4. Reasons for Transaction

As the Group is principally engaged in property development and property investment in various cities in the PRC including Guangzhou, Beijing, Shanghai and Tianjin, the Transaction is in the ordinary and usual course of business of the Group. Hopson Youtian is principally engaged in property development in Huizhou.

The Land is located in Huizhou Daya Bay Economic and Technological Development Zone, West side, Xiangshuihe South, Huizhou. Huizhou is one of the major cities in the southern part of the PRC and is located in the eastern part of the Pearl River Delta,

where the Xizhi River joins the Dongjiang River. Huizhou is located at a port of entry and is an industrial centre in the Dongjiang Valley. The Huizhou Daya Bay Economic and Technological Development Zone, approved as a state level development zone, is located in the south of Huizhou, next to Hong Kong and Shenzhen, and is within the most developed and most active economic area of Pearl River Delta. According to the government's plan, the Huizhou Daya Bay Economic and Technological Development Zone will be primarily focused on the development of major industries along the sea side such as oil and gas, information technology, automotive, port logistics, and tourism industries, and investment projects to be carried out in the zone shall be of high technology, high value added, high efficiency, low resource consumption, low energy consumption and low emission. It is expected that the Daya Bay Economic and Technological Development Zone will become one of the prime locations in Huizhou as the export processing centre, and as a result, there will be great potential in the property market in the Daya Bay Economic and Technological Development Zone.

While the Group has already established a presence in the city of Huizhou, the Group has not yet made an entry into the property market in the Daya Bay Economic and Technological Development Zone. The Directors consider that the Transaction will provide an opportunity for the Group to establish its presence in the Daya Bay Economic and Technological Development Zone, a location which the Directors consider to be of growing potential, and hence will have a positive impact on the brand-building of the Group in the Daya Bay Economic and Technological Development Zone as well as the overall business expansion of the Group.

Furthermore, in view of the potential of the property market in the Daya Bay Economic and Technological Development Zone, the Directors believe that the acquisition of the Land will enrich the Group's landbank and will bring forth development potential and opportunity for the Group.
