#### **BUSINESS REVIEW**

The Group continued to engage in manufacturing finished zippers in China. The Group's customers for zippers business are principally OEMs who manufacture apparel products for (i) some apparel brands in China; and (ii) some well-known international apparel brands. The Group maintains a close working relationship with apparel brand owners on the design of zippers to be applied in the apparel products. The apparel brand owners usually decide on the zipper supplier for their OEMs and place orders with such OEMs who in turn source zippers and other garment accessories from the Group.

The Group is continuously looking for new investments and business opportunities in order to diversify the existing business.

The Group recorded loss attributable to equity shareholders of the Company of approximately HK\$4.15 million for the six months ended 30 June 2021, as compared with approximately HK\$8.93 million for the same period in 2020, the decrease in loss was primarily attributable to the effective control of COVID-19, the gradual improvement of the terminal consumer market, the rebound of the garment industry, and the further expansion of the quality customers by the Group, resulting in the increasing number of sales orders from customers of the Group who are primarily OEMs who manufacture apparel products, and the Group's revenue from zipper business has increased considerably.

### **PROSPECTS**

In the first half of 2021, with the epidemic prevention and control entering a normalized phase, China's economy continues to recover and improve steadily, but there is still uncertainty about the evolution of the global COVID-19, and China's economic growth still relies on the support of domestic demand in the second half of 2021, and a new development pattern is gradually taking shape with a large domestic cycle as the mainstay and dual domestic and international cycles promoting each other.

COVID-19 inevitably has a greater negative impact on the garment industry. But with the recovery and continuous improvement of China's economy and the revival of terminal consumption, the textile and garment industry in the first half of 2021 has been running steadily and the industry boom has been rising. The brand of domestic products has been recognized and sought after by consumers. With the introduction of the national policy of expanding domestic demand and stimulating consumption, it is expected that the demand of the garment industry will maintain a low-speed growth in the second half of 2021. However, with the development of the garment trend towards freedom and diversification, it also brings new development opportunities and challenges to the zipper industry.

To this end, the Company will actively take the following measures:

- Actively adapt to the new market environment and demand changes, strengthen the development of new products, and quickly respond to the needs of customers and the market:
- 2. Strengthen the development of e-commerce market, implement multi-channel and cross-sectoral marketing policies, and seek broader development space;
- 3. Further integrate and expand production capacity, improve industrial chain supporting facilities, raise production automation level, enhance production process, improve product quality and shorten delivery time;
- 4. Optimize process, improve operation efficiency and strengthen cost management;
- 5. Enhance capital management and prevent and control operation risks;
- 6. Accelerate the transformation of digitization, informatization and intelligence, and improve the operation efficiency and management level; and
- 7. Enhance talent management and improve organizational ability.

The Group will concurrently review the business strategic directions and operations of the Group in order to chart its long term corporate strategy and growth and to explore other business or investment opportunities with a view to enhance the Group's future development.

#### 1 GENERAL

China Apex Group Limited (the "Company") was incorporated in the Cayman Islands as an exempted company with limited liability under the Companies Law of the Cayman Islands and its shares are listed on The Stock Exchange of Hong Kong Limited (the "Stock Exchange").

#### 2 BASIS OF PREPARATION

The unaudited condensed consolidated interim financial statements have been prepared in accordance with the applicable disclosure provisions of the Rules Governing the Listing of Securities on the Stock Exchange (the "Listing Rules"), including compliance with Hong Kong Accounting Standard ("HKAS") 34 Interim financial reporting issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA").

The preparation of the condensed consolidated interim financial statements in compliance with HKAS 34 requires the use of certain judgements, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income and expenses on a year to date basis. Actual results may differ from these estimates.

The interim financial statements contain condensed consolidated interim financial statements and selected explanatory notes. The notes include an explanation of events and transactions that are significant to an understanding of the changes in financial position and performance of the Company and its subsidiaries (collectively the "Group") since the 2020 annual financial statements. The condensed consolidated interim financial statements and notes thereon do not include all of the information required for full set of financial statements prepared in accordance with Hong Kong Financial Reporting Standards ("HKFRSs").

#### 3 PRINCIPAL ACCOUNTING POLICIES

The condensed consolidated interim financial statements have been prepared in accordance with the same accounting policies adopted in the 2020 annual financial statements, except for the accounting policy changes that are required to be adopted in the 2021 annual financial statements. Details of these changes in accounting policies are set out below.

### Overview on changes in accounting policies

The HKICPA has issued a number of new HKFRS or amendments to HKFRSs that are first effective or first time adopted and relevant for the current accounting period of the Group:

The new or amended HKFRSs that are effective from 1 January 2021 did not have any significant impact on the Group's condensed consolidated interim financial statements.

## 4 SEGMENT REPORTING

The Group manages its businesses by divisions, which are organised by a mixture of both business lines and geography.

Accordingly, the Group has presented the following two reportable segments in a manner consistent with the way in which information is reported internally to the Group's senior executive management for the purposes of resource allocation and performance assessment.

## a. Zippers (Mainland China):

This segment manufactures zippers products and mainly sells to customers in Mainland China. Its activities are mainly carried out in Guangdong, Zhejiang and Jingmen.

## b. Zippers (Overseas):

This segment purchases zipper products from segment of Mainland China and sells to overseas customers. Its activities are mainly carried out in Hong Kong.

Inter-segment transactions are priced with reference to prices charged to external parties for similar order.

## 4 SEGMENT REPORTING (CONTINUED)

The measure used for reporting segment profit or loss is "adjusted profit or loss before taxation" i.e. "revenue less cost of sales, distribution costs, administrative expenses and impairment loss on trade receivable and bills receivable". Items not specifically attributed to individual segment are excluded from the calculation of segment profit or loss. The Group's senior executive management is provided with segment information concerning segment revenue, profit or loss and assets. Segment liabilities are not reported to the Group's senior executive management regularly.

## (a) Segment results, assets and liabilities
