5G & 4G
Mid-/high-speed connections **>400 mil**

IoT revenue (RMB bil)

High, medium and low-speed access in all scenarios

- Built 5G IoT connectivity products with features such as **5G slicing and 5G LAN**

Integrated development of "Terminals, Network, Cloud, AI and Security"

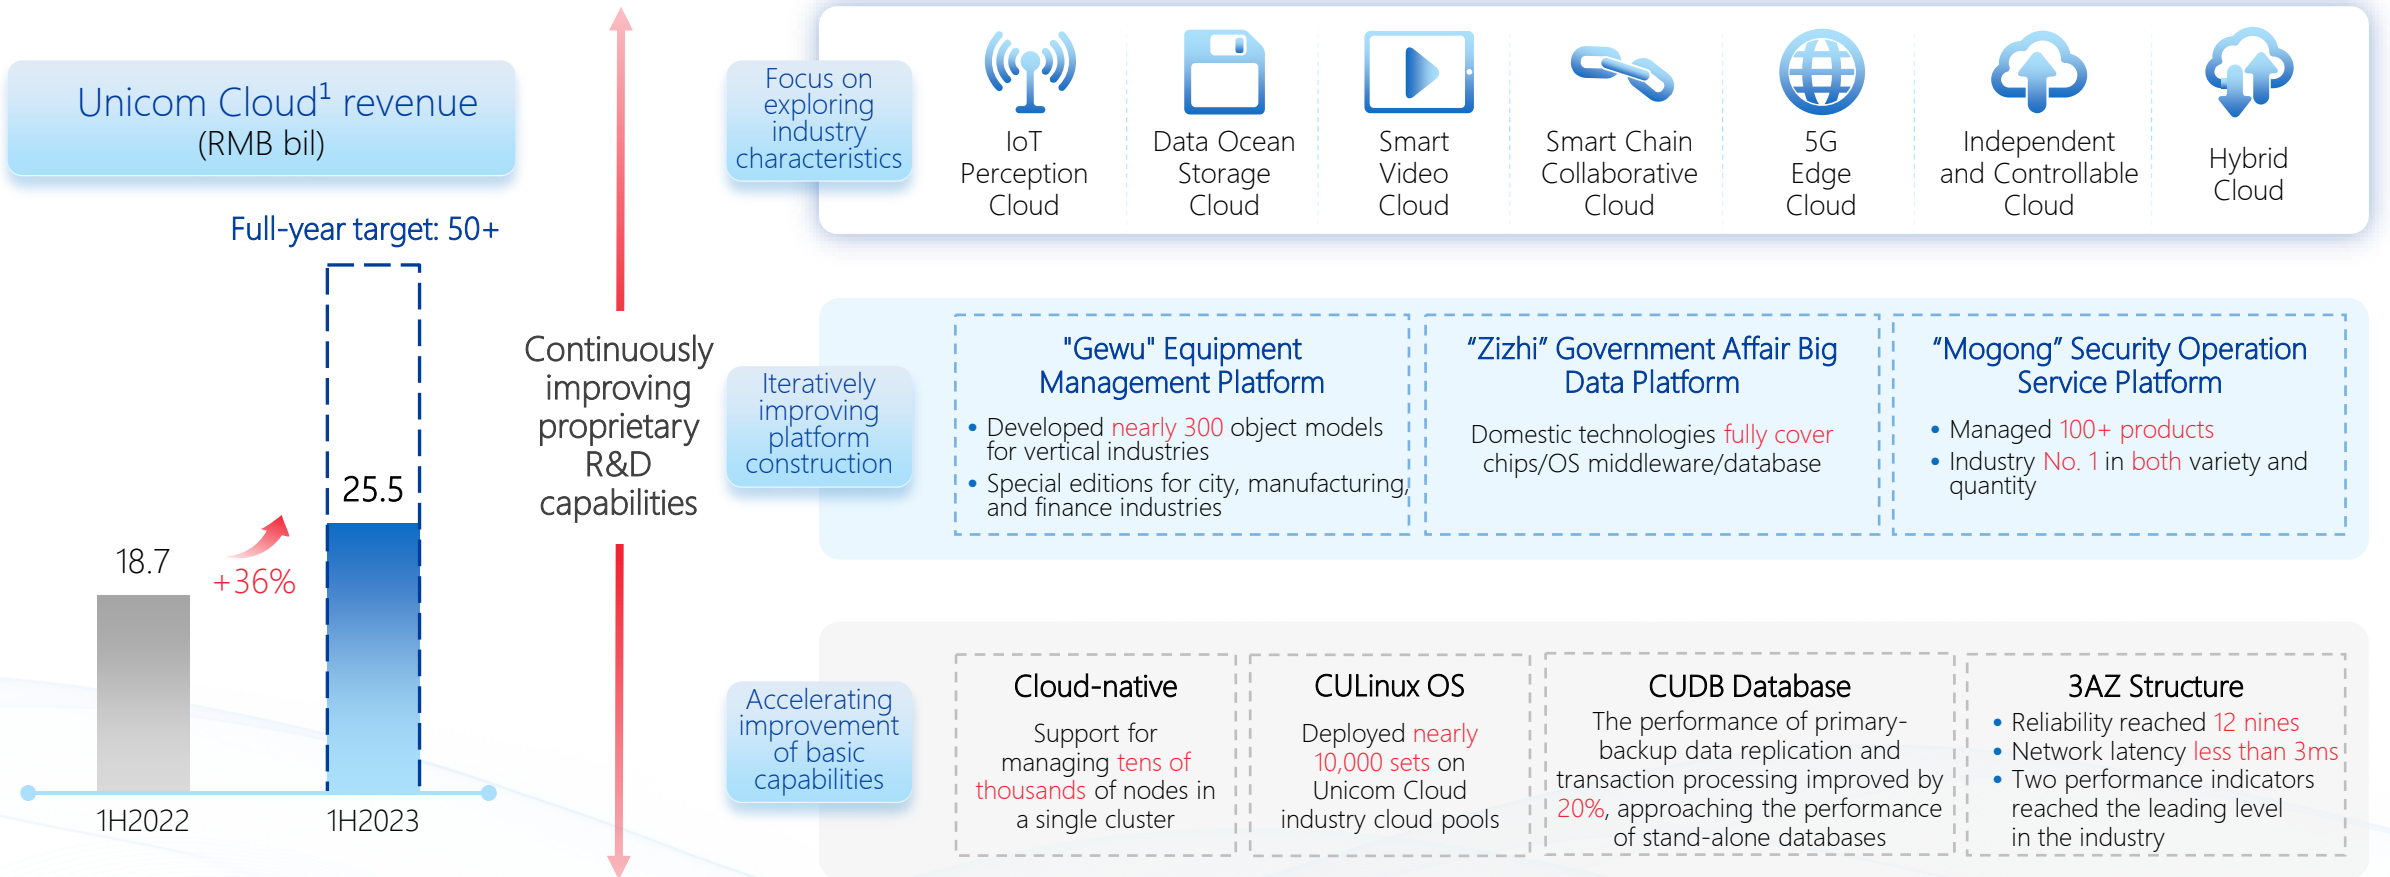

- Adhered to the product evolution path of "**network virtualisation, hardware implementation of software, and hardware intelligence**"
- Integrated **Big Data, AI, blockchain and security** capabilities, built differentiated advantages in **integration of software and hardware, IoT and security, and cloud-based startup**

Gewu platform empowering industry breakthroughs

- Provided rich **Big Data, AI and IoT models**, as well as differentiated capabilities in **IoT and network collaboration**
- Built industry solutions for key sectors such as **industrial internet, smart city, and ecological environmental protection**

Enhancing Proprietary R&D Capabilities in Big Computing

Note:
1. Unicom Cloud revenue included revenue of cloud resources, cloud platforms, cloud services, cloud integration, cloud interconnection, cloud security, etc., generated from integrated innovative solutions

Big Data revenue
(RMB bil)

Practical experience in massive-scale Big Data

- Centralised data from 31 provinces, with the ability to collect and exchange massive, multi-source, heterogeneous, nationwide, and real-time data

Hyperscale Data Processing

400+ PB

Real-time data processing

1,000+ bil

Industry-leading technological capability

- Enhanced strategic investment and talent introduction, and strengthened foundation Big Data, AI and blockchain capabilities

Blockchain TPS

20,000

No. of blockchain patents > 650

Strong edges in security capabilities

- Relied on three major systems, namely Big Data security management, technology, and operation, to ensure data security
- The first batch of domestic companies to obtain DSG3 (highest level) certifications, with 11 capabilities listed in the Data Governance Industry Map of CAICT, leading in quantity

Empowering Thousands of Industries with Big Application

5G applications transitioning from "show flats" to "commercial properties"

RMB 2.6 bil

Contract value of 5G private networks

RMB 6.2 bil

Contract value of 5G industry applications

>5,800

Cumulative no. of customers served by virtual private networks

Continuously deepening and expanding 5G applications

Continuously iterated and upgraded 5G private network PLUS product system and carried out core technological capability to tackle key problems

2,600+

5G Factories

Deepening RedCap-driven innovation

Industry's first

5G RedCap Industry Alliance

Completed trial verification of full-spectrum 5G RedCap in **8 major sectors**, such as manufacturing and power

7 models

5G RedCap modules & industry terminals

Rapid Growth in Big Security Revenue

↑178%

Big Security revenue
growth

Products listed in the
security cloud market

80+

Rapidly improving security capability to construct a three-dimensional comprehensive defense system

- Through network-wide routine command, dispatch, and operation, a **three-dimensional comprehensive defense system** was formed, comprehensively enhancing the network security of China Unicom

Providing integrated security products and operation services for industry customers

- In sectors such as **digital government affairs, digital enterprises, smart cities**, etc., the Company leveraged the "Mogong" security operation service platform to provide integrated security operation services to achieve "**one-point discovery, network-wide response**"
- Leveraging the security cloud market, we have created a product ecosystem that widely meets the security needs of the digital economy

Actively Developing International Business

International business revenue (RMB bil)

Broader service areas of international business

264

No. of countries and regions covered¹

this year **↑70%**

Network
technology
innovation

- Created **>10** network innovation products, and launched **>100** network intelligent operation scenarios, driving production and operation to increase revenue and reduce cost

AI
planning

- Highly emphasized on the development of next-generation of AI technology represented by large models, and accelerated the enhancement of the Company's AI capabilities

Rich achievements
in technological
innovation

- Applied for **39** international standards, **100** domestic standards, published **143** papers, and released **28** whitepapers

Continuous progress
in reform

Spin-off and listing of
China Unicom
Smart Connection Technology

Rich achievements in
strategic cooperation

137
group-level
strategic cooperation

Reform Progress

- Steadily promoted the **spin-off and listing** of China Unicom Smart Connection Technology, the Company's subsidiary
- China Information Technology Designing & Consulting Institute deepened reforms, established a diversified board of directors, and **explored in-depth cooperation with strategic investors in various fields**
- **Continued to optimise operational organization**, integrated into the development of local digital economies, fully leveraged the advantages of the four-tier operational system, and continuously improved operation and service abilities

Strategic Cooperation

- Established **China Unicom Strategic Cooperation Management System** to effectively improve closed-loop execution capabilities and significantly facilitate the achievement of the Company's strategic goals
- The new JV with Tencent, **Yunzhou Times**, has been registered and started operations. Based on independent research and development and taking advantage of both shareholders' strengths, it develops CDN/MEC platform, operation and product innovation capabilities, and provides next-generation CDN as well as edge computing services for digital government, artificial intelligence, etc.

Overall Results

Financial Performance

Operating costs (RMB bil)

as % of operating revenue

Mainly due to increased investment in innovative businesses and strategic resources to ensure sustainable growth in the future

Network, operation & support expenses (RMB bil)

as % of operating revenue

Despite the expansion of the company's network and related infrastructure, network costs remained stable as % of operating revenue

Depreciation & amortisation (RMB bil)

as % of operating revenue

Depreciation & amortisation as % of operating revenue to remain on downward trend in 2023

Mainly due to the effective control of capital expenditures in recent years and network co-build co-share

Employee benefit expenses (RMB bil)

as % of operating revenue

Mainly due to the ongoing efforts to reform the incentive mechanism, strengthened performance-linked incentives, and optimised human capital efficiency

Costs of telecommunications products sold (RMB bil)

as % of operating revenue

Basically in-line with 36.0% sales growth of telecommunications products

Selling and marketing expenses (RMB bil)

as % of operating revenue

Appropriately increased selling expenses to enhance competitiveness, while the growth rate was lower than operating revenue growth of 8.8%

Strong and Stable Financial Position

Liabilities-to-assets ratio
remained at a reasonable level

2023.06: **46.4%**

Maintained the
highest entity rating¹

AAA

Enhanced financial
strength & ability to
counter risks

Interest-bearing debts² as at
2023.06

↓ **16.9%** yoy

Note:

1. The long-term credit rating of China United Network Communications Corporation Limited, a controlled subsidiary of the Company, by China Chengxin International on 11 August 2022
2. Excluding lease liabilities
