ANNOUNCEMENT

BUSINESS UPDATE

POSITIVE DEVELOPMENTS OF GRAPHENE COATINGS APPLICATIONS BY MARINE CHEMICAL RESEARCH INSTITUTE

This announcement is made by the Board of the Company pursuant to Rule 13.09 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “Listing Rules”) and the Inside Information Provisions (as defined in the Listing Rules) under Part XIVA of the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong).

The Board of Directors is pleased to announce that Marine Chemical Research Institute (“MCRI”) informed the Group on 17 June 2016 that there are positive developments in the research and development of graphene based coatings applications using the graphene outputs of the Group.

A graphene-zinc anti-corrosion primer is developed and has reached the national industry standard requirements of the zinc rich epoxy primer. In addition, the graphene-zinc anti-corrosion primer developed, which reduces the percentage of zinc utilised by more than 35% and the proportion of the anti-corrosion materials by 30%, fulfills the design requirements of MCRI for light weight heavy-duty coating layer for application in the marine and navigating environment. On the other hand, it is noted by MCRI that the graphene output of the Group has better performance in terms of electricity conductivity and electromagnetic permeability than other graphene available to MCRI when it is applied to the research and development of the electromagnetic coating.

Shareholders and potential investors are advised to exercise caution when dealing in the shares of the Company.

By Order of the Board
