

Guangxi Power Generation Company Visits Needy People before Chinese New Year

During the Chinese New Year, some employees of Guangxi Power Generation Company, with the care for the needy people, formed an "anti-poverty" team to visit the poor households in Zhoushang Village, Xiangli Town, Xing'an County, and send them festival greetings.

During the visit, the team members asked in detail about the physical condition of the family members, the economic income of the households, their living difficulties, and the availability of medicines, and left them contact information.

The visit strengthened the contact and exchange with the needy people, and delivered warmth and positive energy. The families who had been alleviated from poverty expressed their gratitude for the care of the company, and they were confident that with the help of the governments and the company, they would increase their income and become rich in the new year.
