Everbright International's Zhenjiang Waste-to-Energy Project Receives Subsidy of RMB10,000,000 from the National Development and Reform Commission

**A Pioneer in China in Fully Deploying Domestically
Manufactured Waste-to-Energy Equipment**

Environmental Business Secures Support from Central Government Again

(Hong Kong, 31 May 2012) China Everbright International Limited ("Everbright International" or the "Group") has announced that the "2012 Subsidy of Budgetary Support from the Central Government" totaling RMB10,000,000 approved by the National Development and Reform Commission ("NDRC") for its waste-to-energy BOT project in Zhenjiang, Jiangsu Province ("Zhenjiang Project") has been brought to credit on 29 May 2012.

Zhenjiang Project is a pioneer project of the Group in that it fully deploys domestically manufactured waste-to-energy equipment and it is the first waste-to-energy project of the group to receive a subsidy from the Central Government. This success demonstrates the pursuant of the Group's core value 'An enterprise is not only the creator of wealth, but also the safeguard of environmental and social responsibility' has been fully recognized by the Government.

This is the second subsidy received by the Group from the NDRC following its Changzhou Equipment Manufacturing Project. This capital infusion not only gives impetus to the Group but also clearly demonstrates that the achievements of Everbright International in the environmental protection and the fulfillments of its responsibility to the society have gained recognition from the Government. With abundant capital on hand and the opportunities arising from the encouragement of waste-to-energy in relation to the "Notice of the Twelfth Five-Year Plan of the State Environmental Protection", Everbright International will continue to construct, operate and manage all its projects using clean technologies to reduce solid wastes in China and transform the wastes into energy.

Mr. Chen Xiaoping, Chief Executive Officer of Everbright International, said, "Everbright International will continue to adhere to its operating philosophy of 'Integrity, Pragmatism, Efficiency and Innovation' and will unswervingly push forward the development of environmental protection and energy conservation as well as sustainable development. The Group will strive the best interest for its shareholders while create a livable environment for the next generation."
