

**EVERBRIGHT INTERNATIONAL'S WUJIANG WASTE-TO-ENERGY PROJECT COMPLETES CONSTRUCTION
AND COMMENCES OPERATION**

24 October 2016, Hong Kong - China Everbright International Limited ("Everbright International" or the "Group") (HKSE: 00257) is pleased to announce that the Group's Wujiang Waste-to-energy Project ("Wujiang Project" or the "Project") in Jiangsu Province has completed construction and commenced operation.

Wujiang Project is a key livelihood project in the Wujiang District of Suzhou City in Jiangsu Province. It has a designed daily household waste processing capacity of 1,500 tonnes and a total investment of approximately RMB890 million. The Project is equipped with two self-developed 750 t/d grate furnaces and two 18MW turbine power generators. Gas emissions fully comply with the Euro 2010 Standard. In addition, the Project is expected to generate more than 180,000,000 kWh of green electricity annually.

The 750 t/d grate furnace is China's first homebuilt large-scale grate furnace and has filled the void in the manufacturing of large-scale household waste incineration equipment in the country. The grate furnace's particular advantages include a highly automated system, units with a high degree of control, the ability to process various kinds of waste, highly efficient incineration and effective utilization of thermal energy.

Mr. Chen Xiaoping, CEO of Everbright International, said, "As Wujiang Project commences operation, Wujiang District is moving from landfill towards the harmless treatment, reuse and reduction of household waste, which will effectively promote the construction of an environmentally-friendly and resource-saving society. Everbright International remains fully committed to its social and environmental responsibilities through high standards of construction, safe and stable operations, ensuring all emissions comply with the environmental standards, and the Group aims to make Wujiang Project a national demonstration base for environmental protection education. It will set an example as a first-class landmark environmental protection project in China which blends in with Jiangsu's natural environment and Wujiang's beautiful landscape."

About China Everbright International Limited

China Everbright International Limited, a flagship company in the industrial investment sector of China Everbright Group Ltd., is listed on the Mainboard of The Stock Exchange of Hong Kong. Everbright International is a leading player in China's environmental protection industry, and the first one-stop integrated environmental solution provider in the country. It leverages talent, science and technology to develop all of its four major business segments, namely envirotech, environmental energy, environmental water (China Everbright Water Limited is listed on the Mainboard of the Singapore Exchange Securities Trading Limited) and greentech. It also manages a large number of industry-leading, world-class projects, in the areas of waste-to-energy, water restoration, biomass integrated utilization, hazardous waste treatment, photovoltaic energy, wind power, environmental protection engineering, technological research and development, environmental protection equipment manufacturing, and the planning and construction of environmental protection industrial parks.
