

Unit 6 of Changzhou Hydropower Station Wins the Title of AAAAA Superior Unit

Recently, the Sci-Tech Development Service Center of China Electricity Council released the operation indicators statistics in 2021 for conventional hydropower generating units, and Unit 6 of Changzhou Hydropower Station of Guangxi Power Generation Company ranked first and won the title of "AAAAA Superior Unit with 10 MW and above tubular turbine".

This is one of the most influential awards in the industry. The operation indicators of 295 conventional hydropower stations of 14 power generation companies were evaluated properly and objectively, including water energy indicators, equipment management indicators, operation indicators, competition indicators and other indicators.

Changzhou Hydropower Station will continue to further optimize the technical indicators of the units, with higher quality and higher standard to ensure stable and economic operation of the units and complete the task of power generation on schedule.
