業務回顧及展望

OPERATING RESULTS

The year 2017 is a significant year for China's green development in light of new market conditions, challenges and targets for the environmental protection industry during the 13th Five-Year Plan period. In March 2017, the Government Work Report put forward the idea of "intensifying efforts to strengthen environmental protection and making our skies blue again" for the first time, reiterating the country's strategy to build ecological civilization. "Pollution Controls and Smog Reduction, Environmental Protection and Green Development" have become hot topics this year and shown a new trend of China's overall development in 2017.

In the first half of 2017, details of the 13th Five-Year Plan were announced consecutively in different provinces and cities, including special planning information, guidelines on executing the plan, implementation proposals and implementation regulations. Undoubtedly, the 13th Five-Year Plan will be implemented in full swing in 2017 and the environmental protection industry is stepping into a prime period of development.

2017 is also an exceptional year for China Everbright Greentech Limited (the "Company") and its subsidiaries (the "Group") as it has achieved new breakthrough. On 8 May this year, the Company was listed on the Main Board of The Stock Exchange of Hong Kong Limited (the "Stock Exchange"), making its debut in capital market. The separate listing, and spin-off from its parent company, China Everbright International Limited ("Everbright International"), fully unleashed the potential value of the Company and further strengthened its position in China's environmental protection industry.

PRINCIPAL RISKS AND UNCERTAINTIES (continued)

Technology and innovation risks mainly refer to the risks arising from the failure to satisfy business development needs driving by effective research and development and the introduction of new technologies, which in turn affect the Group's profitability. During the period, the Group has strived to develop new businesses in the environmental protection sector, such as those relating to soil and air remediation, and has tapped into the overseas markets as well as strengthened its position in domestic market in line with the "The Belt and Road Initiative". The Group also attached great importance to attract the talented professional technology experts, introduced the results of foreign advanced technological research and development to China, and focused on the improvement and application of the technology. As such, technology previously introduced from overseas and products from research and development have been gradually applied to projects, which has constantly enhanced the technological level in the project operations. Furthermore, the research and development plans formulated during the period have fully covered the Group's major project development areas in its key businesses, including biomass, urban-rural integration model and hazardous waste treatment.

ENVIRONMENTAL AND SOCIAL MANAGEMENT

The Group has completed the building of its ESHS Management System, in a bid to achieve a systematic and standardized management over its aspects such as Environment, Safety, Occupational Health and Social Responsibility and maximize its control on relevant risks and minimize defects in management system. The ESHS Management System of the Group focuses on the material risk control issues that may rise during the periods of project operation and construction, in which it has ESHS Management Organization Structure in place, with standardized management system complemented, such as regulations, standards, SOP and checklists, etc, as well as mechanisms of inspection, supervision, assessment and reporting in place. Up till now, the Group has completed the best model SOP for the high-risk issues of overall businesses (waste-to-energy, biomass power generation/heat supply/cogeneration, hazardous waste landfill and incineration, solar energy and wind power) and for the medium risk issues of major businesses (waste-to-energy, biomass power generation/heat supply/cogeneration, hazardous waste landfill and incineration) and executed under the jurisdiction of the relevant project. ESHS inspections have been conducted on a quarterly basis. During the first half of 2017, we had conducted system-wide ESHS inspection, together with special inspections on fire prevention and seasonal safety measures in summer at the end of each quarter. At the same time, awareness promotion in relation to ESHS has also been conducted, such as activities themed as “Safe June”, in which we organized trainings with topics concerning safety and Quiz Competition concerning ESHS. We believe that the ESHS Management System may enhance the Group’s performances in environmental compliance, work safety, employee benefits and community development.

3 REVENUE AND SEGMENT REPORTING
(continued)**(b) Segment reporting** (continued)*(i) Segment results, assets and liabilities*
(continued)

Revenue and expenses are allocated to the reportable segments with reference to revenue generated by those segments and the expenses incurred by those segments or which otherwise arise from the depreciation or amortisation of assets attributable to those segments.

The measure used for reporting segment profit is “EBITDA” i.e. “earnings before interest, taxes, depreciation and amortisation”. To arrive at EBITDA, the Group’s earnings are further adjusted for items not specifically attributed to individual segments, such as directors’ and auditors’ remuneration and other head office or corporate administration costs.

In addition to receiving segment information concerning EBITDA, management is provided with segment information concerning revenue, interest expense from borrowings managed directly by the segments, depreciation and amortisation and additions to non-current segment assets used by the segments in their operations.

3 收益及分部報告(續)

(b) 分部報告(續)*(i) 分部業績、資產及負債*(續)

收益及開支乃參考須予報告之分部所賺取之收益及所產生之開支或有關分部之資產所產生之折舊或攤銷而分配至有關分部。

用於報告之分部盈利表示方式為「EBITDA」，即「除利息、稅項、折舊及攤銷前盈利」。為了得出EBITDA，本集團之盈利將就無明確歸於任何分部之項目(例如：董事酬金、核數師酬金及其他總公司或企業行政成本)作進一步調整。

除獲提供有關EBITDA之分部資料外，管理層亦獲提供有關收益、各分部直接管理之借貸利息開支及各分部運營時所使用之非流動分部資產之折舊、攤銷及增置之分部資料。

6 EARNINGS PER SHARE

(a) Basic earnings per share

The calculation of basic earnings per share is based on the profit attributable to equity shareholders of the Company of HK\$457,416,000 (six months ended 30 June 2016: HK\$292,095,000) and the weighted average of 1,620,214,000 ordinary shares (six months ended 30 June 2016: 1,440,000,000) in issue during the interim period. **8 DEBTORS, OTHER RECEIVABLES,
DEPOSITS AND PREPAYMENTS**
(continued)

There was no recent history of default in respect of the Group's debtors. Since most of the debtors are local government authorities in the PRC and based on past experience, management believes that no impairment allowance is necessary in respect of the past due balances as there has not been a significant change in credit quality and the balances are still considered fully recoverable. The Group does not hold any collateral over these balances. No impairment loss was recognised by the Group at 30 June 2017 (31 December 2016: Nil).

Other receivables, deposits and prepayments include balances totaling HK\$101,111,000 as at 30 June 2017 (31 December 2016: HK\$71,059,000), which bear interest at rates ranging from 5.15% to 6.91% (31 December 2016: 5.15% to 6.91%) per annum and relate to the certain Build-Operate-Transfer ("BOT") and Build-Operate-Own ("BOO") arrangements of the Group. Report on Review of Interim Financial Information 中期財務資料審閱報告

Scope of review

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410, *Review of interim financial information performed by the independent auditor of the entity*, issued by the Hong Kong Institute of Certified Public Accountants. A review of the interim financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim financial report as at 30 June 2017 is not prepared, in all material respects, in accordance with Hong Kong Accounting Standard 34, *Interim financial reporting*.
