### **PROSPECTS**

Momentum of the market slowed as uncertainty looms over China’s stance on loose monetary policy, new MERS virus, MSCI exclusion of A-shares into the index and the imminent US interest rate hike. Only a month ago, the Hang Seng Index (HSI) was under influence by strong market catalysts, including China’s accelerated capital market and state-owned enterprises reforms, liberalised investment policies and relaxed mutual funds restriction under the Shanghai-Hong Kong Stock Connect Program. There had been a significant increase in Chinese capital outflows and an expansion of cross border investment activities during the Year.

In view of the market climate, we are seeing reduced valuation gap between A and H shares as share price converges. Simultaneously, investors had been flooding into the already competitive direct investment and equity markets, which render the seizing of sound and potential investment projects with attractive valuations more challenging.

With funds returned from our exited investments, we are closely monitoring new investment opportunities as well as existing ones. We will seek new ventures and projects through direct investments or investment funds focused in China and abroad. We aim to target opportunities with the most optimal risk-return dynamic for our shareholders.
