

CPID Shandong Energy Has Six Projects in the Development Plan for North Shandong Base

On June 27, 2023, six projects of CPID Shandong Energy Development Co., Ltd. in Binzhou, Dongying and Weifang were included in the *14th Five-Year Plan for Development of Wind and Solar Power, Energy Storage and Power Transmission Base in Northern Shandong* prepared by Shandong Provincial Government, with a total installed capacity of 2.48 GW, and CPID won the largest share of resources.

The projects included in the 14th Five-Year Plan are also included in the list of guaranteed grid-connected projects in Shandong Province, and in principle should be launched by the end of 2025 and completed by the end of 2027.

The base is one of the five clean energy bases in Shandong Province and an important part of China's green energy corridor in the lower reaches of the Yellow River, and is of great significance to the optimization of the energy structure and the regional green, low-carbon and high-quality development.

CPID will make every effort to promote the development of the base projects and create a regional model in Shandong for the high-quality construction of large integrated bases.
