mineral Resource estimates were announced. The resource estimate was classified in accordance with guidelines provided in the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code, 2012). The classification was based principally on geological confidence, drill hole spacing and grade continuity from available drilling data and the performance of the grade interpolation (see Figures 2 and 3). The mineralisation models and block reporting cut-off grades used in the in situ resource estimates are both 54% Fe. The methodology and procedures used for the Mineral Resource estimate, as well as the sampling techniques and data acquisition methods were provided in the statement by Golder Associates Pty Ltd as Appendix 1 of the ASX announcement dated 1 December 2014.

During the Mineral Resources estimation process, Exploration Targets were identified for Coondiner and Kalgan Creek. The potential quantity and grade of the Exploration Targets are conceptual in nature and insufficient exploration has been completed to allow estimation of a Mineral Resource. Further, it is uncertain if additional exploration will result in the estimation of a Mineral Resource for the Exploration Targets.

The Exploration Targets (Table 2) were based on extrapolated estimates which have insufficient geological confidence and drill hole data to be classified as Mineral Resources. Refer Figures 2 and 3 which show the location of the Exploration Targets with respect to the drilling and Mineral Resources. Brockman will conduct additional exploration and infill drilling to test these targets with the aim of further increasing the Mineral Resource inventory at Ophthalmia to meet the requirements of future mine development.

Deposit	Tonnes Min. (Mt)	Tonnes Max. (Mt)	Fe Min. (%)	Fe Max. (%)
Coondiner	22	35	55	60
Kalgan Creek	9	15	55	60
Ophthalmia	31	50	55	60

Table 2: Ophthalmia Exploration Targets

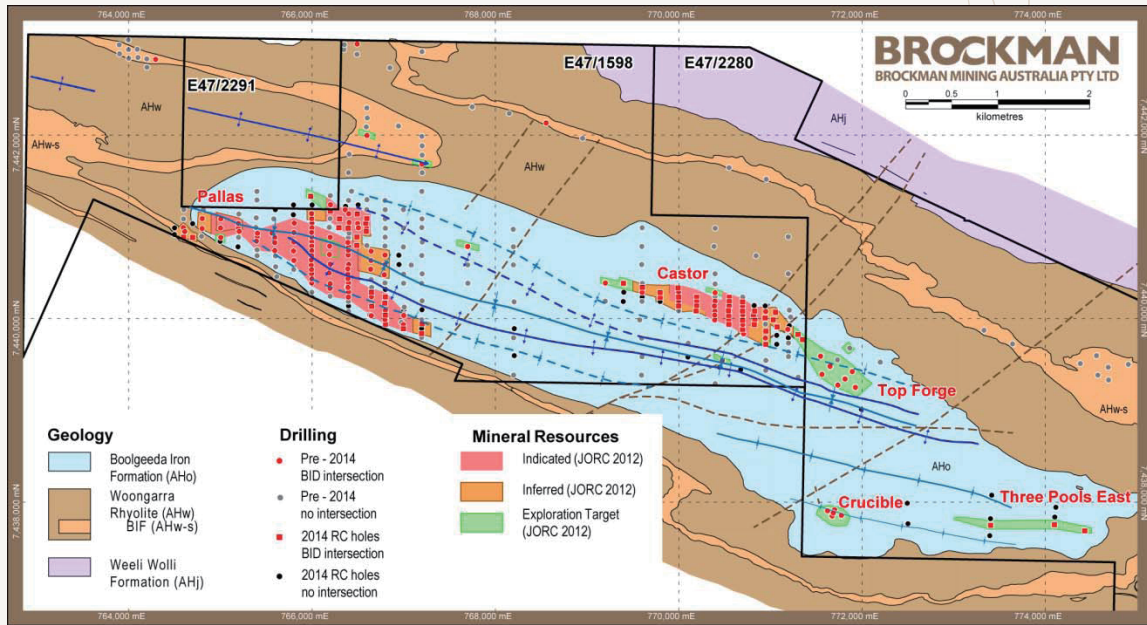

Figure 2: Coondiner Deposits Geology, Drill Hole and Resource Location

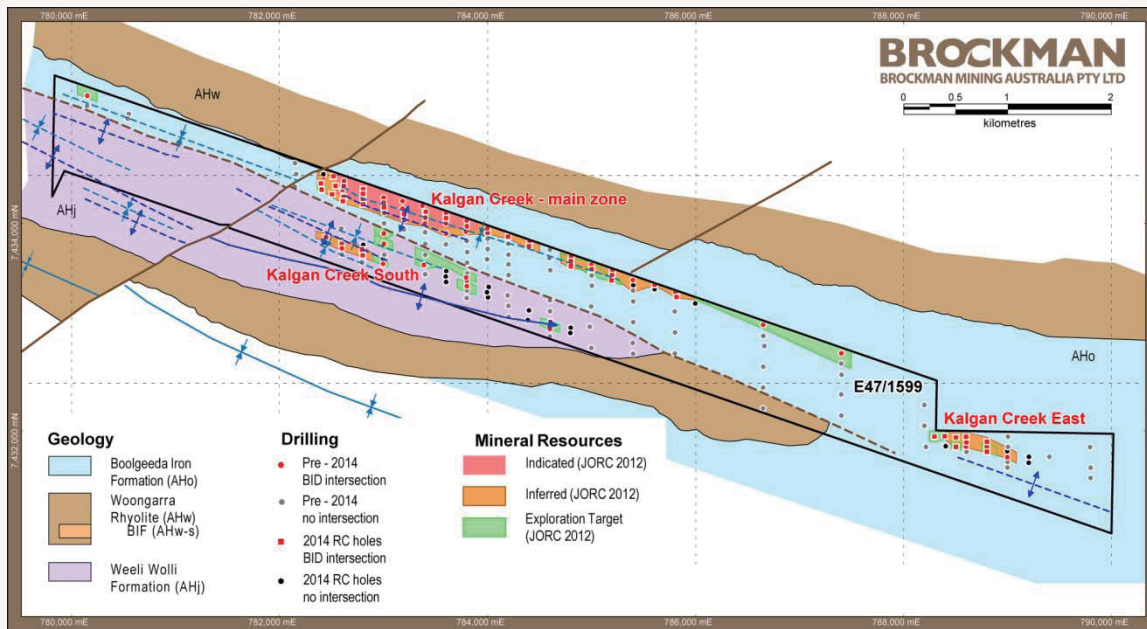

Figure 3: Kalgan Creek Deposits Geology, Drill Hole and Resource Location

4.2 Ophthalmia Development

The upgraded Mineral Resources and the excellent conversion from Inferred to Indicated Resources support the continuing Pre-Feasibility Study (PFS) for a 15 Mtpa DSO mining operation at Ophthalmia, predicated on the Company achieving a rail and port infrastructure solution for the Marillana Project. The PFS is scheduled for completion early in 2015.

5. TENEMENTS

6. DAMAJIANSHAN MINE (100% INTEREST)

During the quarter ended 31 December 2014, cash receipts from product sales of approximately RMB10.5 million (RMB10.1 million, September 2014 quarter) were recorded.

Cash payments for production associated with mining operations during the quarter amounted to approximately RMB7.8 million

(RMB7.2 million, September 2014 quarter). December 2014 quarter production was relatively stable.

Cash payments for exploration activities and development recorded at RMB1.6 million (RMB1.4 million, September 2014 quarter). Drilling activities were continued during the quarter with approximately 580m recorded (551m, September 2014 quarter).

	Dec' 14 Quarter (Tonnes)	Sept' 14 Quarter (Tonnes)	Variance %
Ore mined and delivered to stockpile	68,399	70,691	(3)%
Ore processed	82,079	84,767	(3)%
Concentrate produced (metal tonnes)	320	412	(22)%
Concentrate sold (metal tonnes)	427	310	38%

Note: Recognition of copper concentrate metal tonnes is based on the most recent available information with a subsequent adjustment made upon final determination.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.

+ See chapter 19 for defined terms.
