

Deng Yong Meets Vice President Wu Xueqian and his Delegation from Siemens (China) Infrastructure Group

On January 10th, Deng Yong, General Manager of the Hubei Branch of State Power Investment Corporation (Hubei Company), met with Wu Xueqian, Vice President of Siemens (China) Infrastructure Group, and his delegation at the headquarter of the company. Both sides exchanged views on development of energy industry equipment and software, comprehensive smart energy projects, and development of related industries.

Deng Yong welcomed the arrival of Wu Xueqian and his delegation. He introduced the industrial structure, new energy development achievements, and the development of the "Rural Area Smart Energy Action" carried out by the Hubei Company. He said that Siemens Infrastructure Group's capabilities in energy equipment manufacturing, power distribution control, and development of automation software can meet the needs of the Hubei Company. He hoped that Siemens can leverage its technological and resource advantages to accelerate the development of the Hubei Company in areas of "Rural Area Smart Energy Action", rural energy revolution, and the construction of comprehensive smart and zero carbon-emission power plants by means of innovations of products, technology, and industrial models.

Wu Xueqian congratulated the Hubei Company on its achievements in promoting the rural energy revolution and the Rural Area Smart Energy Action, and introduced the corporate culture, industrial sections, and development strategies of Siemens (China) Infrastructure Group. He said that the group is willing to leverage its advantages to contribute to the construction of comprehensive smart and zero carbon-emission power plants and rural energy revolution demonstration projects for the Hubei Company so as to guarantee the promotion of Rural Area Smart Energy Action in the province.
