

China Power Huayuan Included in the First Batch of "Specialized and Innovative" Enterprises of Shanghai in 2022

Recently, Shanghai Municipal Commission of Economy and Information officially announced the list of the first batch of "Specialized and Innovative" enterprises in 2022 after public announcement. China Power Huayuan Nuclear Power Engineering Technology Co., Ltd. (China Power Huayuan), a subsidiary of CPID, was selected as one of the first batch of "Specialized and Innovative" enterprises.

China Power Huayuan, as a high-tech enterprise with the first-class qualification for nuclear project contracting and rich experience in nuclear island maintenance, is deeply integrated into SPIC's nuclear energy industry chain and implements CPID's new strategy for transition and development, devoting itself to expanding the field of high-end nuclear power maintenance, fostering core strength, and supporting the development of China's nuclear power business.

By uniting China's high-end nuclear power resources, China Power Huayuan will strengthen strategic cooperation, conduct technology research and development, and accelerate the training of nuclear power maintenance personnel. China Power Huayuan will follow up the development of new nuclear power projects, provide technical services in the early stage of the projects, and expand the specialized high-end nuclear power maintenance market.

The "Specialized and Innovative" certification is valid for three years and will be reviewed at the end of the period. The Shanghai Municipal Government will increase the cultivation efforts, improve precise services, and promote the high-quality development of the "Specialized and Innovative" enterprises.
