Press Release

Everbright Water Secures Shandong Ji'nan Zhangqiu Waste Water Treatment (Plant 5) PPP Project, Solidifying the Company's Local Market Deployment

Singapore and Hong Kong, 17 November 2022 - China Everbright Water Limited ("Everbright Water" or the "Company"; stock codes: U9E.SG and 1857.HK) (中國光大水務有限公司), an environmental protection company focusing on water environment management, is pleased to announce that the Company has secured Shandong Ji'nan Zhangqiu Waste Water Treatment (Plant 5) PPP (Public-Private Partnership) Project ("Zhangqiu Project (Plant 5)"), which commands an estimated investment of approximately RMB310 million. This is the third project secured by the Company in Ji'nan since last December, following the securing of Ji'nan International Centre for Medical Sciences Waste Water Treatment Project Phase I and Ji'nan Prior Zone Detonation Area Waste Water Treatment PPP Project in succession. This will further enhance Everbright Water's water treatment service capability and deployment in the local market.

Zhangqiu Project (Plant 5) will be invested in, constructed, operated and maintained based on a BOT (Build-Operate-Transfer) model by a project company in which Everbright Water will hold a 99% equity interest. With a cooperation period of 30 years (construction period inclusive), the project mainly involves the construction of a waste water treatment plant, an ancillary pipeline network and a waste water pump station based on an integration model of the plant and the pipeline network. Among others, the project comprises a waste water treatment plant with a designed daily waste water treatment capacity of 40,000 m³ and a designed daily reusable water supply capacity of 20,000 m³, and an ancillary pipeline network of approximately 16.8 km in length. The discharged water of the project will comply with *the Environmental Quality Standards for Surface Water (GB3838-2002) for Category Quasi-IV*.

China Everbright Water Limited
(Incorporated in Bermuda with limited liability)
(Stock Codes: U9E.SG, 1857.HK)

With Zhangqiu Project (Plant 5), Everbright Water has a total of five waste water treatment projects in the Zhangqiu District, with an aggregate designed daily water treatment capacity of 260,000 m³ (including waste water treatment and reusable water supply capacities). This will further expand the Company's service coverage in the area. Additionally, Zhangqiu Project (Plant 5) will mainly serve the western urban area of the Zhangqiu District, which is located between the Company's Zhangqiu Waste Water Treatment Project (Plant 3) and the Zhangqiu Waste Water Treatment (Plant 4) PPP Project. This will enable the Company to leverage the waste water pipeline networks and pump stations of all these projects to optimise the allocation of waste water with more flexibility. In a nutshell, this will enhance the Company's overall waste water treatment efficiency and safeguard the local environmental, social and economic development.
